Dear Career Planner,

The College and Career Readiness Bureau is pleased to present the second edition of the New Mexico Career Clusters Guide. This guide is designed to be a tool for students, parents, counselors, faculty, and career changers. It targets the career pathways needed to meet educational and employment goals and provides important information about wages and educational options in New Mexico. We were delighted by the utilization of the 2016 edition, and look forward to expanding the number for New Mexicans who have access to this important resource.

This guide, designed around career clusters and related pathways, portrays a common set of knowledge and skills required for career success in each path. The process enhances the traditional approach to career and technical education by providing a foundation that prepares individuals for a full range of occupations and career specialties. This method uses a blend of employability knowledge, technical, and academic skills.

The 2018 edition introduces an important new element, Recommended Programs of Study. As we look forward to a new era for career technical education, New Mexico is now emphasizing those high school programs that best prepare a student for high skill, high demand, and/or high wage careers.

The New Mexico Public Education Department is committed to supporting the state’s workforce system. This guide will assist students in identifying the available career options by using individual interests, clearly defined pathways, and timely employment projections.

Students using this guide will be able to make career decisions that meet their needs and allow them to thrive as members of New Mexico’s current and emerging economy.

Elaine Perea, PhD
Director,
College and Career Readiness Bureau

## Gaining Career-Related Experience

- Experiencing Real Jobs ................................................................................................................ 143
- Exploring the Job Market ............................................................................................................. 146
Are you planning for high school, college, the workforce, or a career change? You will find the New Mexico Career Clusters Guide a valuable resource as you make these important decisions. This guide is designed to be a tool for planning and preparing for a career. It provides you a structure for selecting careers based on linking what you know about yourself with information about occupations and typical training requirements.

The career planning process is the cycle you follow when seeking employment in occupations that match your interests. You can repeat this process as needed to help you find your place in the world of work. Follow these steps to learn about Career Clusters, their multiple pathways, and to find career options that best fit you.

The Interest Profiler on pages 5-7 gives you one option for finding career clusters and occupations that match your personal characteristics, strengths, and preferred activities. Results do not tell you which occupation or cluster you should choose, but they do provide information for determining the kinds of work you might want to explore.

Career Clusters help you sort through more than 900 careers. Each cluster contains occupations that have similar knowledge and skills. Career Pathways within each cluster help identify useful training to prepare for work in specific jobs. Connect your Interest Profiler results with clusters and occupations on pages 12-13 to discover which ones most closely match your work-related interests.

Use your Step 2 information to choose one Career Cluster from the section starting on page 14. First, get the cluster’s “big picture” and find online career resources. Then learn about the cluster, its pathways, and related occupations. Review the Selected Careers table’s job descriptions, employment growth, salary data, and interests. Find out about successful people who work in the cluster. Repeat this process with other clusters that interest you.

You may want to learn what it’s really like to work in a specific occupation. Check out page 144 to find ways you can get experience in and gain a deeper understanding of occupations you might like.
Discover Where Your Interests And Career Clusters Intersect

The Interest Profiler¹ is a self-assessment tool designed to help you identify what your interests are and translate these interests into occupations that best fit you. The following two pages include a list of 60 questions about work activities that some people perform in their jobs. By answering questions that represent important Interest Areas, the results from the Interest Profiler will help you discover your strong work-related interests and match them to careers.

Instructions for taking Interest Profiler:

- Read the work activities from top to bottom and answer in the correct order.
- Read each question carefully and decide how you would feel about doing each type of work. Try not to think about whether you have enough education or training to do the work, or how much money you would make doing the work. Just think about whether you would like or dislike performing the work activity.
- If you think you would like the work activity, mark the “Like” box.
- If you think you would dislike the work activity, mark the “Dislike” box.
- If you are unsure whether you would like the work activity, mark the “Unsure” box.

Scoring Instructions

Work activity items are color/pattern coded to help you score and interpret results. There are six color/pattern bands of items to represent six Interest Areas. Items in the same color/pattern band represent a particular Interest Area. To reveal your Interest Areas, follow these instructions:

**Step 1:** Count the number of “Likes” you marked for the questions in green band on page 6, then record the number in the first green box at the bottom of page 6.

**Step 2:** Count the number of “Likes” you marked for the questions in the green band on page 7, then record the number in the green box at the bottom of page 7.

**Step 3:** Add the numbers in the two green boxes on pages 6 and 7 and write the total in the "R" green box below. This total equals your score for the Realistic Interest Area.

**Step 4:** Repeat steps 1, 2, and 3 for the pink, yellow, purple, orange, and blue questions.

---

**Primary Interest Area:**
Which Interest Area has your highest score: R, I, A, S, E, or C? Enter the letter below.

Your Primary Interest Area: ________

**Secondary Interest Areas:**
Which Interest Areas have your second and third highest score? Enter the letters below:

Your Secondary Interest Areas: ________ & ________

**What Your Primary Interest Area Means**
What occupations are linked with your interests? You will want to explore occupations that are related to your Primary Interest Area. For example, a person with strong Realistic interests would probably be most satisfied with strong Realistic occupations (e.g., electrician, firefighter, surgeon). It is important to note that an individual’s interests may not be described by just one of the six interest categories. In fact, John Holland suggests that most people will have interests in several of the areas, but that they probably will have one Interest Area that is stronger than the others. If you have two identical highest scores, you should consider both scores as it indicates that you have two Primary interests. If you are not certain about the occupations linked to your Primary Interest Area, you can use your Secondary Interest Areas to explore a different set of careers.

Read over the definitions of your Primary and Secondary Interest Areas on the following page to get a better understanding of your work-related interests.

---

1 The O*NET Interest Profiler Short Form is a self-scored interest assessment. For information about scoring the paper-and-pencil version of the O*NET Interest Profiler Short Form, please check out O*NET® Interest Profiler Short Form Psychometric Characteristics: Summary 2010 (onetcenter.org/dl_files/IPSF_Psychometric.pdf).
The Interest Profiler measures interests in each of the six Holland RIASEC types. This section provides definitions for each of the six types. Each definition includes examples of activities that individuals with that interest type like to perform, as well as examples of famous people whose field of work matches the interest type.

**Realistic – The “Doers”**

People with Realistic interests like work activities that include practical, hands-on problems and solutions. They enjoy dealing with plants, animals, and real-world materials like wood, tools, and machinery. They often enjoy outside work. Often people with Realistic interests do not like occupations that mainly involve doing paperwork or working closely with others. Famous realists: NASCAR driver Danica Patrick, TV carpenter Norm Abram, wildlife expert Steve Irwin, and multi-talented athlete Jim Thorpe.

**Investigative – The “Thinkers”**

People with Investigative interests like work activities that have to do with ideas and thinking more than with physical activity. They prefer to search for facts and figure out problems mentally rather than to persuade or lead people. Prominent investigators: astrophysicist Neil deGrasse Tyson, primatologist Jane Goodall, mathematician/computer scientist Grace Murray Hopper, and neuroscientist Ben Carson.

**Artistic – The “Creators”**

People with Artistic interests like work activities that deal with the artistic side of things, such as forms, designs, and patterns. They like self-expression in their work. They prefer settings where work can be done without following a clear set of rules. Well-known artists: painter/sculptor Leonardo da Vinci, actress Halle Berry, writer J.K. Rowling, and singers Lady Gaga and Tony Bennett.

**Social – The “Helpers”**

People with Social interests like work activities that assist others and promote learning and personal development. They prefer to communicate more than to work with objects, machines, or data. They like to teach, give advice, help, or otherwise be of service to people. Famous helpers: educator Booker T. Washington, mental health care reformer Dorothea Dix, TV psychologist Phil McGraw, and civil rights leader Martin Luther King Jr.

**Enterprising – The “Persuaders”**

People with Enterprising interests like work activities that have to do with starting up and carrying out projects, especially business ventures. They like persuading and leading people and making decisions. They enjoy taking risks for profit. These people prefer action rather than thought. Prominent persuaders: TV mogul Oprah Winfrey, business magnate Donald Trump, U.S. Senator Marco Rubio, and Facebook co-founder Mark Zuckerberg.

**Conventional – The “Organizers”**

People with Conventional interests follow procedures and maintain accurate written and numerical business records. They prefer working in structured settings where roles and tasks are clearly defined. Well-known organizers: businessman J.C. Penney, Supreme Court Justice Sandra Day O’Connor, and professional organizer Alejandra Costello.

John Holland suggested that viewing the Interest Areas on a hexagon can help people understand how their interests overlap or how they may be distinctly different. Interests that are most similar touch each other on the hexagon (e.g., Social, Enterprising, and Conventional). On the other hand, interests across the hexagon from each other (e.g., Conventional and Artistic) are least likely to have similarities. Sometimes people’s combined interests are opposite from or not adjacent to each other. In this case, people sometimes choose to focus on the most different interest as a hobby or to find a unique work setting that merges their interests.

---

The O*NET Interest Profiler is compatible with Holland’s (1985a) Theory of Vocational Personality, one of the most widely accepted approaches to vocational choice. Information for Interest Areas is extracted from the O*NET Career Exploration Tools owned by the U.S. Department of Labor, Employment Training Administration (DOL/ETA). All O*NET Assessment/Counseling Tools are copyrighted. O*NET is a trademark of DOL/ETA.
16 Career Clusters and Their Career Pathways

Career clusters are groups of occupations that require a common knowledge base and the use of similar skills. Each cluster contains several smaller groups called career pathways that connect to educational programs, industries, and careers. While a career cluster paints a broad picture of a group of occupations, a pathway helps you focus on and develop a clear, more informed educational plan over time.

This Career Clusters Guide is designed around the O*NET® OnLine 16 Career Clusters and 77 related Career Pathways, which provide in-depth information about occupations in the same field of work that requires similar skills. The National Career Clusters Framework also organizes educational delivery within 16 Career Clusters and 79 Career Pathways to support career awareness and exploration. Please check out www.careertech.org/crosswalks for links between the O*NET Career Clusters and National Career Clusters.

Introduction to Career Clusters Matrix

Now that you’ve finished the Interest Profiler, circle the column headings on these two pages that match the Primary and Secondary interests that you discovered on page 8. Then look at the occupations listed under your types and mark any that appeal to you. Broaden your options by looking across both pages at other occupations in the career clusters containing the jobs you’ve marked. Remember: the occupations in this matrix give you only a few examples. To find additional careers, explore the career clusters information that follows.

The 16 Career Clusters

Once you have an idea of the types of jobs available, you’re ready to explore the Career Clusters section. Go to the appropriate cluster that best matches your work-related interests. The cluster pages have many more occupations listed than the charts from previous pages. These pages will tell you more about the cluster, its pathways, and related jobs. Additionally, you can:

- View job descriptions, employment data, and wages for selected careers.
- Learn about clubs to join, the appropriate math course to take, the WorkKeys skill levels to meet, the credentials and certifications to get, and the programs of study and majors at the New Mexico colleges that specialize in preparing students for these careers.
- Find additional online career resources including O*NET OnLine, which provides detailed information about each occupation in the cluster.
Think about life without agriculture, food and natural resources. What would we eat? Who would create and maintain the parks that help us relax and enjoy nature? Where would we get help for sick pets? This industry has a huge impact on our daily lives, and — like other industries — technology has brought about changes in the way it operates.

Large farms increasingly use precision-agriculture sensing technology, such as drones, to monitor soil conditions; GPS systems to help steer machinery more precisely; and computer-based maps to prescribe amounts of fertilizer, seed, and chemicals for specific areas. Bioscientists have developed genetically modified organisms (GMOs) that increase crop yield and resistance to pests and disease.

Organic farming, which seeks to avoid chemicals, continues to show economic growth. While responsible for only a little more than 4 percent of total U.S. food sales, sales of organic foods are more than two-and-a-half times greater now than they were 10 years ago.¹

The Agriculture, Food and Natural Resources cluster contains occupations that require all levels of training. Landscaping and groundskeeping workers and nonfarm animal caretaker positions are among the fastest-growing occupations that require the least training in this cluster. Jobs that usually require associate and bachelor’s degrees such as veterinary technologists and technicians, environmental engineers, and cartographers and photogrammetrists are also projected to increase. Employers who often hire workers in this cluster include farmers; federal, state and local governments; pest control businesses; and landscaping companies.

Agriculture, Food & Natural Resources

Core Skills

- Operation & Control
- Repairing
- Equipment Maintenance
- Troubleshooting
- Equipment Selection
- Science
- Operation Monitoring
- Quality Control Analysis
- Management of Material Resources
- Management of Personnel Resources

Natural Resources Systems Pathway

- Architecture & Engineering
  - Mechanical Engineering Technicians; Other Engineering Technicians; Cartographers & Photogrammetrists
- Construction & Extraction
  - First-Line Supervisors of Construction Trades & Extraction Workers; Earth Drillers, Except Oil & Gas
- Education, Training & Library
  - Biological Science Teachers, Postsecondary; Recreation & Fitness Studies Teachers, Postsecondary
- Farming, Fishing & Forestry
  - Logging Equipment Operators; First-Line Supervisors of Farming, Fishing & Forestry Workers
- Life, Physical & Social Science Management
  - Environmental Scientists & Specialists; Environmental Science & Protection Technicians; Zoologists & Wildlife Biologists; Forest & Conservation Technicians; Conservation Scientists; Foresters
- Management
  - Natural Sciences Managers
- Personal Care & Service
  - Recreation Workers
- Transportation & Material Moving
  - Industrial Truck & Tractor Operators; Refuse & Recyclable Material Collectors; Excavating & Loading Machine & Dragline Operators; Conveyor Operators & Tenders Captains, Mates & Pilots of Water Vessels; Tank Car, Truck & Ship Loaders

Agriculture, Food & Natural Resources • 17
<table>
<thead>
<tr>
<th>Occupation</th>
<th>Career Pathway</th>
<th>Job Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Precision Agriculture</td>
<td>• Animal Systems</td>
<td>Apply geospatial technologies, including geographic information systems (GIS) and Global Positioning System (GPS), to agricultural production or management activities, such as pest scouting, site-specific pesticide application, yield mapping, or variable-rate irrigation. May use computers to develop or analyze maps or remote sensing images to compare physical topography with data on soils, fertilizer, pests, or weather.</td>
</tr>
<tr>
<td></td>
<td>• Food Products &amp; Processing Systems</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Plant Systems</td>
<td></td>
</tr>
<tr>
<td>Biological Science Teachers, Postsecondary</td>
<td>• Natural Resources Systems</td>
<td>Teach postsecondary biological sciences courses. May also perform biological research and report findings.</td>
</tr>
<tr>
<td>Environmental Compliance Inspectors</td>
<td>• Environmental Service Systems</td>
<td>Investigate and evaluate situations to ensure that everyone follows environmental laws and regulations for licenses and permits.</td>
</tr>
<tr>
<td>Farm and Ranch Managers</td>
<td>• Agribusiness Systems</td>
<td>Plan, direct, or coordinate the management or operation of farms, ranches, greenhouses, aquacultural operations, nurseries, timber tracts, or other agricultural establishments. May hire, train, or supervise farm workers or contract for services to carry out the day-to-day activities of the managed operation. May engage in or supervise planting, cultivating, harvesting, financial, or marketing activities.</td>
</tr>
<tr>
<td></td>
<td>• Food Products &amp; Processing Systems</td>
<td></td>
</tr>
<tr>
<td>Environmental Scientists and Specialists</td>
<td>• Agribusiness Systems</td>
<td>Conduct research or perform investigation for the purpose of identifying, abating, or eliminating sources of pollutants or hazards that affect either the environment or the health of the population. Using knowledge of various scientific disciplines, may collect, synthesize, study, report, and recommend action based on data derived from measurements or observations of air, food, soil, water, and other sources.</td>
</tr>
<tr>
<td></td>
<td>• Food Products &amp; Processing Systems</td>
<td></td>
</tr>
<tr>
<td>Landscaping and Groundskeeping Workers</td>
<td>• Plant Systems</td>
<td>Landscape or maintain grounds of property using hand or power tools or equipment. Workers typically perform a variety of tasks, which may include any combination of the following: sod laying, mowing, trimming, planting, watering, fertilizing, digging, raking, sprinkler installation, and installation of mortarless segmental concrete masonry wall units.</td>
</tr>
<tr>
<td>Food Scientists and Technologists</td>
<td>• Agribusiness Systems</td>
<td>Research ways to make food safe, tasty, and healthy. Use sciences such as chemistry, microbiology, and engineering to study best ways to process foods and to understand why foods deteriorate. Analyze food to measure vitamins, fat, sugar, and protein. Discover new food sources.</td>
</tr>
<tr>
<td>Mobile Heavy Equipment Mechanics</td>
<td>• Power, Structural &amp; Technical Systems</td>
<td>Adjust, repair, or overhaul mobile equipment such as cranes, bulldozers, graders, and conveyors. Inspect and maintain vehicles and machinery.</td>
</tr>
<tr>
<td>Veterinary Technologists and Technicians</td>
<td>• Animal Systems</td>
<td>Help diagnose and treat animal diseases by performing medical tests in a laboratory under a veterinarian’s supervision. Prepare vaccines and tissue samples and take blood samples. Clean and sterilize instruments and maintain equipment and machines. May assist veterinarian during surgery.</td>
</tr>
<tr>
<td>Zoologists and Wildlife Biologists</td>
<td>• Animal Systems</td>
<td>Research animal and wildlife behaviors, diseases, genetics, and life processes. May collect and analyze biological data to assess and predict environmental impacts of land and water use.</td>
</tr>
<tr>
<td></td>
<td>• Natural Resources Systems</td>
<td></td>
</tr>
</tbody>
</table>

Source: Information about occupations, career pathways, job descriptions, and interests is from O*NET OnLine onetonline.org data for annual openings, growth, and wages are based on the statewide 2012-2022 Occupational Projections prepared by the New Mexico Department of Workforce Solutions at https://www.jobs.state.nm.us/vosnet/lmi/default.aspx?pu=1&plang=E.

2. Growth Plus Replacement Needs in NM includes the total number of jobs available due to growth and replacement needs per year.

3. The Occupational Employment Statistics OES program of the Bureau of Labor Statistics produces estimates of wages paid to employees in each occupation. These occupational wage estimates are either mean wages or percentiles. The mean of the first third of the wage distribution is used as a proxy for the entry wage. A percentile wage is a boundary. An occupational median wage (50th percentile) estimate is the boundary between the highest paid 50 percent and the lowest paid 50 percent of workers in that occupation. Half of the workers in each occupation earn more than the median wage, and half the workers earn less than the median wage.

4. Minimum Education Requirements for occupations are determined by the U.S. Bureau of Labor Statistics [http://www.bls.gov](http://www.bls.gov). High Education = Doctoral or Professional Degree, Master’s Degree, Bachelor’s Degree; Middle Education = Associate’s Degree, Postsecondary Certification; Low Education = Some College - No Degree, High School Diploma or Equivalent, Less than High School.

5. There are six interest types Realistic (R), Investigative (I), Artistic (A), Social (S), Enterprising (E), and Conventional (C). Discover your work-related interests on pages 5-8 to find out which types you are most like and the careers that best fit you.
Career Readiness Benchmarks for Agriculture Careers

The combined ACT WorkKeys skills benchmarks indicate that, across education groups, Level 4 is the lowest level of Locating Information and Reading for Information skills needed for the Agriculture career cluster. Additionally, all three education groups in the Agriculture career cluster require at least Level 5 for Applied Mathematics.

**Workforce Certifications Agriculture, Food & Natural Resources Career Cluster:**

*Note: Students successfully exiting a course of study in the Agriculture, Food and Natural Resources Cluster may be eligible to earn some or all of these certifications.*

- American Welding Society (AWS)
- National Center for Construction Education and Research (NCCER)
- NOCTI Horticulture Certification
- New Mexico Department of Agriculture: Meat/Dairy Animal Evaluation
- New Mexico Department of Agriculture: Companion Animal Care
- New Mexico Department of Agriculture: Plant Science
- New Mexico Department of Agriculture: Natural Resource Management
- New Mexico Department of Agriculture: Food Product Evaluation/Management
- New Mexico Department of Agriculture: Secondary Agriculture Business Management
- Landscape Irrigator License

**Recommended Fourth Year of Mathematics Courses**

- Agribusiness Systems Pathway - Statistics
- Animal Systems Pathway – Trigonometry
- Environmental Service Systems Pathway – Trigonometry
- Food Products and Processing Systems Pathway - Trigonometry
- Natural Resources Systems Pathway - Trigonometry
- Plant Systems Pathway - Trigonometry
- Power, Structural and Technical Systems - Trigonometry

High School Gets You Ready for College and Career

Common Career Technical Core for Agriculture, Food & Natural Resources Career Cluster:

1. Analyze the Interaction among Agriculture, Food, and Natural Resources (ANFR) systems.
2. Evaluate the nature and scope of the Agriculture, Food & Natural Resources job sector and the role of the contained jobs in order to comprehend large and small-scale economic impacts.
3. Examine and summarize the importance of health, safety and management systems in Agriculture, Food & Natural Resources businesses.
4. Demonstrate stewardship of natural resources in Agriculture, Food & Natural Resources activities.
5. Describe career opportunities and means to achieve those opportunities in each of the Agriculture, Food & Natural Resources pathways.
6. Analyze the interaction among Agriculture, Food & Natural Resources systems in the production, processing and management of food, fiber and fuel and the sustainable use of natural resources.

1. It is expected that a student completing any Programs of Study in this Career Cluster would transition to postsecondary college and career being able to know and do each of these Standards, unless otherwise noted.
2. The PED recommends the Program of Study here based on rigor of the course, quality curriculum and course resources, relevant to State workforce needs, and a capstone class, dual credit course, or AP course and exam.
3. It is expected that a student completing these Programs of Study would transition to postsecondary prepared for college and career.

Note: The course numbers are from the State Teacher Accountability Reporting System (STARS). Examine your school’s course catalog for corresponding course.
New York’s recently completed Freedom Tower took 10 years to build. Who designed and constructed it? You’re probably not surprised to learn that architects, civil engineers, construction laborers, cement masons, concrete finishers, and structural iron and steel workers participated in its development. You’ve also likely thought about the elevator installers and repairers who installed 73 elevators, or about the HVAC mechanics and installers, plumbers, and electricians who created a healthy environment inside the tallest building in the Western Hemisphere.

Think a bit more deeply and you’ll realize that cost estimators and operations research analysts used their mathematic and analytic skills to help make decisions about the nearly $4 billion spent to construct the building. People in management positions coordinated the work of specialty trade contractors to ensure they provided quality work in a timely manner.

While New Mexico may not build a skyscraper the size of the Freedom Tower any time soon, the state’s construction industry is expected to grow and show increases in the occupations mentioned above. These occupations require educational backgrounds that range from high school diplomas to graduate degrees. Workers may find employment with plumbing, heating and air conditioning contractors landscaping businesses; electrical contractors; federal, state, and local government; and commercial building companies.

## Core Skills

- Repairing
- Equipment Maintenance
- Installation
- Equipment Selection
- Operation & Control
- Troubleshooting
- Quality Control Analysis
- Technology Design
- Management of Material Resources

### Design/Pre-Construction Pathway

- Architects, Except Landscape and Naval
  - Civil Engineers; Civil Engineering Technicians; Architects, Except Landscape & Naval; Surveying & Mapping Technicians; Architectural & Civil Drafters; Other Engineers; Mechanical Drafters; Surveyors; Other Engineering Technicians; Electrical & Electronics Drafters; Cartographers & Photogrammerists; Landscape Architects
- Arts, Design, Entertainment, Sports & Media
  - Interior Designers
- Computer & Mathematical
  - Software Developers, Systems Software; Operations Research Analysts
- Education, Training & Library
  - Engineering Teachers, Postsecondary
- Management
  - Architectural & Engineering Managers
Construction Pathway

- **Architecture & Engineering**
  - Other Engineering Technicians

- **Cost Estimators**
  - Prepare cost estimates for product manufacturing, construction projects, or services to aid management in bidding on or determining price of product or service. May specialize according to particular service performed or type of product manufactured.

- **Construction Laborers**
  - Perform tasks involving physical labor at construction sites. May operate hand and power tools of all types: air hammers, earth tampers, cement mixers, small mechanical hoists, surveying and measuring equipment, and a variety of other equipment and instruments. May clean and prepare sites, dig trenches, set braces to support the sides of excavations, erect scaffolding, and clean up rubble, debris and other waste materials. May assist other craft workers.

- **Installation, Maintenance & Repair**
  - Maintenance & Repair Workers, General; Heating, Air Conditioning & Refrigeration Mechanics & Installers; Helpers – Installation, Maintenance & Repair Workers; Electrical Power–Line Installers & Repairers; Security & Fire Alarm System Installers; Electrical & Electronics Repairers; Powerhouse, Substation & Relay Riggers

- **Education, Training & Library**
  - Postsecondary Sociology Teachers

- **Life, Physical & Social Science**
  - Sociologists; Other Social Scientists & Related Workers

- **Management**
  - Construction Managers

- **Production**
  - Woodworking Machine Setters, Operators & Tenders, Except Sawing; Welding, Soldering & Brazing Machine Setters, Operators & Tenders; Structural Metal Fabricators & Fitters; Electromechanical Equipment Assemblers; Stationary Engineers & Boiler Operators

- **Transportation & Material Moving**
  - Excavating & Loading Machine & Dragline Operators; Crane & Tower Operators; Conveyor Operators & Tenders; Commercial Pilots; Railroad Conductors & Yardmasters

Maintenance/Operations Pathway

- **Building & Grounds Cleaning & Maintenance**
  - Landscaping & Groundskeeping Workers

- **Construction & Extraction**
  - Highway Maintenance Workers; Other Construction & Related Workers

- **Heating, Air Conditioning, and Refrigeration Mechanics and Installers**
  - Install or repair heating, central air conditioning, or refrigeration systems, including oil burners, hot-air furnaces, and heating stoves.

- **Production**
  - Stationary Engineers & Boiler Operators

</tbody>
</table>

2. Growth Plus Replacement Needs in NM includes the total number of jobs available due to growth and replacement needs per year.

3. The Occupational Employment Statistics OES program of the Bureau of Labor Statistics produces estimates of wages paid to employees in each occupation. These occupational wage estimates are either mean wages or percentiles. The mean of the first third of the wage distribution is used as a proxy for the entry wage. A percentile wage is a boundary. An occupational median wage (50th percentile) estimate is the boundary between the highest paid 50 percent and the lowest paid 50 percent of workers in that occupation. Half of the workers in each occupation earn more than the median wage, and half the workers earn less than the median wage.

4. Minimum Education Requirements for occupations are determined by the U.S. Bureau of Labor Statistics [http://www.bls.gov]. High Education = Doctoral or Professional Degree, Master’s Degree, Bachelor’s Degree; Middle Education = Associate’s Degree, Postsecondary Certification; Low Education = Some College - No Degree, High School Diploma or Equivalent, Less than High School.

5. There are six interest types Realistic (R), Investigative (I), Artistic (A), Social (S), Enterprising (E), and Conventional (C). Discover your work-related interests on pages 5-8 to find out which types you are most like and the careers that best fit you.
Career Readiness Benchmarks for Architecture and Construction Careers

The combined ACT WorkKeys skills benchmarks indicate that, across education groups, Level 4 is the lowest level of Locating Information and Reading for Information skills needed for Architecture and Construction careers. Additionally, all three education groups in the Architecture career cluster require at least Level 5 for Applied Mathematics.

<table>
<thead>

**Workforce Certifications for the Architecture and Construction Career Cluster:**

*Note: Students successfully exiting a course of study in the Architecture and Construction Cluster may be eligible to earn some or all of these certifications.*

**NCCER:**
- Pre apprenticeship
- Core
- Construction Technology

**NCCR:**
- Carpentry
- Electrical
- Construction Technology
- Masonry
- Plumbing

**Precision Exams Certifications:**
- Woodworking
- Cabinetmaking
- Carpentry

**Certport Assessment Certification:**
- Autodesk REVIT Architecture Certified User Heavy Line
- Inventor 2016 User
- AutoCAD 20169 User

**Recommended Fourth Year of Mathematics Courses**
- Design/Pre-Construction Pathway - Trigonometry or Pre-Calculus
- Construction Pathway - Construction Math or Statistics
- Maintenance/Operations Pathway - Construction Math or Statistics

High School Gets You Ready for College and Career

Common Career Technical Core for the Architecture and Construction Career Cluster¹:

1. Use vocabulary, symbols and formulas common to architecture and construction.
2. Use architecture and construction skills to create and manage a project.
3. Comply with regulations and applicable codes to establish and manage a legal and safe workplace.
4. Evaluate the nature and scope of the Architecture and Construction Career Cluster and the role of architecture and construction in society and the economy.
5. Describe the roles, responsibilities and relationships found in the architecture and construction trades and professions, including labor/management relationships.
6. Read, interpret and use technical drawings, documents and specifications to plan a project.
7. Describe career opportunities and means to achieve those opportunities in each of the Architecture and Construction Career Pathways.

¹. It is expected that a student completing any Programs of Study in this Career Cluster would transition to postsecondary college and career being able to know and do each of these Standards, unless otherwise noted.
². The PED recommends the Program of Study here based on rigor of the course, quality curriculum and course resources, relevant to State workforce needs, and a capstone class, dual credit course, or AP course and exam.
³. It is expected that a student completing these Programs of Study would transition to postsecondary prepared for college and career.

Note: The course numbers are from the State Teacher Accountability Reporting System (STARS). Examine your school’s course catalog for corresponding course.
Cultural and leisure activities help us balance our work and personal lives. In Arts, Audio/Video Technology and Communications, a great variety of people work to give us movies, paintings, music downloads, books, and museums. Actors, artists, musicians, writers, and archivists obviously make their living in jobs that are part of this cluster. Less evident are the employees who work in the background at occupations like set designers, agents and business managers, audio and video equipment technicians, print binding and finishing workers, and historians.

As in many clusters, technology has required workers to learn new skills. Lighting and sound systems are quite different than they were even a decade ago, providing new multi-media options for staging performances and exhibits. Publishers use technologies to create e-books that are far different from those used for print versions.

Most occupations in the Arts, Audio/Video Technology and Communications cluster are expected to show average or less growth in the next decade, but several careers do show strong growth. Among them are technical writers, telecommunications line installers and repairers, interior designers, and audio and video equipment technicians. However, in New Mexico, the Film and Television Industry continues to hire local talent for in front of the camera and especially behind the camera technical positions as well as film editing. Approximately two thirds of the careers in this industry require postsecondary education, particularly a bachelor’s degree. Industries that often have employment for this cluster’s workers include wired telecommunication companies, newspaper publishers (print and electronic), commercial printing companies, television stations, and electrical contractors.

¹. It is expected that a student completing any Programs of Study in this Career Cluster would transition to postsecondary college and career being able to know and do each of these Standards, unless otherwise noted.

². The PED recommends the Program of Study here based on rigor of the course, quality curriculum and course resources, relevant to State workforce needs, and a capstone class, dual credit course, or AP course and exam.

³. It is expected that a student completing these Programs of Study would transition to postsecondary prepared for college and career.

Note: The course numbers are from the State Teacher Accountability Reporting System (STARS). Examine your school’s course catalog for corresponding course.
In New Mexico, we are likely to see moderate new job growth in the Business Management and Administration career cluster in the next decade. Since almost any workplace benefits from strong leadership and organizational support, business and management occupations exist in all industries. Many of us value the peace of mind that comes from knowing that we have other options if we lose our current jobs. More than most clusters, business administration includes careers that move relatively easily from one industry or location to another. Recently, the U.S. Bureau of Labor Statistics listed a dozen careers that offer this kind of flexibility. The list included occupations from business management:

- Customer service representatives
- Secretaries and administrative assistants, except legal, medical, and executive
- General and operations managers
- General office clerks
- Accountants and auditors
- Management analysts
- Financial managers
- Human resources specialists
- Sales managers

Work environments match the functions of specific businesses. While

1. It is expected that a student completing any Programs of Study in this Career Cluster would transition to postsecondary college and career being able to know and do each of these Standards, unless otherwise noted.

2. The PED recommends the Program of Study here based on rigor of the course, quality curriculum and course resources, relevant to State workforce needs, and a capstone class, dual credit course, or AP course and exam.

3. It is expected that a student completing these Programs of Study would transition to postsecondary prepared for college and career.

Note: The course number are from the State Teacher Accountability Reporting System (STARS). Examine your school’s course catalog for corresponding course.
Lifelong learning is a phrase we hear often. Finishing high school and other necessary training is the first step toward getting a job, and keeping our jobs often requires that we continue to update our skills. To meet these ongoing training needs, education options have broadened to include online training. Technology like electronic textbooks, notebooks, and smart boards support classroom innovations while also requiring educators to upgrade their technology skills and teaching techniques.

Most occupations in the Education and Training cluster require at least a bachelor’s degree, with many postsecondary teaching professionals holding a doctoral or professional degree. Occupations with the most new jobs over the next 10 years are likely to include elementary, preschool, and middle school teachers. College-level health specialties teachers occupy the top position for highest estimated percentage increase in jobs.

Schedules for education workers vary by work setting. Preschool through high school employees work directly with students for approximately eight hours and often devote additional time at home to grading papers and planning lessons. Before- and after-school workers’ schedules revolve around times when students aren’t in class, and coaches may work directly with students for hours beyond the usual class schedule. Industries that tend to offer many jobs for workers in this cluster include public and private schools, colleges and universities, as well as day care centers.

² It is expected that a student completing any Program of Study in this Career Cluster would transition to postsecondary college and career being able to know and do each of these Standards, unless otherwise noted.

² The PED recommends the Program of Study here based on rigor of the course, quality curriculum and course resources, relevant to State workforce needs, and a capstone class, dual credit course, or AP course and exam.

³ It is expected that a student completing these Programs of Study would transition to postsecondary prepared for college and career.

Note: The course numbers are from the State Teacher Accountability Reporting System (STARS). Examine your school’s course catalog for corresponding course.
Money is an essential element in each of our lives. We entrust our financial well-being to people who safeguard bank accounts, provide loans, insure cars and homes, and help us make wise investments. Their math skills must be strong, and they must be precise, paying close attention to detail and keeping accurate records. Workers also need good communication skills in order to respond to questions and clearly explain information. They must be service oriented and sometimes work with people who are under stress about their finances.

Finance jobs exist in settings that range from banks to tax return centers to private offices. Most large organizations like hospitals have finance employees. While financial specialists usually have an 8 to 5 schedule, some workers’ schedules must accommodate their clients’ after work hours. Tax preparers have intense work times from the beginning of January until April 15.

In New Mexico, the majority of finance occupations require a high school education or a bachelor’s degree. The finance industry shows one of the highest rates of new jobs in the state, and occupations in the securities, commodities, and other financial investments sector should have some of the state’s highest average weekly wages. Likely places to find jobs include banks, corporate management offices, insurance agencies, insurance underwriting companies, and office of Certified Public Accountants.

2. Growth Plus Replacement Needs in NM includes the total number of jobs available due to growth and replacement needs per year.

3. The Occupational Employment Statistics OES program of the Bureau of Labor Statistics produces estimates of wages paid to employees in each occupation. These occupational wage estimates are either mean wages or percentiles. The mean of the first third of the wage distribution is used as a proxy for the entry wage. A percentile wage is a boundary. An occupational median wage (50th percentile) estimate is the boundary between the highest paid 50 percent and the lowest paid 50 percent of workers in that occupation. Half of the workers in each occupation earn more than the median wage, and half the workers earn less than the median wage.

4. Minimum Education Requirements for occupations are determined by the U.S. Bureau of Labor Statistics [http://www.bls.gov]. High Education = Doctoral or Professional Degree, Master’s Degree, Bachelor’s Degree; Middle Education = Associate’s Degree, Postsecondary Certification; Low Education = Some College - No Degree, High School Diploma or Equivalent, Less than High School.

5. There are six interest types Realistic (R), Investigative (I), Artistic (A), Social (S), Enterprising (E), and Conventional (C). Discover your work-related interests on pages 5-8 to find out which types you are most like and the careers that best fit you.

Government ensures that citizens have vital services that they might not otherwise be able to access. Government employees provide regulatory oversight and support for transportation, public safety, healthcare, education, utilities, and courts. In New Mexico, most government employees work for state or local governments. However, there are many opportunities for federal government jobs through a major presence of the National Research Laboratories and Department of Defense. Occupations in government mirror careers found in almost every industry. They range from a number of business, management, and administrative occupations to jobs related to construction and transportation.

Public work sector jobs typically require the same educational requirements as private sector occupations. Government employees’ work schedules and environments depend on workers’ specific jobs and at time on the size and level of government. This cluster includes desk jobs with regular eight hour workdays as well as outdoor work with varying schedules. While hiring practices for most government workers are similar to those in other sectors, some public sector employees are elected or appointed to their jobs.

2. Growth Plus Replacement Needs in NM includes the total number of jobs available due to growth and replacement needs per year.

3. The Occupational Employment Statistics OES program of the Bureau of Labor Statistics produces estimates of wages paid to employees in each occupation. These occupational wage estimates are either mean wages or percentiles. The mean of the first third of the wage distribution is used as a proxy for the entry wage. A percentile wage is a boundary. An occupational median wage (50th percentile) estimate is the boundary between the highest paid 50 percent and the lowest paid 50 percent of workers in that occupation. Half of the workers in each occupation earn more than the median wage, and half the workers earn less than the median wage.

4. Minimum Education Requirements for occupations are determined by the U.S. Bureau of Labor Statistics [http://www.bls.gov]. High Education = Doctoral or Professional Degree, Master’s Degree, Bachelor’s Degree; Middle Education = Associate’s Degree, Postsecondary Certification; Low Education = Some College - No Degree, High School Diploma or Equivalent, Less than High School.

5. There are six interest types Realistic (R), Investigative (I), Artistic (A), Social (S), Enterprising (E), and Conventional (C). Discover your work-related interests on pages 5-8 to find out which types you are most like and the careers that best fit you.
Career Readiness Benchmarks for Government & Public Administration Careers

The combined ACT WorkKeys skills benchmarks indicate that, across education groups, Level 4 is the lowest level of Locating Information and Applied Mathematics skills needed for Government and Public Administration careers. Additionally, all three education groups in the Government career cluster require at least Level 5 for Reading for Information.

High School Gets You Ready for College and Career

Common Career Technical Core for the Government & Public Administration Career Cluster¹:

1. Analyze the systemic relationships of government and public administration agencies.
2. Describe health, safety and environmental management systems, as well as policies and procedures, in government and public administration agencies.
3. Describe the implementation of plans and policies to respond to public health, safety and environmental needs in government and public administration agencies.
4. Describe career opportunities and the means to achieve those opportunities in each of the Government and Public Administration Career Pathways.
5. Explain the administration of human, financial, material and information resources in government and public administration agencies.

¹ It is expected that a student completing any Program of Studies in this Career Cluster would transition to postsecondary college and career being able to know and do each of these Standards, unless otherwise noted.

² The PED recommends the Program of Study here based on rigor of the course, quality curriculum and course resources, relevant to State workforce needs, and a capstone class, dual credit course, or AP course and exam.

³ It is expected that a student completing these Programs of Study would transition to postsecondary prepared for college and career.
Health Science

Where do medical technologies and human touch intersect? They meet within the Health Science career cluster, which is a New Mexico and national growth industry. As the proportion of Americans over age 65 grows and more people survive serious injuries and other health issues, the need for healthcare has increased. If you want to work in a cluster that has good job growth, this cluster may be for you. It is expected to include the greatest number of new jobs in New Mexico over the next 10 years and about one third of the state’s hot jobs.

Hospitals or doctors’ offices usually come to mind first when we think about healthcare workplaces, but home health care organizations and nursing homes also employ workers in this cluster. Some employees in this industry have 8 to 5 schedules, while others work less traditional shifts.

If you’re thinking about a healthcare career, many jobs require good math and science skills. Jobs in this industry include a wide variety of educational backgrounds, ranging from medical degrees to many jobs that require less than four years of college.

High School Gets You Ready for College and Career

Common Career Technical Core for the Health Science Career Cluster¹:

1. Determine academic subject matter, in addition to high school graduation requirements, necessary for pursuing a health science career.

2. Explain the healthcare worker’s role within their department, their organization, and the overall healthcare system.

3. Identify existing and potential hazards to clients, coworkers, visitors and self in the healthcare workplace.

4. Evaluate the roles and responsibilities of individual members as part of the healthcare team and explain their role in promoting the delivery of quality health care.

5. Analyze the legal and ethical responsibilities, limitations and implications of actions within the healthcare workplace.

6. Evaluate accepted ethical practices with respect to cultural, social and ethnic differences within the healthcare workplace.

When you pick up takeout food, eat in a restaurant or cafeteria, and enjoy food at catered events, you’re helping support the hospitality industry. If you travel and stay in a hotel, bed-and-breakfast, or RV park, the tourism industry benefits. Going to baseball games, casinos, and museums are other activities that contribute to this industry’s part of the economy.

As in most clusters, technology has changed how people work and serve customers. Some restaurants have recently decided to give customers tablets to use for ordering and paying for meals and for playing games while waiting to be served. Computer systems allow managers to track inventory and to set up worker schedules.

Hospitality and tourism occupations include many entry level positions. Although some management jobs require postsecondary education, a high school diploma is sufficient for a number of occupations. The work environment for these occupations varies according to job function. Kitchen employees work in hot, noisy surroundings while event planners may spend much of their time in an office. Tourism workers often have schedules that depend on their locations and on special events and seasons. Industries that tend to employ the highest number of hospitality and tourism workers include full-service and fast-food restaurants, hotels and motels, janitorial companies, and public schools.

2. Growth Plus Replacement Needs in NM includes the total number of jobs available due to growth and replacement needs per year.

3. The Occupational Employment Statistics OES program of the Bureau of Labor Statistics produces estimates of wages paid to employees in each occupation. These occupational wage estimates are either mean wages or percentiles. The mean of the first third of the wage distribution is used as a proxy for the entry wage. A percentile wage is a boundary. An occupational median wage (50th percentile) estimate is the boundary between the highest paid 50 percent and the lowest paid 50 percent of workers in that occupation. Half of the workers in each occupation earn more than the median wage, and half the workers earn less than the median wage.

4. Minimum Education Requirements for occupations are determined by the U.S. Bureau of Labor Statistics [http://www.bls.gov]. High Education = Doctoral or Professional Degree, Master’s Degree, Bachelor’s Degree; Middle Education = Associate’s Degree, Postsecondary Certification; Low Education = Some College - No Degree, High School Diploma or Equivalent, Less than High School.

5. There are six interest types Realistic (R), Investigative (I), Artistic (A), Social (S), Enterprising (E), and Conventional (C). Discover your work-related interests on pages 5-8 to find out which types you are most like and the careers that best fit you.
Career Readiness Benchmarks for Hospitality & Tourism Administration Careers

The combined ACT WorkKeys skills benchmarks indicate that, for the low education group, Level 4 is the lowest level of Locating Information, Applied Mathematics, and Reading for Information skills needed for Hospitality and Tourism careers. The scores shown for the middle education group is the average for the three careers listed for that category on p83.

1. It is expected that a student completing any Programs of Study in this Career Cluster would transition to postsecondary college and career being able to know and do each of these Standards, unless otherwise noted.

2. The PED recommends the Program of Study here based on rigor of the course, quality curriculum and course resources, relevant to State workforce needs, and a capstone class, dual credit course, or AP course and exam.

3. It is expected that a student completing these Programs of Study would transition to postsecondary prepared for college and career.
From customer service representatives to mental health counselors to hairdressers, human services workers provide a wide range of assistance to individuals and families. People who choose to work in this cluster usually have a deep desire to enrich and make life easier for others. The Personal Care & Service and Community & Social Services industries show the largest projected job growth rate in New Mexico over the next 10 years, and is among the top 10 for total numbers of new jobs during that time.

What kinds of services do human services customers need? They may benefit from rehabilitation therapy psychological assistance help with daily activities such as meal preparation or housekeeping, spiritual guidance or health education. Their needs have an impact on where workers provide services. Psychologists and Social and Community Service Managers are likely to work in office settings. Others, like clergy and social workers, may work part of the time in an office and also visit people at home.

Since the services provided in this industry vary greatly, workers in this cluster have educational backgrounds that range from high school diplomas to doctorates. They may also need credentials such as certifications and licenses. Day care centers, fitness and sports centers, social assistance organizations and local and state government tend to offer more human services jobs than other work settings.

## Selected Careers

<table>
<thead>
<tr>
<th>Occupation</th>
<th>Career Pathway</th>
<th>Job Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Child, Family, and School Social</td>
<td>• Family &amp; Community Services</td>
<td>Help children and their families solve and cope with problems by providing social services and assistance. Address problems like teenage pregnancy, misbehavior, and truancy in schools. May focus on ways to improve children's school performance and may also advise teachers.</td>
</tr>
<tr>
<td>Workers</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Childcare Workers</td>
<td>• Early Childhood Development &amp; Services</td>
<td>Take care of children at schools, businesses, private households, and childcare institutions. Perform a variety of tasks for children, like dressing, feeding, bathing, and overseeing play. May help children prepare for kindergarten or help older children with homework.</td>
</tr>
<tr>
<td>Healthcare Social Workers</td>
<td>• Counseling &amp; Mental Health Services</td>
<td>Give psychological and social support to individuals, families, and groups coping with chronic, acute, or terminal illnesses. May advise family caregivers, provide patient education and counseling, and make referrals for other services. May also provide care and case management or take actions to promote health, prevent disease, and help clients access healthcare.</td>
</tr>
<tr>
<td>Massage Therapists</td>
<td>• Personal Care Services</td>
<td>Perform therapeutic massages of soft tissues and joints. Relieve pain and stress, improve circulation, and aid in clients' general wellness. May help assess range of motion and muscle strength or propose client therapy plans.</td>
</tr>
<tr>
<td>Mental Health Counselors</td>
<td>• Counseling &amp; Mental Health Services</td>
<td>Help people manage and overcome mental and emotional disorders as well as problems with their family and relationships. Listen to clients and ask questions to help them understand their problems and develop strategies to improve their lives. May help individuals deal with issues like addictions and managing stress.</td>
</tr>
<tr>
<td>Mental Health and Substance</td>
<td>• Counseling &amp; Mental Health Services</td>
<td>Assess and treat individuals who have mental, emotional, or substance abuse problems, including alcohol, tobacco and/or drug abuse. Activities may include individual and group therapy, crisis intervention, case management, client advocacy, prevention, and education.</td>
</tr>
<tr>
<td>Abuse Social Workers</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Rehabilitation Counselors</td>
<td>• Counseling &amp; Mental Health Services</td>
<td>Help people with emotional and physical disabilities live independently. Coordinate activities for residents of care and treatment facilities. Assess client needs. Design and carry out rehabilitation programs that may include personal and career counseling, training, and job placement.</td>
</tr>
<tr>
<td>Preschool Teachers</td>
<td>• Early Childhood Development &amp; Services</td>
<td>Instruct preschool-aged children in activities designed to promote social, physical, and intellectual growth needed for primary school in preschool, day care center, or other child development facility. May be required to hold State certification.</td>
</tr>
<tr>
<td>Social and Human Service Assistants</td>
<td>• Family &amp; Community Services</td>
<td>Provide client services that help people get through difficult times or get extra support. May help clients find appropriate social and community services and benefits. May also help social workers develop, organize, and conduct programs to prevent or deal with substance abuse, relationships, or dependent care.</td>
</tr>
<tr>
<td>Fitness Trainers and Aerobics</td>
<td>• Family &amp; Community Services</td>
<td>Instruct or coach groups or individuals in exercise activities. Demonstrate techniques and form, observe participants, and explain to them corrective measures necessary to improve their skills.</td>
</tr>
<tr>
<td>Instructors</td>
<td></td>
<td></td>
</tr>

High School Gets You Ready for College and Career

Common Career Technical Core for Human Services Career Cluster¹:

1. Evaluate principles of planning, development, implementation and evaluation to accomplish long-range goals in the human services.

2. Evaluate the role of the family, community and human services in society and the economy.

3. Use effective communication with human services clients and their families.

4. Demonstrate ethical and legal conduct in human services settings.

5. Evaluate career opportunities in each of the Human Services Career Pathways.

6. Explain how human development principles enhance the well-being of individuals and families.

¹ It is expected that a student completing any Programs of Study in this Career Cluster would transition to postsecondary college and career being able to know and do each of these Standards, unless otherwise noted.

² The PED recommends the Program of Study here based on rigor of the course, quality curriculum and course resources, relevant to State workforce needs, and a capstone class, dual credit course, or AP course and exam.

³ It is expected that a student completing these Programs of Study would transition to postsecondary prepared for college and career.

Note: The course number are from the State Teacher Accountability Reporting System (STARS). Examine your school’s course catalog for corresponding course.
Maybe you used to shop more at the mall but now order things online. Smart electronics can give directions, and even turn on your oven while you’re out. You can push a button to start your car and immediately stop to move the bicycle that showed up in your backup camera. Who’s responsible for these tools?

Workers in the information technology (IT) industry develop the software and hardware that make our lives easier, and they fix and help us use these tools. As organizations and individuals face the threats and consequences of data theft, they need information security analysts to maintain online privacy. In New Mexico, this occupation has the highest expected percentage of new job growth in the IT career cluster. Because they occur in almost any industry, three IT occupations are likely to be among those that have the largest number of new jobs in New Mexico: applications software developers, computer user support specialists, and computer systems analysts.

All IT jobs are professional, and most new jobs will require postsecondary education. IT careers can be found in many work settings. The kinds of organizations most likely to employ more IT workers include custom computer programming companies; computer systems design companies; corporate and regional managing offices; software publishers and data processing and hosting businesses.

IT has changed the technical skills required in many occupations. While reducing the availability of some jobs, it has also produced totally new career options. As IT continues to evolve, we will need to keep pace with its changes in our workplaces.

2. Growth Plus Replacement Needs in NM includes the total number of jobs available due to growth and replacement needs per year.

3. The Occupational Employment Statistics OES program of the Bureau of Labor Statistics produces estimates of wages paid to employees in each occupation. These occupational wage estimates are either mean wages or percentiles. The mean of the first third of the wage distribution is used as a proxy for the entry wage. A percentile wage is a boundary. An occupational median wage (50th percentile) estimate is the boundary between the highest paid 50 percent and the lowest paid 50 percent of workers in that occupation. Half of the workers in each occupation earn more than the median wage, and half the workers earn less than the median wage.

4. Minimum Education Requirements for occupations are determined by the U.S. Bureau of Labor Statistics [http://www.bls.gov]. High Education = Doctoral or Professional Degree, Master’s Degree, Bachelor’s Degree; Middle Education = Associate’s Degree, Postsecondary Certification; Low Education = Some College - No Degree, High School Diploma or Equivalent, Less than High School.

5. There are six interest types Realistic (R), Investigative (I), Artistic (A), Social (S), Enterprising (E), and Conventional (C). Discover your work-related interests on pages 5-8 to find out which types you are most like and the careers that best fit you.
Career Readiness Benchmarks for Information Technology Careers

The combined ACT WorkKeys skills benchmarks indicate that, across education groups, Level 4 is the lowest level of Locating Information and Reading for Information skills needed for the occupations on the previous pages in the Information Technology career cluster.

High School Gets You Ready for College and Career

Common Career Technical Core for the Information Technology Career Cluster¹:

1. Demonstrate effective professional communication skills and practices that enable positive customer relationships.
2. Use product or service design processes and guidelines to produce a quality information technology (IT) product or service.
3. Demonstrate the use of cross-functional teams in achieving IT project goals.
4. Demonstrate positive cyber citizenry by applying industry-accepted ethical practices and behaviors.
5. Explain the implications of IT on business development.
6. Describe trends in emerging and evolving computer technologies and their influence on IT practices.
7. Perform standard computer backup and restore procedures to protect IT information.
8. Recognize and analyze potential IT security threats to develop and maintain security requirements.
9. Describe quality assurance practices and methods employed in producing and providing quality IT products and services.
10. Describe the use of computer forensics to prevent and solve information technology crimes and security.
11. Demonstrate knowledge of the hardware components associated with information systems.
12. Compare key functions and applications of software and determine maintenance strategies for computer systems.

102 • NEW MEXICO CAREER CLUSTERS GUIDE
When there’s something strange in your neighborhood, who are you going to call? Typically someone from this career cluster will respond to your request for help. These workers protect us from crime and other sources of harm like natural disasters. They help us receive fair treatment and get justice when we’ve been wronged. Some workers also set up and implement security plans.

If you pay attention to the evening news or watch television dramas, you’re aware of the most obvious occupations in this industry: police officers, fire fighters, and lawyers. Less apparent careers include hazardous material removal workers, ski patrol workers, and postsecondary educators who teach criminal justice, psychology, and anthropology classes. Occupations with faster than average growth in New Mexico include security guards, paralegals, and emergency medical technicians.

Work environments and educational backgrounds differ in these careers. Although some workers stay in offices most of the day, others work in the outdoors. For certain jobs, workers have to pass medical exams and demonstrate strength and agility. Some careers may be dangerous and require shift work, sometimes with long hours. Many of these jobs can be found at all levels of government, in law offices, and security businesses.

<td>Control and put out fires or respond to emergency situations where life, property, or the environment is at risk. Duties may include fire prevention, emergency medical service, hazardous material response, search and rescue, and disaster assistance.</td>
</tr>
<tr>
<td>Forest Fire Fighting and</td>
<td>Emergency &amp; Fire Management Services</td>
<td>Directly supervise and coordinate activities of workers engaged in firefighting and fire prevention and control.</td>
</tr>
<tr>
<td>Prevention Supervisors</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Forensic Science Technicians</td>
<td>Law Enforcement Services</td>
<td>Help investigate crimes by collecting and analyzing physical evidence. Many technicians specialize in either crime scene investigation or laboratory analysis. Most forensic science technicians spend some time writing reports.</td>
</tr>
<tr>
<td>Lawyers</td>
<td>Legal Services</td>
<td>Represent clients in criminal and civil court and other legal proceedings. Manage or advise clients on legal matters. Draw up legal documents. May specialize in a single area or practice in many areas of law.</td>
</tr>
<tr>
<td>Paralegals and Legal Assistants</td>
<td>Legal Services</td>
<td>Investigate facts, prepare legal documents, or research previous legal findings to assist lawyers. Conduct research to support a legal proceeding, build a defense, or start legal action.</td>
</tr>
<tr>
<td>Police Patrol Officers</td>
<td>Law Enforcement Services</td>
<td>Enforce laws to keep order and protect lives and property. May patrol a specific area, direct traffic, and issue traffic citations. Also may investigate accidents, apprehend and arrest suspects, or serve legal documents.</td>
</tr>
<tr>
<td>Forest and Conservation</td>
<td>Emergency &amp; Fire Management Services</td>
<td>Provide technical assistance regarding the conservation of soil, water, forests, or related natural resources. May compile data pertaining to size, content, condition, and other characteristics of forest tracts, under the direction of foresters; or train and lead forest workers in forest propagation, fire prevention and suppression. May assist conservation scientists in managing, improving, and protecting rangelands and wildlife habitats.</td>
</tr>

2. Growth Plus Replacement Needs in NM includes the total number of jobs available due to growth and replacement needs per year.
3. The Occupational Employment Statistics (OES) program of the Bureau of Labor Statistics produces estimates of wages paid to employees in each occupation. These occupational wage estimates are either mean wages or percentiles. The mean of the first third of the wage distribution is used as a proxy for the entry wage. A percentile wage is a boundary. An occupational median wage (50th percentile) estimate is the boundary between the highest paid 50 percent and the lowest paid 50 percent of workers in that occupation. Half of the workers in each occupation earn more than the median wage, and half the workers earn less than the median wage.
4. Minimum Education Requirements for occupations are determined by the U.S. Bureau of Labor Statistics [http://www.bls.gov]. High Education = Doctoral or Professional Degree, Master’s Degree, Bachelor’s Degree; Middle Education = Associate’s Degree, Postsecondary Certification; Low Education = Some College - No Degree, High School Diploma or Equivalent, Less than High School.
5. There are six interest types Realistic (R), Investigative (I), Artistic (A), Social (S), Enterprising (E), and Conventional (C). Discover your work-related interests on pages 5-8 to find out which types you are most like and the careers that best fit you.

High School Gets You Ready for College and Career

Common Career Technical Core for Human Services Career Cluster:

1. Analyze the nature and scope of the Law, Public Safety, Corrections and Security Career Cluster and the role law, public safety, corrections and security play in society and the economy.

2. Formulate ideas, proposals and solutions to ensure effective and efficient delivery of law, public safety, corrections and/or security services.

3. Assess and implement measures to maintain safe and healthy working conditions in a law, public safety, corrections and/or security environment.

4. Conduct law, public safety, corrections and security work tasks in accordance with employee and employer rights, obligations and responsibilities, including occupational safety and health requirements.

5. Analyze the various laws, ordinances, regulations and organizational rules that apply to careers in law, public safety, corrections and security.

6. Describe various career opportunities and means to those opportunities in each of the Law, Public Safety, Corrections and Security Career Pathways.

1. It is expected that a student completing any Programs of Study in this Career Cluster would transition to postsecondary college and career being able to know and do each of these Standards, unless otherwise noted.

2. The PED recommends the Program of Study here based on rigor of the course, quality curriculum and course resources, relevant to State workforce needs, and a capstone class, dual credit course, or AP course and exam.

3. It is expected that a student completing these Programs of Study would transition to postsecondary prepared for college and career.

Note: The course numbers are from the State Teacher Accountability Reporting System (STARS). Examine your school’s course catalog for corresponding course.
Although manufacturing often brings to mind huge, wide open factory floors, it also includes small businesses. Manufacturing businesses can range from in-home bakeries to large corporations like Intel. One thing most manufacturing businesses have in common: increasing use of technology. From roastmasters who use programmable coffee roasting machines to industrial engineering technicians who operate 3-D printers that make metal parts, manufacturing is quite different than it was even a decade ago.

Manufacturing workers change materials, substances, or components into new products. Manufactured goods include or are made from chemicals, computers and electronics, fabricated metal products, food, machinery, plastics and rubber products, or transportation equipment. While businesses still hire workers for traditional mass production of simple products, manufacturing jobs increasingly use technologies that enable workers to customize, shorten production time, and create lighter weight, more durable products.

Manufacturing includes occupations with a variety of education and experience backgrounds, but job numbers have been decreasing in occupations that require the least amount of education. New Mexico’s growth careers in manufacturing often involve installing, maintaining, and repairing increasingly technical equipment. Industries most likely to hire this cluster’s workers include Computer & Electronic Product, chemical and non-metal, and food and beverage manufacturers.

  Industrial Production Managers

- **Office & Administrative Support**
  Weighers, Measurers, Checkers & Samplers, Recordkeeping

- **Production**
  Team Assemblers; First-Line Supervisors of Production & Operating Workers; Inspectors, Testers, Sorters, Samplers, & Weighers; Helpers – Production Workers; Packaging & Filling Machine Operators & Tenders; Machinists; Welders, Cutters, Solderers & Brazers; Bakers; Mixing & Blending Machine Setters, Operators & Tenders; Computer-Controlled

- **Transportation & Material Moving**
  Machine Feeders & Offbearers
## Selected Careers

<table>
<thead>
<tr>
<th>Occupation</th>
<th>Career Pathway</th>
<th>Job Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maintenance and repair workers</td>
<td>Maintenance, Installation &amp; Repair</td>
<td>Perform work involving the skills of two or more maintenance or craft occupations to keep machines, mechanical equipment, or the structure of an establishment in repair. Duties may involve pipe fitting; boiler making; insulating; welding; machining; carpentry; repairing electrical or mechanical equipment; installing, aligning, and balancing new equipment; and repairing buildings, floors, or stairs.</td>
</tr>
<tr>
<td>Computer-Controlled Machine Tool Operators,</td>
<td>Production</td>
<td>Operate computer-controlled machines or robots to cut, shape, and form metal or plastic materials.</td>
</tr>
<tr>
<td>Metal and Plastic</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Industrial Machinery Mechanics</td>
<td>Maintenance, Installation &amp; Repair</td>
<td>Repair, install, adjust, or maintain machinery used in industrial production and processing. Provide similar services for refinery and pipeline distribution systems.</td>
</tr>
<tr>
<td>Machinists</td>
<td>Production</td>
<td>Set up and operate machine tools to produce precision parts and instruments. Includes precision instrument makers who make, modify, or repair mechanical instruments. Use knowledge of mechanics, mathematics, metal properties, layout, and machining procedures to perform work.</td>
</tr>
<tr>
<td>Environmental Science and Protection Technicians, Including Health</td>
<td>Manufacturing Production Process Development</td>
<td>Perform laboratory and field tests to monitor the environment and investigate sources of pollution, including those that affect health, under the direction of an environmental scientist, engineer, or other specialist. May collect samples of gases, soil, water, and other materials for testing.</td>
</tr>
<tr>
<td>Inspectors, Testers, Sorters, Samplers, and Weighers</td>
<td>Quality Assurance</td>
<td>Inspect, test, sort, sample, or weigh nonagricultural raw materials or processed, machined, fabricated, or assembled parts or products for defects, wear, and deviations from specifications. May use precision measuring instruments and complex test equipment.</td>
</tr>
<tr>
<td>Occupational Health and Safety Specialists</td>
<td>Quality Assurance</td>
<td>Analyze many types of work environments and work procedures. Inspect workplaces to make sure regulations on safety, health, and the to prevent disease or injury to workers and damage to the environment.</td>
</tr>
<tr>
<td>Sheet Metal Workers</td>
<td>Production</td>
<td>Fabricate, assemble, install, and repair sheet metal products and equipment like ducts for heating and air-conditioning, control boxes, and drainpipes.</td>
</tr>
<tr>
<td>Electrical Engineering Technicians</td>
<td>Production</td>
<td>Lay out, build, test, troubleshoot, repair, and modify electronic components, parts, equipment, and systems, such as computer equipment, test equipment, and machine tool numerical controls, applying principles and theories of electronics, electrical circuitry, engineering mathematics, electronic and electrical testing, and physics.</td>
</tr>
<tr>
<td>Welders, Cutters, Solderers, and Brazers</td>
<td>Production</td>
<td>Weld or join metal parts using hand welding, flame cutting, hand soldering, or brazing equipment. Fill holes, indentations, or seams of fabricated metal products.</td>
</tr>
</tbody>
</table>

High School Gets You Ready for College and Career

**Common Career Technical Core for the Manufacturing Career Cluster¹:**

1. Evaluate the nature and scope of the Manufacturing Career Cluster and the role of manufacturing in society and in the economy.

3. Comply with federal, state and local regulations to ensure worker safety and health and environmental work practices.

4. Describe career opportunities and means to achieve those opportunities in each of the Manufacturing Career Pathways.

5. Describe government policies and industry standards that apply to manufacturing.

6. Demonstrate workplace knowledge and skills common to manufacturing.

Marketing, Sales & Service

Who helps form your first opinion of a business or other organization? First impressions count, so employees from hotel desk clerks to cashiers to property managers serve as important marketers. Marketing, Sales and Service also includes jobs that have a more obvious connection with marketing such as marketing managers and merchandise displayers and window trimmers. The main goal of employees in this cluster is to help their organization reach its objectives.

Among New Mexico’s occupations with expected above average growth are customer service representatives, market research analysts, and meeting, convention, and event planners. Retail salespersons top the list of the highest number of new jobs. While many workers in the Marketing, Sales and Service cluster need a high school education, careers that require an Associate or Bachelor’s degree tend to have higher wages. Workplaces that are most likely to offer marketing positions include grocery stores, warehouse clubs, gasoline stations with convenience stores, home centers, and wholesale goods businesses.

The work environment for these occupations varies by job responsibilities. While some workers have desk jobs and regular weekday schedules, others will need to be on their feet most of the me. Work in marketing and advertising can involve long work hours with pressure to be creative within short time frames to meet deadlines. People who work in this industry need strong persuasive and customer service skills.

<thead>
<tr>
<th>Occupation</th>
<th>Career Pathway</th>
<th>Job Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Advertising and Promotions Managers</td>
<td>• Management &amp; Entrepreneurship</td>
<td>Plan, direct, or coordinate advertising policies and programs or produce collateral materials, such as posters, contests, coupons, or giveaways to create extra interest in the purchase of a product or service.</td>
</tr>
<tr>
<td>Customer Service Representatives</td>
<td>• Buying &amp; Merchandising</td>
<td>Interact with customers to provide information in response to inquiries about products and services and to handle and resolve complaints.</td>
</tr>
<tr>
<td>Supervisors of Non-Retail Sales Workers</td>
<td>• Professional Sales &amp; Marketing</td>
<td>Directly supervise and coordinate activities of sales workers who are not involved in retail sales. May also perform duties like budgeting, accounting, and personnel work.</td>
</tr>
<tr>
<td>Market Research Analysts and Marketing Specialists</td>
<td>• Marketing Information Management &amp; Research</td>
<td>Research market conditions in local, regional, or national areas. Gather information to determine potential sales of a product or service or create a marketing campaign. May gather information about competitors, prices, sales, and methods of marketing and distribution.</td>
</tr>
<tr>
<td>Marketing Managers</td>
<td>• Management &amp; Entrepreneurship</td>
<td>Plan, direct, or coordinate marketing programs that generate interest in a specific product. Determine demand for products and services and monitor market trends. May identify potential customers. Develop pricing plans that maximize firm’s profits while also keeping customers satisfied.</td>
</tr>
<tr>
<td>Retail Salespersons</td>
<td>• Professional Sales &amp; Marketing</td>
<td>Sell merchandise, such as furniture, motor vehicles, appliances, or apparel to consumers</td>
</tr>
<tr>
<td>Supervisors of Retail Sales Workers</td>
<td>• Professional Sales &amp; Marketing</td>
<td>Directly supervise and coordinate activities of retail sales workers in an establishment or department. Duties may include management functions, such as purchasing, budgeting, accounting, and personnel work, in addition to supervisory duties.</td>
</tr>
<tr>
<td>Sales Managers</td>
<td>• Management &amp; Entrepreneurship</td>
<td>Set sales goals, analyze data, and develop training programs for organizations’ sales representatives. Coordinate sales distribution by setting up sales territories. Determine sales potential and inventory needs. Monitor customer preferences.</td>
</tr>
<tr>
<td>Sales Representatives, Wholesale and Manufacturing, Technical and Scientific Products</td>
<td>• Professional Sales &amp; Marketing</td>
<td>Sell goods for wholesalers or manufacturers using technical or scientific knowledge of fields like biology, engineering, chemistry, and electronics. Contact customers, explain product features, answer customers’ questions, and negotiate prices.</td>
</tr>
<tr>
<td>Search Marketing Strategists</td>
<td>• Professional Sales &amp; Marketing</td>
<td>Employ search marketing tactics to increase visibility and engagement with content, products, or services in Internet-enabled devices or interfaces. Examine search query behaviors on general or specialty search engines or other Internet-based content. Analyze research, data, or technology to understand user intent and measure outcomes for ongoing optimization.</td>

2. Growth Plus Replacement Needs in NM includes the total number of jobs available due to growth and replacement needs per year.

3. The Occupational Employment Statistics OES program of the Bureau of Labor Statistics produces estimates of wages paid to employees in each occupation. These occupational wage estimates are either mean wages or percentiles. The mean of the first third of the wage distribution is used as a proxy for the entry wage. A percentile wage is a boundary. An occupational median wage (50th percentile) estimate is the boundary between the highest paid 50 percent and the lowest paid 50 percent of workers in that occupation. Half of the workers in each occupation earn more than the median wage, and half the workers earn less than the median wage.

4. Minimum Education Requirements for occupations are determined by the U.S. Bureau of Labor Statistics [http://www.bls.gov]. High Education = Doctoral or Professional Degree, Master’s Degree, Bachelor’s Degree; Middle Education = Associate’s Degree, Postsecondary Certification; Low Education = Some College - No Degree, High School Diploma or Equivalent, Less than High School.

5. There are six interest types Realistic (R), Investigative (I), Artistic (A), Social (S), Enterprising (E), and Conventional (C). Discover your work-related interests on pages 5-8 to find out which types you are most like and the careers that best fit you.
### Career Readiness Benchmarks for Marketing Careers

The combined ACT WorkKeys skills benchmarks indicate that, across the low and high education groups, Level 5 is the lowest level of Locating Information, Applied Mathematics, and Reading for Information skills needed for Marketing careers. The scores shown for the middle education group is the average for the three careers listed for that category on p122.

<table>

High School Gets You Ready for College and Career

**Common Career Technical Core for Marketing Career Cluster:***

1. Describe the impact of economics, economics systems and entrepreneurship on marketing.
2. Implement marketing research to obtain and evaluate information for the creation of a marketing plan.
3. Plan, monitor, manage and maintain the use of financial resources for marketing activities.
4. Plan, monitor and manage the day-to-day activities required for continued marketing business operations.
5. Describe career opportunities and the means to achieve those opportunities in each of the Marketing Career Pathways.
6. Select, monitor and manage sales and distribution channels.
7. Determine and adjust prices to maximize return while maintaining customer perception of value.
8. Obtain, develop, maintain and improve a product or service mix in response to market opportunities.
9. Communicate information about products, services, images and/or ideas to achieve a desired outcome.
10. Use marketing strategies and processes to determine and meet client needs and wants.

---

1. It is expected that a student completing any Programs of Study in this Career Cluster would transition to postsecondary college and career being able to know and do each of these Standards, unless otherwise noted.
2. The PED recommends the Program of Study here based on rigor of the course, quality curriculum and course resources, relevant to State workforce needs, and a capstone class, dual credit course, or AP course and exam.
3. It is expected that a student completing these Programs of Study would transition to postsecondary prepared for college and career.

Note: The course numbers are from the State Teacher Accountability Reporting System (STARS). Examine your school’s course catalog for corresponding course.
The Science, Technology, Engineering, and Mathematics STEM career cluster includes as many as 184 occupations. What do they have in common? Workers in these careers use scientific, technological, engineering, and or mathematical processes to do research and solve problems. The problems they approach are as different as growing enough food, reducing our reliance on fossil fuels, developing medicines to treat mental illness, and creating computers that enhance our lives. Their career focus can be as small as a nanoparticle or as large as the universe.

Work settings vary with the topic of STEM research. While some jobs take place in front of a computer or in a laboratory, others require people to work in outdoor environments. Schedules also depend on the focus of STEM workers’ research. Some individuals have very regular hours, but others’ schedules depend upon availability of the subject they analyze. Employers who are likely to hire STEM qualified workers include engineering companies; the federal, state, and local government; scientific research companies; colleges and universities; and medical device manufacturers.

More than any of the other clusters, many STEM careers require at least an Associates degree or higher. Most occupations require a bachelor’s degree, and some workers need master’s or doctoral level credentials for a significant number of jobs. Typical educational backgrounds for entry into five occupations that are projected to have the most new jobs in New Mexico include:

- Market Research Analysts and Marketing Specialists - Bachelor’s degree
- Applications Software Developers - Bachelor’s degree
- Computer User Support Specialists – Some college, no degree
- Health Specialties Teachers - Doctoral or professional degree
- Civil Engineers – Bachelor’s degree

## Selected Careers

<table>
<thead>
<tr>
<th>Occupation</th>
<th>Career Pathway</th>
<th>Job Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mechanical Engineers</td>
<td>• Engineering &amp; Technology</td>
<td>Perform engineering duties in planning and designing tools, engines, machines, and other mechanically functioning equipment. Oversee installation, operation, maintenance, and repair of equipment such as centralized heat, gas, water, and steam systems.</td>
</tr>
<tr>
<td>Chemical Technicians</td>
<td>• Science &amp; Math</td>
<td>Use special tools and techniques to do chemical and physical laboratory tests that help scientists analyze solids, liquids and gaseous materials. Results are used for further research and for making new products or processes. Testing also helps with quality control and maintaining environmental standards.</td>
</tr>
<tr>
<td>Civil Engineering Technicians</td>
<td>• Engineering &amp; Technology</td>
<td>Apply theory and principles of civil engineering in planning, designing, and overseeing construction and maintenance of structures and facilities under the direction of engineering staff or physical scientists.</td>
</tr>
<tr>
<td>Civil Engineers</td>
<td>• Engineering &amp; Technology</td>
<td>Use engineering skills to plan, design, and oversee construction and maintenance of buildings and facilities. Project examples include roads, railroads, airports, bridges, harbors, channels, dams, irrigation projects, pipelines, power plants, and water and sewage systems.</td>
</tr>
<tr>
<td>Electrical Engineering Technicians</td>
<td>• Engineering &amp; Technology</td>
<td>Use electrical and electronic knowledge to help engineers design and develop products like computers, communications equipment, and medical monitoring devices. May design, build, repair, adjust, and modify electrical components, circuitry, controls, and machinery.</td>
</tr>
<tr>
<td>Electrical Engineers</td>
<td>• Engineering &amp; Technology</td>
<td>Research, design, develop, test, or supervise the manufacture and installation of electrical equipment like electric motors, radar and navigation systems, and power generation equipment. Equipment may be used for commercial, industrial, military, or scientific purposes.</td>
</tr>
<tr>
<td>Photonics Engineers</td>
<td>• Engineering &amp; Technology</td>
<td>Research, design, develop, or test electronic components and systems for commercial, industrial, military, or scientific use employing knowledge of electronic theory and materials properties. Design electronic circuits and components for use in fields such as telecommunications, aerospace guidance and propulsion control, acoustics, or instruments and controls.</td>
</tr>
<tr>
<td>Physicists</td>
<td>• Science &amp; Math</td>
<td>Conduct research into physical phenomena, develop theories on the basis of observation and experiments, and devise methods to apply physical laws and theories.</td>
</tr>
<tr>
<td>Medical Scientists</td>
<td>• Science &amp; Math</td>
<td>Conduct research aimed at improving overall human health. Engage in clinical trials, research and development, or related activities. Includes physicians, dentists, public health specialists, pharmacologists, and medical pathologists who focus on research.</td>
</tr>
<tr>
<td>Statisticians</td>
<td>• Science &amp; Math</td>
<td>Use mathematical or statistical theory and methods to collect, organize, interpret, and summarize numerical data to provide accurate information. May specialize in fields such as bio-statistics, agricultural statistics, business statistics, or economic statistics. Includes mathematical and survey statisticians.</td>
</tr>
</tbody>

High School Gets You Ready for College and Career

**Common Career Technical Core for Science, Technology, Engineering & Mathematics Career Cluster¹:**

1. Apply engineering skills in a project that requires project management, process control and quality assurance.

2. Use technology to acquire, manipulate, analyze and report data.

3. Describe and follow safety, health and environmental standards related to science, technology, engineering and mathematics (STEM) workplaces.

4. Understand the nature and scope of the STEM Career Cluster and the role of STEM in society and the economy.

5. Demonstrate an understanding of the breadth of career opportunities and means to those opportunities in each of the STEM Career Pathways.

6. Demonstrate technical skills needed in a chosen STEM field.

¹ It is expected that a student completing any Programs of Study in this Career Cluster would transition to postsecondary college and career being able to know and do each of these Standards, unless otherwise noted.

² The PED recommends the Program of Study here based on rigor of the course, quality curriculum and course resources, relevant to State workforce needs, and a capstone class, dual credit course, or AP course and exam.

³ It is expected that a student completing these Programs of Study would transition to postsecondary prepared for college and career.

Note: The course numbers are from the State Teacher Accountability Reporting System (STARS). Examine your school’s course catalog for corresponding course.
Transportation keeps our economy, people, and products moving. Occupations involved in transporting, distributing, and coordinating the movement of goods range from airline pilots to mechanics to logisticians. Additionally, this cluster includes occupations related to warehouse storage, including jobs like cargo and freight agents; supervisors; and non-emergency dispatchers.

The majority of this career cluster’s work takes place on the ground via highways and railroads, but it also includes workers who move people and products over the water and through the air. Work environments vary by occupation. While some truck drivers may work long hours and travel large distances, people who work in warehouses are more likely to work eight hour shifts. Physical strength is necessary for some jobs, while word processing and spreadsheet skills are priorities in other occupations.

For the Transportation, Distribution and Logistics career cluster, the greatest number of new jobs in New Mexico are projected to include heavy and tractor-trailer truck drivers; freight laborers, stock, and material movers; operating engineers and other construction equipment operators; and heavy diesel mechanics. Many jobs require a high school education, but postsecondary education, usually no higher than a bachelor’s degree, is needed for some occupations. Workers may often find jobs in temporary service agencies, long distance freight trucking businesses, new car dealerships, warehouse and storage facilities, and express delivery companies.

<thead>
<tr>
<th>Occupation</th>
<th>Career Pathway</th>
<th>Job Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Air Traffic Controllers</td>
<td>• Transportation Operations</td>
<td>Coordinate air traffic to make sure aircraft stay safe distances apart. Authorize, regulate, and control commercial airline flights following government or company regulations for safe and efficient flight.</td>
</tr>
<tr>
<td>Aircraft Mechanics and Service Technicians</td>
<td>• Facility &amp; Mobile Equipment Maintenance</td>
<td>Diagnose, adjust, repair, or overhaul aircraft engines and assemblies like hydraulic and pneumatic systems. Includes helicopter and aircraft engine specialists.</td>
</tr>
<tr>
<td>Automotive Service Technicians and Mechanics</td>
<td>• Transportation Operations</td>
<td>Inspect, diagnose problems, adjust, repair, or overhaul automotive vehicles.</td>
</tr>
<tr>
<td>Bus and Truck Mechanics &amp; Diesel Engine Specialists</td>
<td>• Transportation Operations</td>
<td>Diagnose, adjust, repair, or overhaul buses and trucks, or maintain and repair any type of diesel engines. Includes mechanics working primarily with automobile or marine diesel engines.</td>
</tr>
<tr>
<td>Cargo and Freight Agents</td>
<td>• Sales and Service • Warehousing &amp; Distribution Center Operations</td>
<td>Direct movement of cargo and freight shipments in airline, train, and trucking terminals and shipping docks. Take orders from customers and arrange pickup and delivery of products. Prepare and examine documents to determine shipping charges and tariffs.</td>
</tr>
<tr>
<td>Light Truck or Delivery Services Driver</td>
<td>• Transportation Operations</td>
<td>Drive a light vehicle, such as a truck or van, with a capacity of less than 26,000 pounds Gross Vehicle Weight (GVW), primarily to deliver or pick up merchandise or to deliver packages. May load and unload vehicle.</td>
</tr>
<tr>
<td>Supervisors of Transportation and Material-Moving Machine and Vehicle Operators</td>
<td>• Warehousing &amp; Distribution Center Operations • Transportation Operations</td>
<td>Directly supervise and coordinate activities of transportation and material-moving machine and vehicle operators and helpers.</td>
</tr>
<tr>
<td>Heavy and Tractor-Trailer Truck Drivers</td>
<td>• Transportation Operations</td>
<td>Transport goods by driving a tractor-trailer combination or a truck with a capacity of at least 26,000 pounds Gross Vehicle Weight (GVW). May need to unload truck. Requires commercial driver's license.</td>
</tr>
<tr>
<td>Industrial Safety and Health Engineers</td>
<td>• Health, Safety &amp; Environmental Management</td>
<td>Plan, implement, and coordinate safety programs, requiring application of engineering principles and technology, to prevent or correct unsafe environmental working conditions.</td>
</tr>
<tr>
<td>Logisticians</td>
<td>• Logistics Planning &amp; Management Services</td>
<td>Analyze and coordinate an organization’s system that moves a product from supplier to consumer. Manage the entire life cycle of a product, which includes how a product is acquired, distributed, allocated, and delivered.</td>
</tr>

2. Growth Plus Replacement Needs in NM includes the total number of jobs available due to growth and replacement needs per year.
3. The Occupational Employment Statistics OES program of the Bureau of Labor Statistics produces estimates of wages paid to employees in each occupation. These occupational wage estimates are either mean wages or percentiles. The mean of the first third of the wage distribution is used as a proxy for the entry wage. A percentile wage is a boundary. An occupational median wage (50th percentile) estimate is the boundary between the highest paid 50 percent and the lowest paid 50 percent of workers in that occupation. Half of the workers in each occupation earn more than the median wage, and half the workers earn less than the median wage.
4. Minimum Education Requirements for occupations are determined by the U.S. Bureau of Labor Statistics [http://www.bls.gov]. High Education = Doctoral or Professional Degree, Master's Degree, Bachelor's Degree; Middle Education = Associate's Degree, Postsecondary Certification; Low Education = Some College - No Degree, High School Diploma or Equivalent, Less than High School.
5. There are six interest types Realistic (R), Investigative (I), Artistic (A), Social (S), Enterprising (E), and Conventional (C). Discover your work-related interests on pages 5-8 to find out which types you are most like and the careers that best fit you.
Career Readiness Benchmarks for Transportation, Distribution & Logistics Careers

The combined ACT WorkKeys skills benchmarks indicate that, across education groups, Level 3 is the lowest level of Applied Mathematics and Reading for Information skills needed for the occupations on the previous pages in this career cluster.

High School Gets You Ready for College and Career

Common Career Technical Core for Transportation, Distribution & Logistics Career Cluster:

1. Describe the nature and scope of the Transportation, Distribution and Logistics Career Cluster and the role of transportation, distribution and logistics in society and the economy.

2. Describe the application and use of new and emerging advanced techniques to provide solutions for transportation, distribution and logistics problems.

3. Describe the key operational activities required of successful transportation, distribution and logistics facilities.

4. Identify governmental policies and procedures for transportation, distribution and logistics facilities.

5. Describe transportation, distribution and logistics employee rights and responsibilities and employer’s obligations concerning occupational safety and health.

6. Describe career opportunities and means to achieve those opportunities in each of the Transportation, Distribution and Logistics Career Pathways.

Experiencing Real Jobs

Getting experience while exploring career options will give you a head start on your future career. Take advantage of opportunities to "try out" a career through work-based learning programs, summer or part-time jobs, or as a community volunteer. Your local school or college will offer some or all of the programs noted here. You’ll find others by searching the Internet and by contacting community businesses and organizations. Work-based learning is also helpful if you want or need to change careers.

Here are a few ways you can get involved in work-based learning:

- **Job Shadowing** programs usually involve going to work for one or several days with someone whose career interests you. You can observe tasks and skills required for the job, experience the work environment, and interact with people who currently work in your potential career field.

- **Internships and Cooperative Education** experiences usually last for a couple of weeks to several months. You not only observe individuals in your career field of interest, but also get a chance to perform some of the job’s tasks and duties. Internships and Cooperative Education include mentoring by an experienced career professional who can discuss your career decisions and goals. Internships can be paid or unpaid, but Cooperative Education is an activity that must provide pay. Either program may be eligible for academic credit at a high school or college.

- **School-Based Enterprises** allow you to plan and run a simulated or actual business at school. It’s an experience that provides direct links between what you learn in the classroom and what it’s like to work in an actual job.

- **Apprenticeships** offer combined academic instruction, structured training, and paid work experience that usually last for one to two years. Employers offer these programs in collaboration with the New Mexico Department of Commerce.

- **Service Learning** can be a great way to learn about a career and help out your community while developing new skills or applying existing skills. You will see how the services you provide connect with what you’ve learned in classes.

- **Business/Industry Field Trips** are opportunities to leave the classroom to see how what you’ve learned applies in workplaces. You can observe and investigate activities that relate to a specific school subject and to your career plans.

Work-based learning opportunities give you the edge when applying for new jobs. Not only will you gain valuable work experience, but you’ll also meet people who can become part of your career network. They may be your best resource for meeting potential employers and other people who can provide job referrals. You’ll also find that these experiences can improve the quality of your resume!
Exploring the Job Market

Specific job requirements change from industry to industry, business to business, and hiring manager to hiring manager. Whether you’re still planning your future career or getting ready to enter the job market, getting a well-rounded understanding of what employers are looking for in job candidates is always helpful. The more research you do in understanding job and employer requirements and preparing yourself to meet those needs, the better positioned you will be to land your dream job. Some steps you can take include:

- **Read job postings** – Get online and search to find what kinds of jobs are out there. Places to start include jobs.state.nm.us, www.Indeed.com, and LinkedIn.com/Jobs.

- **Research the occupation** – Make sure you understand the occupation and its potential. The Bureau of Labor Statistics’ Occupational Outlook Handbook (www.bls.gov/ooh) and CareerOneStop (www.careerinfonet.org/Occupations) have thorough descriptions of hundreds of occupations with data on wages and job growth.

- **Research the industry that interests you** – Whether you’re preparing for an interview or just trying to better understand a career, learn what you can about the business’s industry or occupations. By doing this, you will gain understanding of the opportunities and challenges in this field. Is it growing and successful? Are global or technological changes likely to affect future jobs in this industry? Search engines can help you find information. Look specifically for industry associations — either national or state chapters. In this Career Clusters Guide, the first page of each Career Cluster contains references to industry associations.

- **Find local employers** – Reviewing job postings will likely help you start to identify employers. However, remember that not all companies will be hiring at the moment and not all will post jobs online. Another way to find employers in your area is to use CareerOneStop’s Employer Locator tool at careerinfonet.org/employerlocator/employerlocator.asp?nodeid=18. Or you can conduct a simple Google search for businesses in your town or city. Limiting your search to industries (advertising agencies, machine shops, medical clinics) may be more helpful than just looking for occupations (social media specialists, welders, nurses).

- **Research the company** – Before ever contacting a potential employer, do your homework and learn what the company does. The more you know about their business, the more impressive employers will find you when you talk with them. Start by reading the company’s website and social media pages. If the business is especially large, it may post an annual report on its corporate website. Conduct a Google News search to gather other information about it.

- **Ask for an informational interview** – Talking directly with someone in the company is the best way to learn about what a business does and what the employer looks for in job candidates. Check with friends and other people that you or your family know to see if someone could introduce you to a company employee. If no one within your network is familiar with the business, call it directly. Explain that you would like to know more about the company and its jobs. If you’re patient and polite, employers will often find 20-30 minutes to meet and talk with a student or someone who wants to get into their line of work. Make sure you come prepared with questions, don’t ask for a job, and be respectful and appreciative of the person’s time. For tips on networking and conducting an informational interview, go to careeronestop.org/JobSearch/Network/form-a-network.aspx.

- **The New Mexico Department of Workforce Solutions has created two important websites for students, parents, and educators in our state:**
  - **Career Solutions** – at nmcareersolutions.com – offers a Career Solutions Toolbox and steps to Build Your Own Path
  - **Students Work** – at dws.state.nm.us/Internships/InternshipStudent – offers ways for students to apply what they have learned in their program of study in high school and develop their skills to prepare for their future.
Acknowledgements

Special thanks goes to Robert J. Witchger Ed.D, Director Career and Technical Education, North Carolina Community College System. Dr. Witchger gave his permission to share his team’s work called the North Carolina Career Clusters Guide. This North Carolina Career Clusters Guide, created with federal funds from the Carl V. Perkins Act, became the core text and framework for the New Mexico Career Clusters Guide.

Thanks also to Michael Stanton, Ph.D., a consultant to the New Mexico Public Education’s College and Career Readiness Bureau. Dr. Stanton served as the main contributor, editor and director of the work that went into the New Mexico Career Clusters Guide.

Special appreciation goes to the leadership and work of Advance CTE which led the design of the Career Clusters Framework used for the New Mexico Career Clusters Guide and has been adopted by the Public Education Department. The National Career Clusters® Framework provides the vital structure for organizing and delivering quality Career Technical Education programs through learning and comprehensive programs of study in New Mexico.

Thanks also to Mary LeFebvre, Principal Research Scientist for the ACT organization which provide the WorkKeys Assessment model adopted by the State of New Mexico and the Department of Workforce Connections as well as many other states and communities. Ms. Lefebvre’s work for ACT called “Career Readiness in the United States” provided WorkKeys validated research and data used throughout the New Mexico Career Clusters Guide.

In September of 2015, the College and Career Readiness Bureau (CCRB), with the assistance of Cooperative Education Services (CES), contracted with Dr. Stanton to establish focus groups, interviews, and site visits to examine model Programs of Study (POS) in all 16 Career Clusters based on the model adopted by the State of New Mexico and developed by the National Association of States Directors of Career and Technology Education (NASDCTE), the National Career Clusters® Framework. The POS courses were sequenced using the current Student Teacher Accountability Reporting System (STARS) collection. Teams were comprised of volunteers that included secondary, post-secondary and workforce representatives that provide subject matter expertise resulting in the identification of the Programs of Study in the New Mexico Career Clusters Guide. The CCRB and Dr. Stanton wish to thank the nearly 300 volunteers that contributed to and participated in this process. The Programs of Study found at the end of each Cluster Chapter is the thoughtful, current result of this work.

Dr. Stanton and the College and Career Readiness Bureau wishes to thank DJ Heckes, CEO of EXHIB-IT! and Matt Witkowski, graphic designer, for their professionalism, patience, and expertise in producing the New Mexico Career Clusters Guide.
