Early Warning Systems: Developing and Monitoring Effective Systems and Interventions for Students At Risk of Dropping Out

Our Nation Faces a Graduation Challenge

- There is little work for young adults without a high school degree.
- And no work to support a family without some post-secondary schooling or training.
- As a result entire communities are being cut off from participation in American society and a shot at the American Dream.
- This weakens the Nation.
Dropping Out of High School Means You Are Much More Likely To:

- Be unemployed
- Be incarcerated
- Have health issues and at an earlier age
- Pass on these set of disadvantages to your children

As a result, dropping out has high individual and community costs

The Good News is High School Graduation Rates in New Mexico are Increasing

![Graph showing graduation rates increasing from 2009 to 2013]

The Challenge is Much Work Remains

In New Mexico, 7,693 members of the Class of 2013 did not graduate with their peers
One of the Biggest Gaps in HS Graduation Rates in NM is Between Females and Males

There are 4 Main Types of Dropouts

- **Life events** (forces outside of school cause students to dropout)
- **Fade Outs** (students do ok in school but stop seeing a reason for staying)
- **Push Outs** (students who are or are perceived to be detrimental to others in the school)
- **Not Succeeding in School, School Not Succeeding with the Student**

This Presents our Schools and Communities with a Big Challenge

Every student regardless of out of school needs, prior levels of school success, and current motivations needs to graduate from high school prepared to succeed in post-secondary school and training.
CHALLENGE:
HOW CAN WE DESIGN SCHOOLS AND SUPPORT STUDENTS SO ALL STUDENTS GRADUATE PREPARED FOR POST-SECONDARY SCHOOLING OR TRAINING?

WHAT ARE THE ACADEMIC BEHAVIORS AND OUTCOMES THAT 9TH GRADERS WITH A 75% CHANCE OF SUCCEEDING IN THE STATE UNIVERSITY SYSTEM HAVE?

5 Tools of Successful Students

1. High attendance
2. Did not get suspended
3. No course failures
4. B or better GPA
5. Mid-level or better test scores

(They were also on-age for grade.)
In Short, They are Good at School

• Only about 25% of 9th graders in a state achieve all these outcomes.

• When high-poverty students achieve these outcomes much of the poverty disadvantage to success in college goes away.

• What does this tell us?

Students who exhibit strong academic behaviors and get good grades are much more likely to succeed in high school and college.

Promoters of High School Success

Motivation

Social Engagement

Self-Regulation

Our schools and student support systems are not designed to get the outcomes we need in the 21st century.
HOW DO WE DESIGN BETTER STUDENT SUPPORT SYSTEMS?

WHAT STRENGTHS DO YOUR STUDENTS BRING?
WHAT CHALLENGES DO THEY FACE?

Adolescents are strong, resilient, and fragile.
Poverty magnifies all of these.
We Are Learning How External Risk Factors Impact Academic and Social Behaviors

- **Exposure to Violence**
- **Residential In-Stability**
- **Hunger and Poor Family Health**
- **Students as Caregivers**

Kids who grow up in stressful environments find it harder to concentrate, follow directions, rebound from disappointment. This has a direct effect on their school performance.

---

The Good News in Recent Lessons from Brain Science

- There is substantial plasticity to the human brain, it can be shaped and re-shaped through life experiences.
- Important brain developments continue through young adulthood, in particular around self-regulation.
- Student relationships with caring and supportive adults are powerful antidotes to the stress impacts of poverty.
- Schools can be organized to enable students to overcome many of the impacts of poverty.

---

Three Parts To a School’s Educational Challenge

- **Academic Challenge** - How many students enter the school behind grade level or without expected foundational skills or knowledge?
- **Engagement Challenge** - How many students enter the school having already been chronically absent, in behavioral trouble, or having failed a course because they did not turn in their work?
- **External Risk Factor Challenge** - How many students enter school having experienced prolonged exposure to poverty, violence, homelessness, agency involvement, and/or lack of stable access to basic needs?

Consult Good News Tool 12 for further data.
Source of table is NELS:88. Two Years Later, National Center for Education Statistics (NCES)

Good News
We Know the Key Inflection Points

• Students who are good at school by 9th grade by and large succeed, those that struggle and do not earn promotion to 10th grade by and large do not.

• Most but not all students’ 9th grade trajectories are set in the middle grades.

• Chronic absenteeism in the early grades sets students up to fall off-track in the middle grades.

• To pivot from high school to adult success, many students need help navigating the grade 10 through the initial years of college.

IN SUMMARY, WHAT WE FACE IS A GIANT ENGINEERING CHALLENGE OF GETTING THE RIGHT SUPPORT TO THE RIGHT STUDENTS AT THE RIGHT TIME AT THE SCALE AND INTENSITY REQUIRED.
Designing Schools to Meet High Educational Challenges

Whole School is Organized and Supported to Enable:
- Effective instruction (including teacher professional development connected to the early warning indicators)
- Safe and positive learning climate
- High student engagement (Believe, Behave, Try Hard)
- Collective efficacy and all graduate mission among staff

Intensive One on One Supports:
- Driven by needs assessment
- Case managed
- Professional provided when whole school and moderate intensity supports are not sufficient

Extra-Supports Provided:
- At first signs of student need
- To all students who need it (no triage)
- Diagnostic tools ensure the right support (e.g. cognitive or socio-emotional)
- Moderate intensity but if needed continuously available

Intensity of Interventions

Focus of the Conference

- Learn about Early Warning Indicators and Tiered Student Support Intervention Systems.
- Learn from NM early adopters of Early Warning Systems in how to overcome implementation challenges.
- Have team discussion and action planning time supported by facilitators.
- Link dropout prevention and college readiness to build one seamless student support system.

June 2, 2015 - Early Warning Systems
We Will Know
We Are Making Progress When ...

• Schools have strong prevention strategies and cultures that encourage students to attend, behave, and try.
• Schools have readily accessible and teacher friendly diagnostic tools to understand the academic and socio-emotional needs behind student disengagement.
• Schools are organized so teams of teachers work with manageable numbers of students, supported by a second shift of adults, with time built in and honored during the school day for collaborative data-driven work.
• Clear and supported pathways to college and career readiness at the scale and intensity required from sixth grade to post-secondary.

We Know
We Have Made Progress When ...

• Schools and districts routinely put in the focus and energy preparing for the next cohort of students that professional football teams put into preparing for their next game.
• Collaborative efforts between teachers, schools, districts and external partners establish the mutually supportive functions equal to those needed to put on a Broadway play.
• We train with the intensity and the smarts of the military.

Frontline: Middle School Moment
What is Your School’s Educational Challenge

- **Academic Challenge** - How many students enter the school behind grade level or without expected foundational skills or knowledge?

- **Engagement Challenge** - How many students enter the school having already been a) chronically absent, b) in behavioral trouble, and c) having failed a core course?

- **Poverty Challenge** - How many students enter school having experienced prolonged exposure to extreme poverty, violence, homelessness, and/or social service agency involvement (i.e. foster care etc.)?

INTRODUCTION TO EARLY WARNING SYSTEMS

Core Ideas of Early Warning Systems

1. To graduate, college- and career-ready, students need to successfully navigate several key transitions and acquire a set of academic behaviors - they need to learn how to succeed at school.

2. Students signal that they are on- or off-track toward these outcomes through their behaviors.

3. By tracking Early Warning Indicators, it is possible to identify when students are beginning to fall off-track, providing time to intervene and alter their trajectory through school and beyond.

4. Using EWS, schools can be organized to apply school-wide preventative, targeted and intensive interventions until students are on-track.
**Indicators**
- Reliable, valid, and predictive
- Each indicator adds information for action
- Easily accessed and organized

**Support and response system**
- Whole school/classroom, small group, and individual initiatives and interventions
- System for monitoring/follow-up
- Reflective processes

**Objectives**
- Participants will be able to understand the theory and research behind early warning systems.
- Participants will discuss and examine ways that they can collect, monitor and use data as part of an early warning system.

**On and Off-Track Indicators**
- Off-track
- Sliding
- On-Track
  - High School Graduation
  - Postsecondary Success
WHAT IS THE RESEARCH TELLING US?

Indicators and Influencers?

- Poor attendance
  - Overage: 1-2 years, 2 years+
- Behavior marks
  - Suspensions
- Course failure
  - Core courses
  - Elective courses
- Special education
  - English Language Learners
  - Standardized test scores
- Poor behavior
  - Repeaters
  - 9th graders
- Gender
  - Socio-economic status
  - Parental education

Examining the data

- On your table, there is a chart/graph/table
- Two questions for you to answer:
  - What does it say?
  - Why does it matter to your school?
- Now, find 3 other people with different pieces of data
  - Share your data with your new group
  - One takeaway from your group
Dropouts can be identified as early as 6th grade.

Sixth Graders (1996-97) with an Early Warning Indicator

% of students who are on-track to graduation

Grade in School

Sixth grade students with one or more of the indicators have only a 10% to 20% chance of graduating from high school on time or within one year of expected graduation.

Comparison Group

1,200 sixth graders with 90% attendance, excellent behavior, passed math and English, and scored at or above basic on the 5th grade PSSA.

Distribution of 6th Grade Indicator Flags

Note: Early Warning Indicator graph from Philadelphia research which has been replicated in 10 cities. Robert Balfanz and Liza Herzog, Center for Social Organization of Schools at Johns Hopkins University; Philadelphia Education Fund; Sixth Graders (1996-97) with an Early Warning Indicator, Followed through to High School Graduation; Philadelphia Sixth Graders with an Early Warning Indicator, Followed through to High School Graduation.
HS Freshman Grades Matter

Virtually all students with a "B" avg. or higher graduate in 4 years.

Virtually all students with less than a "D" avg. fail to graduate.

Prediction is less certain among students with D+, C+, C.

Los Angeles Course Failure

Figure 1: Graduation Rates by Courses Failed

Four-Year Graduation Rates by Freshman Absence Rates

June 2, 2015 - Early Warning Systems
Success Factors – The A,B,Cs

• GPA and course passage are strong predictors of students’ success.
• A study in Chicago has shown that GPA is the strongest predictor of college graduation.
  – More than 60% of students who graduated with a 3.6 GPA or higher completed a four-year degree within six years compared to slightly more than a quarter with GPAs between 2.6 and 3.0
  – *Consortium on Chicago School Research, 2006

Research Takeaways

• **Good News:** Students are resilient and usually signal before dropping out.
• Students usually start with one indicator and develop more indicators over time.

Research Takeaways - Attendance

• Students who are missing 10% or more of school need intervention.
• Attention should be paid to students who miss more than 5 days but less than 10%.
• It is the students who miss 5 or fewer days in the year who thrive.

<table>
<thead>
<tr>
<th>Tracking</th>
<th>Data</th>

<tr>
<td>On-Track</td>
<td>Greater Than 90%</td>
</tr>
<tr>
<td>College</td>
<td>Greater Than 95%</td>
</tr>
<tr>
<td>Ready</td>
<td></td>
</tr>
</tbody>
</table>
Research Takeaways - Behavior

- Students with sustained mild misbehavior fall off track in larger numbers.
- It is important to track more minor, as well as major incidents.
- Students who are suspended once need intervention to make sure they are not suspended again.

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>Off-Track</td>
<td>1 or More Suspensions And/or Mild Sustained Behavior</td>
</tr>
<tr>
<td>On-Track</td>
<td>No Suspensions</td>
</tr>
</tbody>
</table>

Research Takeaways – Course Performance

- Course Performance is as important for students’ long-term success as test scores.
- Students with multiple Ds and Fs seldom graduate.
- Students with B or better averages succeed in college.

## Indicator Usefulness

- The fewer indicators the better – aim for a simple, clean system.
- Many students in need of interventions can most easily be identified by the ABCs.
  - Many indicators beyond the ABCs may be more useful in determining type of interventions.
- Track the data that will support your system.

    **Find out what works for you!**

Four-Year Graduation Rates by Freshman Absence Rates

- 87% of students graduated in 0-4 days absent.
- 63% graduated in 5-9 days absent.
- 41% graduated in 10-14 days absent.
- 21% graduated in 15-19 days absent.
- 9% graduated in 20-24 days absent.
- 5% graduated in 25-29 days absent.
- 2% graduated in 30-34 days absent.
- 1% graduated in 35-39 days absent.
- 0% graduated in 40+ days absent.

*Course cutting counted as partial days.*
See How Chicago is Solving its Dropout Crisis by Focusing on Ninth Grade

2011 - 2014 increase in graduation rates largely attributable to focus on Freshman On-Track

Accessed via http://ontrack.uchicago.edu/#theresearch
Roderick, Kelley-Kemple, Johnson and Beechum, Preventable Failure: Improvements from Long-term outcomes when High Schools focused on the ninth grade, April 2014
Non-cognitive skills

Grades must capture some other important student attributes—over and above the content that test scores measure—but what? The prevailing interpretation is that, in addition to measuring students’ content knowledge and core academic skills, grades also reflect the degree to which students have demonstrated a range of academic behaviors, attitudes, and strategies that are critical for success in school and in later life, including study skills, attendance, work habits, time management, help-seeking behaviors, metacognitive strategies, and social and academic problem-solving skills that allow students to successfully manage new environments and meet new academic and social demands (Conley, 2007; Farkas, 2003; Paris & Winograd, 1990)
Resiliency

Numerous studies on resilience establish a correlation between academic resiliency and academic success, especially in lower socioeconomic populations. For example, a longitudinal study by Scales et al. (2006) found that higher levels of resiliency traits are strongly correlated with higher grade point averages (GPAs) among middle and high school students. These findings hold true over time, so that students reporting more resiliency characteristics early in the study had higher GPAs three years later, compared to students with fewer assets at the start.
EWS Data Slides for Discussion Groups

• What do you see when you examine the data?

• Do any of the indicators influence each other?

• How does it help inform action and monitor impact?

• What other information would you like to examine with the ABC profile?

<tr>
<td></td>
<td>Pair yourself with someone you do not know. One of you will take on the role of a student and select an attendance, behavior, or course performance issue. The other will take the role as a member of the school staff who is part of a team working to address Early Warning Indicators.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>The goal for the adult is to use an empathetic manner to discuss with the student the reasons behind their actions. You are trying to establish a bond with the student and find out why they are behaving the way they are.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>The goal for the person being the student is to answer as a student with an off-track indicator might.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td>After you are finished, switch roles and pick a new area of student challenge from the “What is Your School’s Educational Challenge” sheet.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
**Small Group Discussion Questions**

Informed by your role-playing interviews and broader knowledge, discuss with your group what adult behaviors in your school might (often unintentionally), be standing in the way of students attending regularly, behaving, and trying.

For example, are there any attendance, behavior, and course performance policies that might be counter-productive (i.e. students who are chronically absent are suspended) or are their strong beliefs that students are responsible for their own outcomes and it is not the school’s role to increase student’s ability or desire to attend school regularly, focus in class, and complete their work.

Some potentially counter-productive adult behaviors in our school are:

<table>
<thead>
<tr>
<th>Based on your analysis of your school’s educational challenge, the student interviews and discussions of adult behaviors, come up with an “out-of-the-box” way to enable more students to attend regularly, focus and act appropriately in class, or complete their assignments.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Our out-of-the-box solution is:</td>

</tr>
<tr>
<td>1:00 – 2:00</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Presentation**

- What are the key indicators and influencers of students who are at risk of falling off-track?

**Reflection Activity:**

- List all the reasons a student may have poor attendance.

- Everything that keeps a kids out of the building.

**Materials: EWS data slides**

- What do you see when you examine the data?
- Do any of the indicators influence each other?
- How does it help inform action and monitor impact?

**Materials: Guiding Questions**

- What is the research telling us?
- What data do we want to look at?
- How do we organize the data?
- What do we want to monitor?
- What data would you want to be included in the state system?
High achievement always takes place in the framework of high expectation.
- Charles Kettering
