

Workshop notes

The pdf files are created in Pages and Keynote. If you want the originals, shoot me an email. They are LARGE files.

You can find posts from NMSTA related to NGSS here - <http://www.nmsta.org/ngss/>

And you can find resources categorized by DCI and grade level here - <http://www.nmsta.org/resource-search/>

For those of you who asked where to find the states' model curricula:

California

Main site - <https://www.cde.ca.gov/pd/ca/sc/>

Model curriculum - <https://www.cde.ca.gov/ci/sc/cf/scifwprepubversion.asp>

Rhode Island (for a tiny state, they did an excellent job!)

<http://www.ride.ri.gov/InstructionAssessment/Science/NGSSResources.aspx>

New Jersey

<http://www.nj.gov/education/modelcurriculum/sci/>

Ohio

<http://education.ohio.gov/getattachment/Topics/Learning-in-Ohio/Science/ScienceStandards.pdf.aspx?lang=en-US>

Michigan

Not model curricula, but examples of lessons -

<http://www.resa.net/curriculum/curriculum/science/professionaldevelopment/ngss-pd/lesson-plans-exploring-ngss/>

And for those of you who wanted to download the original standards documents (free as pdf), I've started an NGSS resource page here - <http://www.nmsta.org/ngss-resources/>
