Classroom Explorations

Professional Development

Explora's materials-rich programs actively engage Students, families, and teachers in inquiry based activities.

Participants make discoveries in science, technology, engineering, art, and math through questioning, experiencing, and investigating. Programs encourage participants to build their own knowledge and cultivate skills such as critical thinking, cooperative learning, observation, creativity, communication, and innovation.

Programs can take place at Explora or be brought to your community or school. Visit www.explora.us, email reservations@explora.com or call [505-224-8341](tel:505-224-8341) for information about booking and pricing.

Field Trips

Field Trips to Explora (*available for all ages*) are 1-hour or 2-hour Exhibit Explorations facilitated by Explora educators. Investigate gravity, water, light, air, numbers, sound, electricity, and more. You can also add a Classroom Exploration to your visit. To schedule call reservations at 505-224-8341.

Classroom Explorations

Classroom Explorations (*available for all ages*) are available at Explora and also at your site. They are 1-hour experiential programs facilitated by Explora educators. They involve every student in active participation and learning through the exploration of physical materials. Each Exploration is designed to provide opportunities for discovery around a specific science phenomena/ content area. Examples include: bubbles, magnets, energy, or probability. Classroom Explorations are benchmarked to NM State Science and Common Core Standards, and are designed for a class of up to 30 students at a time. We can also accommodate larger groups -- call us to find out how.

Family/Community Science Events

Family/Community Science (*available for all ages*) is a mini-Explora set up at your site where experienced Explora educators facilitate exciting tabletop activities and experiments designed to engage students or the entire family. Examples of activities include: create flying contraptions out of Dixie cups and see how they fly in a wind tunnel; test your engineering and balance skills to build a tall tower; or explore reflection, symmetry, mirrors and more!

Professional Development

Professional Development Programs and Workshops. Get fresh ideas for activities and teaching strategies! Explora's two-hour Workshops immerse participants in thought-provoking science-rich experiences that equip educators with resources and ideas. These Workshops embrace an inquiry approach to learning, involve participants in fun, active exploration of physical materials, and foster 21st Century Skills: critical thinking, cooperative learning, creativity, communication, and innovation. Workshops can also be customized to meet your staff's needs.

New! Makey Makey® Workshops for educators!

Learn to use and program your own Makey Makey® device in this fun and engaging 5-hour workshop for K-12 educators and after-school professionals who teach STEM subjects! Even beginners can quickly gain confidence to animate all kinds of objects and do amazing projects with this device that integrates everyday items with coding and circuit building. For details, call 505-224-8341, or view our webpage. **Book a workshop** for up to 25 participants and a date and time of your choosing! Choose from two workshop pricing options:

- \$400 - includes 5 Makey Makey® devices for your school (retail value \$249.75)
- \$600 - includes 10 Makey Makey® devices for your school (retail value \$499.50)

We invite you to forward this email and share information about Explora's Educational Programs with individuals who have volunteered to plan events for your professional teams and students.
