SECTION III: NARRATIVE

BILL SUMMARY

Synopsis:

SB57 seeks to increase the minimum wage for school district cafeteria staff, bus drivers, all non-certified school personnel and licensed educational assistants from $6.00 per hour to $16.00 per hour beginning July 1, 2019.

FISCAL IMPLICATIONS

The total cost of SB57 is an estimated $61.0 million to increase the minimum wage to $16.00 an hour for instructional assistants and non-certified personnel. See significant issues section for further information, including a table of estimated increases. Beginning in fiscal year 2021 (FY 21) and after, SB57 proposes to link the proposed $16.00 per hour minimum wage to the change in the consumer price index.

SB57 does not contain an appropriation. Lacking any appropriations to pay the cost of implementing the provisions of SB57, these expenditures will be absorbed by school districts and charter schools, possibly requiring staff realignment to meet the salary requirements contained in the bill.

While section 22-10A-39 of the Public School Personnel Act calls for a $6.00 hourly rate for such employees, it is probable that school districts and charters schools employing these staff members are following federal, state, county and municipal minimum wage laws. The federal, hourly minimum wage is $7.25, the state of New Mexico’s is $7.50, the City of Santa Fe’s is $11.09 and the city of Albuquerque’s is $8.80 for employees who do not receive health care and/or child care benefits and $7.95 for those who do. As a result, an increase to $16.00 an hour would likely put pressure on districts to eliminate some educational assistants and many non-certified staff; this is particularly true given the limited additional revenues to direct toward public education.

SIGNIFICANT ISSUES

As shown in the table below, SB57 would impact numerous school district and charter school personnel. Using the associated job codes and making some assumptions regarding contractual pay for standard 183 (nine month) or 260 day (12 month) contracts, PED staff were able to determine a statewide average hourly rate. The increased cost was calculated for those staff that would see an increase in their hourly rate to $16.00 per hour. These increases would also be subject to an associated benefits cost increase which was also added to the total. The table also assumes that hourly rates for job codes that are above the new proposed minimum wage remain flat because, ideally, the provisions of SB57 would not negatively impact other job classifications. However, if implemented, the provisions in SB57 do not ensure that school district and charter school personnel making above the minimum wage would not see a reduction.
to the hourly rate.

Based on the above chart, the total additional cost for raising the minimum wage to $16.00 per hour for instructional assistants and non-certified personnel is $60,976,646.09.

**PERFORMANCE IMPLICATIONS**

**ADMINISTRATIVE IMPLICATIONS**

It is unlikely the full cost of SB57 could be implemented as an appropriation to the State Equalization Guarantee. As a result, an increase in the minimum wage for these instructional assistants and non-certified personnel would cause revisions to Operating budgets regarding staffing levels and may include job losses. Additional administrative costs would be incurred for tracking a separate minimum wage requirement at school districts and charter schools, and by the
PED to enforce a minimum wage that varies from other governmental jurisdictions.
