SECTION E—ADDITIONAL QUESTIONS	38

Introduction to the EDI

The Early Development Instrument (EDI) is a teacher-completed checklist that assesses children's readiness to learn at school in five domains: physical health and well-being, social competence, emotional maturity, language and cognitive development, and communication skills and general knowledge. It also includes two additional scales indicating the child's special skills and areas of concern or special needs.

The EDI is *not* designed to screen, identify, or diagnose individual children. Results are designed to be interpreted and reported for groups of children (e.g., groups within a school, district, neighborhood, county, etc.). It is not intended to give a complete picture of an individual child, therefor results are never shared or provided at an individual student level.

The EDI is not a "judgement" on children and where they may be at developmentally. Children with special needs, who are English Language Learners, or who may have other outside factors impacting their development/performance in some areas may consistently be rated on the lower end in some sections. This should not be seen as a judgement or a negative mark against their other strengths or how much progress they may have made.

This instrument has undergone extensive pilot testing and has been compared with direct assessment results and with parent reports. It has also been repeated on the same group of children within a short space of time. It has demonstrated reliability in all these tests. In the process of development, the EDI has also been streamlined, using detailed input from teachers.

EDI Guide

The purpose of this guide is to assist you as you complete the EDI. The guide contains a list of all the questions from the EDI. Most of them will have explanatory notes, or detailed rating descriptions for each response option. The explanations are based on consultations with teachers. No explanations were added where questions were considered self-explanatory. We welcome your comments, as this guide is considered a work in progress. Please read the entire EDI Guide *once* before starting to complete the questionnaires and then refer to it, as needed, to ensure you are accurately collecting the requested information.

General Note Regarding the Range of Rating Answers

- 1. In most cases, a description of the skills for each rating is provided. Where it is not, a judgment as to the level of skill or ability of the child may be required. Your judgment should reflect the actual individual child's performance on that measure, not how the child is performing relative to his or her classroom peers.
- 2. The 'don't know' option should only be used if you have not had the opportunity for observing/testing this skill with the child or do not have the required information about the child. If the 'don't know' option is selected too frequently on any one EDI record, it will not be included in the analysis.
- 3. Rate the child as they currently present, NOT the way the child presented at the beginning of the school year.

Completing the EDI

When completing the EDI, try to answer all the questions to the best of your knowledge. Base your answers on your observations and overall impressions of the child. Observations of each student should reflect their CURRENT developmental status.

The "don't know" option should be used only if you have not had the opportunity for observing and/or testing this skill with the child. The questions on behavior are an exception to this rule. For these, if you have not observed a child behaving in a certain way in the time that you have known her or him, the accurate answer is "never or not true."

In making the ratings on the children in your class, it is important to consider how your interpretations of child development, and therefore your responses, may be influenced by your gender; life experiences; cultural heritage; socio-economic circumstances; role models; and values.

The flag icon indicates those items on the EDI that have been found to be culturally sensitive. For these items, **supplementary information** is provided in this guide to describe special considerations for cultural sensitivity.

The EDI

Demographics

1. Student Status:

If the child has been in your class for more than one month, please proceed in completing the EDI.

If you indicated any of the other responses (in class less than one month; moved out of class; moved out of school; "parents opted out"), then you are done with this EDI record. You will be prompted on screen to select "Next", closing out this EDI record.

If you mark "other," please elaborate. An example of this would be if the child is enrolled in the class but was absent for the entire data collection period and therefore the parents/guardians never received the parent information letter.

2. Classroom length/time

Is this child in your classroom half-day for the morning (a.m.) or afternoon (p.m.), full day, or in another type of arrangement? An example for when you would choose "Other" is if a child only comes certain days of the week (Mon./Wed./Fri. or Tues./Thurs., etc.).

This information should already be provided by your school district. If it is blank, or you know the current answer is inaccurate, please complete/correct it.

3. Child's date of birth

This information should already be provided by your school district. If it is blank, or you know the current answer is inaccurate, please complete/correct it.

4. Gender

This information should already be provided by your school district. If it is blank, or you know it is inaccurate, please complete/correct it.

The "Other" option is provided for children who may have expressed to you or their families that they do not identify as a girl or a boy.

6. Child has an Individualized Education Plan (IEP) or equivalent?

This information should already be provided by your school district. If it is blank, or you know the current answer is inaccurate, please complete/correct it.

YES	NO
Children with already identified disability,	If child is gifted or talented , instead , please mark their
health, or mental health conditions requiring	special talents in Section B, questions 34-40.
early intervention, special education services,	
or other specialized services and supports.	
Children without identified conditions, but	If you only suspect that the child may be suffering
requiring specialized services, supports or	from a disabling condition, or the condition is not
monitoring.	severe enough for the child to be classified as
	special needs, please go to question 7.

	If the special need only arises because the child has English as an additional or second language, please indicate ELL Status in question 9 of this section.
--	---

6a. Do you believe they need to be re-assessed to change their classification/eligibility or increase/decrease supports?

Yes (go to 7) / No (go to 9)

YES	NO
This child has an IEP with a diagnosis or eligibility	The child's current eligibility or special education
is not the most appropriate for their needs. This can	diagnosis is the most appropriate and the supports
be based on your observations, the observations of	they currently receive meet their needs.
other service providers, or parent report.	
This can either mean that the child needs more	
supports/additional services OR you believe the	
child is in too restrictive of an environment (and	
they need a decrease in supports/services).	

7. Do you believe this child has an undiagnosed special need?

Yes (go to 8) / No (go to 9)

YES	NO
The child does not have an existing IEP or special education plan, but you believe they have a disability or special need.	The child does not have an IEP or special education plan (including 504 Plans) and you do not believe they need one.
This can be based your professional, objective opinion, or the professional, objective opinion from a service provider (Speech, Occupational Therapist, Physical Therapist, etc.) who has worked with the child and shared concerns.	

8. Has the child has been referred for assessment(s) (or reassessment) to determine if they qualify for special education services (or a change in services)?

Yes / No / Don't Know

This question is asking if you or another individual (service provider, parent, another appropriate individual) have formally requested an assessment (or reassessment) be completed for this child. This should only include referrals that have happened during this school year. The assessment does not yet need to have taken place; this question is only asking if the referral has been made.

9. Child considered an English Language Learner (ELL)?

Yes / No

This information may already be provided by your school district (from district enrollment information). If it is blank, or you know it is inaccurate, please complete/correct it.

<u>Please follow your school/district policies and guidelines for identifying a child as an</u> <u>English Language Learner</u>

YES	NO
Child for whom English is <u>not</u> their first	Child for whom English is the first language.
language, who uses limited or no English at all	
to communicate.	
Child for whom English is <u>not</u> their first	Child can speak another language apart from
language, who has conversational English, but	English, but whose English is fluent.
whose English is not yet proficient.	
	Child whose first language (developmentally)
	is not English but whose English is fluent.

In most school districts, children are identified as having ELL status if they are not fluent enough in English to easily follow the classroom educational activities.

10. Is this child part of a dual language or dual immersion program?

Yes / No

If you teach as part of a Dual Language or Dual Immersion Program, indicate that here. This is only for formal Dual Language/Immersion programs. This does not include if you instruct in a language other than English as support for specific students.

11. Other language of instruction:

Please select the second language of instruction (other than English). If the language is not included as an option, please select the "Other" option and type the language.

12. If yes, what percent of instruction is in English?

Please indicate the percentage that the program is instructed in English. Even if you do not lead instruction in English, please include how much time another teacher instructs this student in English. Use the percentage your school/district indicates (per day, per week, etc.).

12a. What percent of instruction is conducted in other language?

Please indicate the percentage that the program is instructed in another language other than English. Even if you do not lead instruction in another language, please include how much time another teacher instructs this student in another language. Use the percentage your school/district indicates (per day, per week, etc.).

13. What is the child's first language?

First language is the language a child learned first in her or his development, and still can understand (and/or speak). Select the language from the drop-down menu.

14. Does the child communicate adequately in their first language?

Yes / No / Don't Know

In answering this question, please base your answer on what might be considered appropriate language for a child in this phase of development.

Yes: If the child communicates adequately in their native tongue, (based on your observation or parent information), please indicate YES.

No: If the child does not communicate adequately in their native tongue, (based on your observation or parent information), please indicate **NO**.

Don't Know: If you are uncertain, please indicate **DON'T KNOW**.

15. Is this year a repeat of kindergarten for this child?

Yes / No

This refers to the *current* academic year, **not** whether the child is in danger of repeating this grade.

If the child is repeating this grade, please indicate **YES**. If the child is not repeating this grade, please indicate **NO**.

NOTE: If you are completing this questionnaire on a preschool or pre-K class student, leave this question <u>blank</u>. When you are done filling out the EDI, it will tell you this section is incomplete because this question was left blank. You can ignore this, lock the record and it will be considered complete.

Section A - Physical Well-being

1. About how many regular days has the child been absent since the beginning of the school year?

Information should be provided by the district/center. If blank or if information is incorrect, please enter the correct information, if known. Approximations are fine, do not take the time to check each child's attendance manually. If you do not know, leave blank.

2. How many of these days can be attributed to being "sick"?

Information should be provided by the district/center. If blank or if information is incorrect, please enter the correct information, if known. Approximations are fine, do not take the time to check each child's attendance manually. If you do not know, leave blank.

Since the start of the school year, has this child sometimes (more than once) arrived:

Answers: Yes / No / Don't Know

3. over- or underdressed for school-related activities

Refers to the child being dressed appropriately vs. inappropriately for the weather, and if this is causing any physical discomfort. Clothing that is culturally or religiously appropriate should not be considered over- or under-dressed.

YES	NO
For instance, they either do not have a warm coat for an outside trip in cold weather (underdressed) or their clothes are too heavy in warm weather (overdressed).	Dresses appropriately for the weather or dresses according to their comfort needs.
	If the child is from a culturally or religiously conservative family/community, even when it is very warm out, they may be dressed modestly with layers/head coverings/long garments. This is not considered overdressed.

4. too tired/sick to do schoolwork

Refers to child coming to school with some ailment, child complaining about feeling sick, child being sleepy and/or lethargic, which interferes with his/her participation in school activities (academic or physical). This **does not** include children with a medical diagnosis of chronic illness or illness related to a special need.

YES	NO
Often or occasionally appears sleepy or complains about feeling sick.	Consistently arrives at school ready to do work and does not appear tired or complains of feeling sick.
	Since the start of school, the child may have either been sent home ill or arrived at school tired, but this has not occurred repeatedly.

5. late

Refers to arrival at school after the start of the class and before the end of class. Think about this child's arrival throughout the entire year, not just in the past week.

YES	NO
Often or occasionally arrives to school late.	Consistently arrives to school on time.

6. hungry

This question refers only to the child's hunger level as they begin their school day, not how it is throughout the day. If the child receives breakfast at school and is no longer hungry <u>after</u> they finish eating, then you should answer the question as "no." It is possible, however, for a child to express they are hungry even if they have had breakfast; therefore, it is important that you use your professional judgment to determine if the child's comments indicate a serious, recurring problem.

In the days leading up to and during some religious holidays, such as Ramadan and Lent, some children may alter their eating habits. Please base your response on typical eating habits throughout the entire school year.

YES	NO
For instance, the child sometimes or regularly indicates one or more of the following: reports that they have not had breakfast, complains of hunger and/or appears lethargic.	The child never complains of hunger and/or never reports that they skipped breakfast.
If the child eats breakfast at school, but continues to express hunger after finishing a full meal, you may indicate that they are hungry.	If a child comes to school hungry because they are expecting to eat breakfast in the classroom/cafeteria, and is no longer hungry after they finish their meal, you will indicate "no" on this question.

Answers: Yes / No / Don't Know

7. is independent in bathroom habits most of the time

This question refers to the use of a toilet (Western, sit-down toilet). The child knows when they need to use the bathroom (i.e. does not have "accidents"). The child can undo/do zippers, snaps, buttons on clothing that are required to go to the bathroom and can wash and dry hands by themselves. If the child has a special need that requires adult assistance to use the bathroom, indicate "NO", you will be able to indicate special needs in more detail in Section D.

YES	NO
The child can do all the above tasks always or	The child cannot do most or any of the tasks
most of the time. If a child had an accident once	listed above OR the child has had more than one
early in the school year answer YES.	accident since the beginning of the school year.
Also answer YES for children recently exposed	Also answer NO for children who after at least
to sit-down toilets, who after initial accidents	one year one month of exposure to sit-down
have adapted toileting habits.	toilets continue to have difficulty adapting their
	toileting habits.

8. shows an established hand preference (right vs. left or vice versa)

If the child is consistent using the same hand for writing/drawing/cutting activities, they are showing a preference. If they are still often switching hands, select "NO".

9. is well coordinated (i.e., moves without running into or tripping over things)

Includes running, ability to change directions while running, hopping, skipping, jumping, etc. Movement to music should not be used in gauging coordination. If the child has a special need that impacts their physical development, consider if they are able to navigate their surroundings in a coordinated and self-aware way, as appropriate.

Sometimes teachers may observe that their students are either underweight or overweight. Do you feel that this child:

Answers: Yes / No / Don't Know

10. is underweight

11. is overweight

A child's weight may be impacted by a medical condition, chronic illness, or other special education diagnosis. If that is the case, you should indicate if they are either underweight or overweight here; in Section D you will be able to indicate if there is an underlying reason or contributing factor.

How would you rate this child's:

Answers: Very good/good / Average / Poor/very poor / Don't know

12. proficiency at holding a pen, crayons, or a paintbrush

"Proficiency" refers to the level of skill with this task. Do not make concessions for children with limited exposure to writing tools. If the child uses adaptive equipment to aid in their use of tools, indicate their proficiency when using tools with adaptations independently.

Very good/good	Average	Poor/very poor
Uses precision writing grip all	Sometimes uses precision	Uses fist grip or other
or most of the time.	writing grip but is not	dysfunctional grip most or all
	consistent.	the time. If a student requires
		hand over hand assistance
		(even if they have a special
		need or medical diagnosis)

13. ability to manipulate objects

Includes the manipulation of smaller objects/toys and items, focusing on their fine-motor skills and their hand-eye coordination, e.g., etch-a-sketch, threading beads, buttons on clothing, opening food items/packages, etc.

14. ability to climb stairs

If there are no stairs where the child can be observed, please use your professional judgment to answer this question, including, for example, the ability to climb playground equipment. If you have seen the child complete a range of related physical activities such as skipping, running or hopping without any problems then answer 'Very good/good.'

Very good/good	Average	Poor/very poor
Walks up and down stairs	Walks up and down stairs	Most of the time does not
alternating feet all or most of	without difficulty, but not	alternate feet, has trouble going
the time.	necessarily alternating feet.	up or down.

If the child has a physical disability or medical condition that prevents them from climbing stairs, you should indicate poor/very poor; in Section D you will be able to indicate if there is an underlying reason or contributing factor (such as a diagnosed disability).

15. level of energy throughout the school day

Very good/good	Average	Poor/very poor
Child does not tire at all or	Child does tire, but it does not	Child tires and it interferes or
excessively as the day	interfere too much with school	restricts child's ability to
progresses.	activities.	participate in school activities.

If the child has a disability or medical condition that impacts their level of energy, you should indicate poor/very poor; in Section D you will be able to indicate if there is an underlying reason or contributing factor (such as a diagnosed chronic health condition).

16. overall physical development

Includes fine and gross motor skills, stamina, muscle tone, etc. If a child has a disability or medical diagnosis that impacts their physical development, you should still answer this question based on what you would expect a "typically developing" child of their age to be able to do.

Section B – Language and Cognitive Skills

General notes for this section:

Some items in this section require knowledge of a child's language abilities (e.g. B15 - Is able to read simple sentences) and some items do not (e.g. B4 - Ability to take part in imaginative play). Where items do require knowledge of the child's language abilities, this should be based on the child's language skills in the main *language of instruction*. The child may be able to demonstrate these skills in their current operational language (home language), however what we are seeking in this section is information about the language skills needed in the context of school instruction.

For **dual language programs**, the language of instruction may be a language other than English.

Take into consideration acquisition and use of language, rather than correct grammar. A formal assessment of language and cognitive skills is not intended.

Rate the child as the child currently presents, **NOT** the way the child presented at the beginning of the school year.

Responses should be based on an informal knowledge of the child's skills based on observations in the last month.

Answer "yes" if the skill has already developed or is developing well.

Answer "no" if the skill has not yet developed or is developing slower than would be expected.

Answer 'don't know' ONLY if you have not had the opportunity for observing this skill or do not have the required information about the child.

How would you rate this child's:

Answers: Very good/good / Average / Poor/very poor / Don't know

1. ability to use language effectively in English

The focus is specifically on English language skills. This question refers to the child's use of appropriate words and expressions at appropriate times, as well as the child's contribution to conversations. Effective use is defined as use sufficient to convey the desired message. Only basic grammatical concepts need to be adhered to if the meaning is clear.

2. ability to listen in language of instruction

Refers to the child's ability to listen without visual clues for at least a few minutes.

3. ability to tell a story in language of instruction

Refers to the child's skill in retelling a story they have heard before, using appropriate vocabulary in matching events with words.

4. Ability to take part in imaginative play

Some children are not familiar with imaginative play. Regardless of previous exposure, rate performance using the same criteria for all children.

Very good/good	Average	Poor/very poor
The child shows lots of	The child engages in pretend	The child requires
imagination and interest in	play easily and naturally.	encouragement, modeling
make-believe. The child shows		and/or assistance to engage in
imaginative and creative ways		pretend play.
of play.		

5. ability to communicate own needs in a way understandable to adults and peers

Refers to the child's ability to use verbal and, when necessary, non-verbal means (signs and gestures), to communicate what kind of assistance they may need in such a way that is understandable to the teacher and other children.

Culture influences how children communicate with adults and peers. Eye contact and speaking directly to an adult may be avoided as a sign of respect. This is not to be confused with inappropriate means of communication, such as kicking and yelling. This question is not meant as a measure of English language proficiency.

Very good/good	Average	Poor/very poor
Child can reliably state his/her	On most occasions the child	Most of the time,
needs in a way that cannot be	can communicate their needs,	communication of the child's
misinterpreted, even if it is not	but clarification may be	needs is difficult for peers and
done using a proper grammatical	required at times	adults to understand, requiring
language, or with help of non-		repetitions and guesses.
verbal communication, e.g.,		
pointing to appropriate items.		

6. ability to understand on first try what is being said to them in language of instruction

Refers to the child being able to understand simple commands or statements when directly addressed to the child.

Very good/good	Average	Poor/very poor
The child consistently	Most of the time child	The child rarely demonstrates
demonstrates understanding of	demonstrates understanding of	understanding of the spoken
the spoken information. The	the spoken word. The child	word. That is the child does not

from the spoken material by	clarifying questions or makes	to the spoken word.
carrying out the task or asking a	relevant comments but does	
clarifying question or	not consistently use all three.	
making a relevant comment.		

Note: If you have enough reason to believe that the child understands but chooses not to respond please still rate as **GOOD**; the behavior aspect is rated elsewhere.

7. ability to articulate clearly, without sound substitutions in language of instruction

Refers to child's possible speech difficulty rather than accent. Accent may affect the rhythm of speech, intonation, and pronunciation; this is distinct from speech difficulties and should not influence how you rate children.

Very good/good	Average	Poor/very poor
No or a few articulation	The child can articulate clearly	The child has poor articulation,
problems in the more advanced	most easy words, but still	makes several sound
areas (e.g., words like	makes sound substitutions.	substitutions with most letter-
"leisure").		sounds and is difficult to
		understand.

General notes for questions 8-21:

Answer **YES** if the particular skill has already developed or is developing well.

Answer **NO** if the skill has not yet developed or is developing too slowly.

Answer **DON'T KNOW** ONLY if you have not had the opportunity for observing/testing this particular skill or do not have the required information about the child.

The child's exposure to reading material prior to school entry will vary, but by January-March all children will have had some exposure. It is not expected that children will be reading and writing by the time they get to school, but it is important to capture information about those who can.

Would you say that this child:

Answers: Yes / No / Don't Know

8. knows how to handle a book (e.g., turn a page)

YES	NO
Knows which way up the book should be held	Does not have knowledge of how to hold a book
and knows how to turn pages. The book may	or turn pages.
contain text in any language, but pages should	
be turned as appropriate for the language.	

9. is generally interested in books (pictures and print)

Refers to the child's being attentive to books, picking them up to look at spontaneously, and/or listening at least for a short period of time when a teacher reads or shows a book.

10. is interested in reading (inquisitive/curious about the meaning of printed material)

Refers to the child either independently trying to "read" a book by themselves, asking to have a book read to them, or listening attentively when books are being read.

YES	NO
Asks to have a book read to them,	Does not indicate interest in books and will lose
OR	attention when books are being read to the class.
watches and listens intently when books are read	
to the class,	
OR	
asks and answers questions about the content,	
OR	
will go and select a book to read/view at	
appropriate times.	

11. is able to identify at least 10 letters of the alphabet in language of instruction

Refers to either capital or lower-case letters in alphabetical or random order.

YES	NO
The child can identify 10 or more letters.	The child cannot identify at least 10 letters.

12. is able to attach sounds to letters in language of instruction

YES	NO
The child can attach sounds to letters in most cases (> 50%), regardless of whether the sounds start like the name of the letter.	The child can attach sounds to a few letters or none (less than 50% of the time).
Some ELL children may struggle with some sounds, but unless the child struggles with more than half the letters in the alphabet, select YES .	

13. is showing awareness of rhyming words

The rhyming concept may need to be explained for children whose home language does not have any or many rhyming words (e.g. Arabic). This is worth noting, but it should not influence how you answer the question for these children.

YES	NO
When asked, the child provides a rhyming word when given a word or after being provided with an example.	The child does not provide a rhyming word when given a word or after being provided with an example.
The child may spontaneously speak or sing a list of rhyming words.	

14. is able to participate in group reading activities in language of instruction

The child does not need to be familiar with all the objects in books, such as names of animals, or need to be reading. Participation as part of the group is all that is of interest.

YES	NO
In a group setting, the child attends to, responds	In a group setting the child does not attend to,
to, and/or recognizes objects and ideas in	respond to, and/or recognize objects and ideas in
illustrations and text of the reading material. For	illustrations and text of the reading material. For
example, the child chimes in during choral	example, the child doesn't chime in during
reading activities or supplies appropriate	choral reading activities or supply appropriate

15. is able to read simple words language of instruction

YES	NO
The child reads most commonly used 3 or 4-	The child reads few or no 3 or 4-letter words
letter words (mom, dad, cat, dog, etc.) The child	even with prompts.
may read simple words with the use of prompts.	

16. is able to read complex words language of instruction

YES	NO
The child reads a few words of two or more	The child reads no complex words, even with
syllables (a few of them is enough). The child	prompts.
may read complex words with the use of	
prompts.	

17. is able to read simple sentences language of instruction

YES	NO
The child reads 3-6 word sentences (e.g., The cat	The child does not read simple sentences, even
sat on the mat; I am, I like, I can). The	with prompts from others or reference to
child may read simple sentences with prompts.	illustrations.
The use of illustrations to predict meaning is	
appropriate.	

18. is experimenting with writing tools

YES	NO
The child independently chooses to use pencils,	The child does not choose to use a variety of
pens, crayons, etc.	writing tools.

19. is aware of writing directions (left to right, top to bottom) language of instruction

This question refers to the child's awareness of writing directions, and NOT their ability to write.

YES	NO
The child knows a sentence starts on the left and	For instance, the child randomly scribbles or
moves to the right. This may have been	cannot identify the beginning or end of a
demonstrated through one of the following:	sentence or where text would begin on a page.
mimicking writing direction using a finger,	
swirling or scribbling left to right (early writing).	

20. is interested in writing voluntarily (and not only under the teacher's direction)

Refers to the child's initiative in using writing/drawing tools to scribble, pretend to write, label objects with letters or letter-like symbols. An attempt to link letters must be present.

YES	NO
The child puts their name on their work with or	The child only attempts to write when instructed
without being encouraged, writes messages,	by an adult.
attempts to label objects in their pictures. It does	
not matter whether the words are legible. It only	
matters that the child is attempting to link letters	
together. This must occur on more than one	
occasion.	

21. is able to write his/her own name language of instruction

YES	NO
	NU
Without assistance (independently) the child	The child writes name only with assistance
writes his/her first name from memory.	OR
	the child writes name with letters in random

case letters, or a combination of lower and upper	the child gets the first and the last letters correct,
case letters.	but the middle ones are usually jumbled
	OR
All letters must be present most of the time.	the child misses letters most of the time.

General note for questions 22 and 23:

While it is acknowledged that copying the teacher and writing independently are two different skills, these questions are concerned with the end results (i.e., the child's ability to write).

Spelling, punctuation and grammar are not particularly important so long as meaning is conveyed.

22. is able to write simple words language of instruction

Refers to either writing words on her/his own or by copying the teacher.

23. is able to write simple sentences language of instruction

Refers to either writing sentences on his/her own or by copying the teacher.

24. is able to remember things easily

In this instance 'things' refers to all elements of material being taught: facts, events, letters, numbers, book characters, etc. Both long and short term memory should be considered.

YES	NO
The child consistently remembers most or all of	The child regularly cannot recall recently learned
the new material introduced in the class from one	material and/or requires many repetitions of new
period to another and from day to day. For	knowledge to retain it; the child cannot recall the
example, this may include one or more of the	names of peers and others (refers to them as
following: some letters or numbers, special	"him" or "her").
interest facts, names of characters in a book read	
in class recently, words to a song, etc. The child	
recalls the names of peers, teachers, and other	
school personnel most of the time.	

25. is interested in mathematics

Refers to the child participating eagerly in activities involving voluntary demonstration of skills, such as counting or adding using fingers.

YES	NO
The child readily participates in activities	The child is reluctant to or does not participate in
involving a selection of math related toys (e.g.,	activities involving a selection of math related
counting, sorting, blocks, etc).	toys (e.g., counting, sorting, blocks, etc).

26. is interested in games involving numbers

Refers to the child participating eagerly in games involving numbers, voluntary selection of number-related toys (e.g., counting, sorting blocks). If toys are used, they must be used, at least in part, for the purposes they were designed. For instance, counters are used for counting or color sorting, not just for flicking across the room.

YES	NO
The child readily participates in games involving	The child participates with encouragement,
numbers, voluntary selection of number-related	prompting, or assistance or does not participate
toys, etc.	in games involving numbers, voluntary selection
	of number-related toys, etc.

27. is able to sort and classify objects by a common characteristic (e.g., shape, color, size)

Refers to the child demonstrating the ability to do one or more of the following: play matching games, separate counters into common colors, or name the number of objects presented (e.g., say three or write the visual symbol for three when three objects are presented).

YES	NO
The child sorts and classifies objects by a	The child sorts and classifies objects by only one
number of common characteristics (e.g., shape,	characteristic (e.g., only color) or does not sort
size, color).	and classify objects by a common characteristic.

28. is able to use one-to-one correspondence

Refers to the child's ability to: recognize the fact that numbers change as the number of objects change; show understanding of matching games where there has to be the same number of objects on each picture or play games matching numbers to pictures of the corresponding numbers of objects (e.g., a picture of 2 with a picture of two apples).

29. is able to count to 20 language of instruction

Refers to the child's ability to count by rote without mistakes from 1 to 20 most of the time.

30. is able to recognize numbers 1-10

Refers to the child's knowing the name and recognizing the visual symbol of the numbers.

YES	NO
The child knows the name and recognizes the	The child recognizes only a few of the numbers
visual symbol of ALL the numbers 1-10 most of	1-10 or none at all, even with prompting.
the time; may be with prompting.	

31. is able to say which number is bigger of the two

Refers to numerals NOT objects; only up to 10 (not teens).

YES	NO
The child is able to select the larger numeral of	The child cannot do this for small numbers up to
the numerals up to 10 but not the teens.	ten.

32. is able to recognize geometric shapes (e.g., triangle, circle, square)

This question should not rely on the child's English proficiency.

YES	NO
The child can point to/select at least three	The child points to fewer than 3 shapes, even
shapes. The child does not have to identify the	when prompted.
shapes by name. This may be prompted.	

33. understands simple time concepts (e.g., today, summer, bedtime)

The child demonstrates knowledge of at least one simple time concept, such as a daily time concept. Examples include lunchtime, morning, night.

General note for questions 34 to 40:

"Special" or "unique" refers to a skill or a talent that is greater than the level expected for a typical student in this phase of development. For example, the child's talent is notable to other colleagues because of its "specialness" or "uniqueness." If a child is keeping pace with you instruction and is merely demonstrated grade-level appropriate skills based on lessons you've instructed, this would NOY be considered a special skill or talent.

- 34. demonstrates special numeracy skills or talents (you consider them gifted in this area)
- 35. demonstrates special literacy skills or talents (you consider them gifted in this area)
- 36. demonstrates special skills or talents in arts (you consider them gifted in this area)

This refers to the child's creative skills, including drawing storytelling, and acting skills.

- 37. demonstrates special skills or talents in music (you consider them gifted in this area)
- 38. demonstrates special skills or talents in athletics/dance (you consider them gifted in this area)
- 39. demonstrates special skills or talents in problem-solving in a creative way (you consider them gifted in this area)
- 40. demonstrates special skills or talents in other areas (specify)

Section C- Social and Emotional Development

How would you rate this child's:

Answers: Very good/good / Average / Poor/very poor / Don't know

1. overall social/emotional development

Social-emotional development refers the ability to form close, secure relationships and to experience, regulate, and express emotions. **Social** refers to how individuals interact with others. **Emotional** refers to how individuals feel about themselves, others, and the world.

Base your answer to this question on how you view the child's general ability to interact and relate appropriately to her/his peers, react to unexpected contexts, as well as their interest in the world around them.

2. ability to get along with peers

Very good/good	Average	Poor/very poor
The child does well both in	Child's does only moderately	Child is uncomfortable around
one-on-one contexts and in a	well in getting along (e.g.,	peers in either groups or one-
group.	quarrels or takes offence)	on-one settings
	AND/OR	AND/OR
	is comfortable only in one	gets into frequent conflicts with
	setting.	peers.

General note:

Below is a list of statements that describe some of the feelings and behaviors of children. Whenever possible answer **OFTEN OR VERY TRUE**, **SOMETIMES OR SOMEWHAT TRUE**, **NEVER OR NOT TRUE**.

For each statement, please choose the answer that best describes the child now, but use the time since the beginning of the school year as your reference frame.

Restrict your responses to your direct observations of the child in the classroom/school environment. For example, if you have not seen a child exhibit a particular behavior since the beginning of the school year, then the correct answer is **NEVER OR NOT TRUE**, and not "don't know."

Keep in mind that too many missing values (which includes "don't know" responses) render the questionnaire invalid.

Would you say that this child:

Answers: Often or very true / Sometimes or somewhat true / Never or not true / Don't know

3. plays and works cooperatively with other children at the level appropriate for his/her age

The child can play or perform a task that requires participation of other children for at least a short amount of time.

4. is able to play with various children

The child plays with at least three different children on a regular basis.

5. follows rules and instructions

Refers to the child's ABILITY to generally follow the class and behavior rules.

Once rules or schedules have been explained, the child generally has no trouble understanding them and following them. For example, the child knows that it is necessary to put up a hand to speak.

When given instructions, the child attempts to follow them (although not necessarily accurately).

6. respects the property of others

For example, the child asks for permission if he/she wants to play/use an object belonging to another child.

7. demonstrates self-control

This may be demonstrated in a variety of ways: e.g. sharing toys, taking only a 'fair share' of communal food, or displaying emotions in an appropriate manner.

8. shows self-confidence

This item indicates that the child is confident in his/her own abilities even in some small area and may be demonstrated by the child's showing pride in some skill (singing, reading), or by describing herself as able to do something, or by calmly approaching a new task.

9. • demonstrates respect for adults

This may be influenced by culture and demonstrated in a variety of ways: e.g. avoids eye contact, sustained eye contact, does not question authority figures directly, does not interrupt when adults are talking or does it only occasionally, is polite when addressing adults.

10. demonstrates respect for other children

The child is attentive to the needs of other children and treats them in the same way they would like to be treated.

This may be demonstrated in a variety of ways: e.g. not usually interrupting other children who are talking; taking care of not interrupting other children in their task; being careful with other children's work; showing an interest in other children and perhaps differences between himself and others.

11. accepts responsibility for actions

This may be demonstrated in a variety of ways: e.g. the child does not argue back when disciplined, does not show attitude when reprimanded, owns up to poor behavior.

12. listens attentively

Child focuses on the teacher/speaker. This may be demonstrated both during class activities directed at the whole group (e.g. story telling or introduction of new concepts) and in one-on-one situations.

13. follows directions

Refers to the child's actual behavior: following directions when given, NOT to the child's ability to do so.

Answer NEVER OR NOT TRUE if the child requires frequent redirecting.

14. completes work on time

Completing work on time refers to the completion of work within a timeframe appropriately allocated for the student.

15. works independently

This refers to the child's independence within his developmental capacity, i.e. child is able to do certain tasks by himself, and focus on his/her work.

16. takes care of school materials

17. works neatly and carefully

18. is curious about the world

This may be demonstrated in a variety of ways: e.g. the child asks lots of questions, participates in discussions about a variety of topics. Demonstration of the skill should not be dependent on English proficiency.

General note for questions 19-21:

The intent of questions 19-21 is about engaging with toys, games, and books that are not familiar to the child. The emphasis is on "new" rather than "eager."

Choose the option that best describes the frequency of the child's choice to play with a new toy, game or book, when the toy, game or book appears in the classroom.

19. is eager to play with a new toy

The child is eager to explore how unfamiliar objects, including toys, can be used as well as how they work.

20. is eager to play a new game

21. is eager to play with/read a new book

The child is quick to touch or look at unfamiliar books or asks to play with and/or read new books.

22. is able to solve day-to-day problems by him/herself

Refers to the child's finding appropriate solutions (chooses an alternative, uses words to express his/her choices, finds a way to "fix" something) to day-to-day problems such as: when his/her selected area is "full," a student chooses the book s/he had planned to view, when a pencil breaks, water gets spilled, etc.

Answer **NEVER OR NOT TRUE** if the child usually requires assistance from the teacher in such situations.

23. is able to follow one-step instructions

This has to be demonstrated by the child following one-step instructions with ease and without requiring frequent redirection or repetition of instructions.

24. is able to follow class routines without reminders

Following class routines means that the child can successfully move between regular activities without individual prompting by the teacher. For instance, the child may know the group they are in for reading activities and move to that group instinctively at reading time or know what they need to take with them to specialist classes.

25. is able to adjust to changes in routines

This could be demonstrated by the child's quick adjustment to returning to school after a holiday break, by not being confused or upset when chairs or tables are rearranged in the classroom, by appropriate behavior when exposed to unfamiliar teachers (e.g., substitutes when the regular teacher is off).

26. answers questions showing knowledge about the world (e.g., leaves fall in the autumn, apple is a fruit, dogs bark, etc.)

Knowledge of the world can include knowledge of the purpose of objects/animals (e.g. animals can be pets or food), knowledge of when events occur, and knowledge of what objects do (e.g. boats float in water).

Questions can be answered through various means, including demonstration of knowledge, and understanding through pointing, stories, drawings, play-acting, or modeling how things work or what things are.

This question should not rely on English proficiency. For Native American students, consider their specific knowledge, such as changes associated with the seasons.

27. shows tolerance to someone who made a mistake (e.g., when a child gives a wrong answer to a question posed by the teacher)

This refers to the child not teasing or making fun of others who make mistakes or showing that they understand that anybody can make such a mistake.

General note for questions 28-35:

By the time the EDI is completed, most children will have been exposed to the situations below. Therefore, if they had not shown any of the described behaviors, the appropriate answer is **NEVER OR NOT TRUE**.

If you have not had a chance to observe the child's behavior, please choose **DON'T KNOW** or use your professional judgment to make a selection. Keep in mind that too many 'don't knows' makes the questionnaire not scoreable.

28. will try to help someone who has been hurt

This also includes if the child seeks appropriate assistance from an adult.

29. volunteers to help clear up a mess someone else has made

30. • if there is a quarrel or dispute will try to stop it

This behavior is demonstrated by a child who reacts in ways that are appropriate to the context and that will help to resolve the conflict, even if he or she is not involved and does not know the people involved. For instance, this may include one or more of the following: the child seeking appropriate assistance from an adult; diverting the children involved to another activity; discouraging others from being involved; placing themselves physically between quarrelling children; and seeking other ways to diffuse the conflict.

Answer **NEVER OR NOT TRUE** if you have never seen the child assisting in a peaceful solution of a dispute.

Answer **DON'T KNOW** if you have never had a chance to observe the child in a context of a conflict between other children.

Please note: It may be appropriate to enter **DON'T KNOW** if you think a child does not intervene or avoids intervening out of respect for the children involved or because that is the culturally appropriate behavior.

31. offers to help other children who have difficulty with a task

Refers to the child offering to assist when they notice their peers struggling or in response to a verbal or non-verbal request for assistance. Assistance is not imposed and is offered independently

without encouragement from the teacher. The tasks do not have to be academic, (e.g., collecting a block from a high shelf in the classroom or assisting another child in a game in the playground).

Examples include: demonstrating the skill, sharing their work, or doing some of the task.

Please note: Children who are overly helpful or who offer help to please the teacher, should be rated high only if they are respectful of other children. "Taking over" or completing another child's task without consideration of the other child should not be counted.

32. comforts a child who is crying or upset

Examples may include a child who offers a toy/book etc. to a crying or upset peer; child who says "don't cry," "don't be sad," or reasons with the other child not to be upset; or suggests to the teacher ways for comforting the upset peer.

33. spontaneously helps to pick up objects, which another child has dropped (e.g., pencils, books)

In this behavior, the emphasis is on spontaneity: the child reacts to as if it is a reflex, without prompting or expectation of a reward. Examples may include picking up sporting equipment, gloves, and pencils, with the intention of placing them in their right place or giving back to the owner. **Do not count** if the child claims the objects as his/her own.

Please note: Some children may not help because they do not perceive it as their place to touch another person's belongings. In these instances, please select **DON'T KNOW**.

34. will invite bystanders to join in a game

Probably best observed in unstructured games on the playground or during free play time in class. Examples involve a child who will call others to join a game already in progress (e.g., asks another child "Do you want to play with us?"). **Do not count** if a child invites another to start a game with him/her but will not allow others to join in.

35. helps other children who are feeling sick

Also include if child seeks appropriate assistance from an adult.

36. is upset when left by parent/caregiver

If the teacher has no opportunity to observe the child's behavior upon separation, choose **DON'T KNOW**.

37. gets into physical fights

This includes both initiating and being easily provoked to engage in a physical fight as opposed to trying to solve problems in other ways.

38. bullies or is mean to others

Bullying and being mean may take the form of physical, emotional, or verbal manipulation. Rather than focusing on the intent or reasoning behind the actions, please report bullying in instances where the recipient of the actions feels they have been bullied.

Examples include: child makes negative remarks about others, intentionally excludes other children from activities, physically asserts themselves, makes unreasonable requests of peers knowing that they will oblige because they are scared or want to be included, or ignores children wanting their attention.

39. kicks, bites, hits other children or adults

Child displays these actions either in or around the school. Their actions may be unprovoked, provoked, or may occur as part of what a child considers 'play,' but are performed intentionally.

40. takes things that do not belong to him/her

Child may take home something that is clearly explained as exclusively school use, or may take something that belongs to another child without asking. There does not have to be an intention of keeping these things (i.e., it is not as serious as stealing).

41. laughs at other children's discomfort

Please only report laughter that is either malicious, where the child appears to be deriving some pleasure from another's discomfort, or laughter that draws negative attention to the other child. Nervous laughter is distinct from this.

42. can't sit still, is restless

Child's restlessness can be demonstrated by wandering around the classroom or yard, fidgeting with hands or feet or squirming in seat or fiddling with objects when the rest of the class is working, or looking around at other children when the class is listening to a story, or when the class is attending an event, like an assembly or a performance.

Do not include if child becomes only occasionally restless when bored, tired, needs to use a toilet/washroom, or is excited waiting for special events, etc.

43. is distractible, has trouble sticking to any activity

The emphasis for this question is on the word 'any.' Child has difficulty pursuing any activity for the necessary length of time, gets very easily/quickly distracted in an activity by anything happening around him/her, or finds other activities before completing the one started. Distractible includes easily side-tracked.

44. fidgets

In contrast to item 42, this item is more specific and refers to child's moving hands, fingers, feet, head or body, while sitting in one spot.

45. is disobedient

Child disobeys direct requests and instructions, even though he/she knows that this is inappropriate.

46. has temper tantrums

47. is impulsive, acts without thinking

Child acts in a way that may inconvenience or distract other children, and this is not done intentionally. Child appears to act without considering others or the consequences and is not able to self-monitor their actions. Examples include blurting out answers before questions have been completed, starting a task or activity without hearing the full list of instructions, interrupting, or intruding on others, unintentionally making upsetting comments, leaving the classroom without asking permission, calling out without raising a hand, running in the classroom, etc.

48. has difficulty awaiting turn in games or groups

Examples include: child gets agitated if their needs/wants are not immediately met; tries to push in front of other children, calls out, butts in, takes over, or gets distracted and abandons games or group activities; child who always wants to be first in line or in receiving resources.

49. cannot settle for anything for more than a few moments

Child cannot engage in an activity (whether teacher-directed, self-chosen, or play), except for a very brief period. For example, when given a task, child leaves seat in classroom, is easily distracted by extraneous stimuli, does not focus on task/activity, does not follow through to complete a task.

50. is inattentive

Child fails to give close attention to details or makes careless mistakes, has difficulty sustaining attention in tasks or play activities, does not seem to listen when spoken to directly, loses things necessary for tasks or activities (e.g., toys, assignments, pencils, books, or tools), does not follow through on instructions and fails to finish schoolwork (**NOT** due to failure to understand instructions), daydreams.

51. seems to be unhappy, sad or depressed

This is distinct from being tired though they may look similar. Children may appear withdrawn, be unenthusiastic and tend not to smile much.

Depending on the child and frequency of the behavior, select **OFTEN OR VERY TRUE** or **SOMETIMES OR SOMEWHAT TRUE**.

52. appears fearful or anxious

Examples of a fearful or anxious child include: a child who is scared of new things and perhaps even new routines; a child who usually waits until others have attempted a new task before fully engaging; a child who is unsure of her abilities to cope with a task (e.g., child says "I can't do it; I don't know how to do it" even though they should be able to).

53. appears worried

This refers to expectations that things will go wrong, for example that something expected would not happen without a reason. Child may be troubled (concerned) by things that should not be causing any worry.

54. cries a lot

This item refers to the child crying regardless of what the reason may be and whether it is one that could elicit distress.

55. is nervous, high-strung or tense

This refers to the child being sensitive, easily excitable, uneasy, or nervous. This can happen either in situations where some degree of nervousness is appropriate (e.g., before public performance), or in situations where it is not obviously apparent what the cause of the anxiety might be.

56. is incapable of making decisions

Child takes an inappropriately long time to do one or more of the following: choose books to read/look at during silent reading; decide where to sit on the mat; and/or decide which color pencil to use. Child often waits for others to make a decision and mimics it or requires adult direction or explicit instructions to make appropriate decisions.

57. is shy

This may be demonstrated by the child being unwilling to initiate interaction with other children, or rarely volunteering for anything, or taking a long time to get used to new things and new people – for example other teachers, or children.

58. sucks a thumb/finger or piece of clothing

Also refers to sucking a piece of their hair, etc.

Section D – Special Concerns

In this section, "special" refers to the needs already noted on Item 7 of the Demographics section AND any other difficulties that the child is currently experiencing. If in doubt whether a particular impairment is included in the categories listed, please mark it as **OTHER** and explain.

Please base your answers on TEACHER OBSERVATION OR INFORMATION PROVIDED TO YOU EITHER AS A MEDICAL DIANOSIS AND/OR PARENT/GUARDIAN-REPORTED INFORMATION.

1. Does the student experience learning differences or challenges that may influence their ability to do schoolwork in a typical classroom setting (based on parent information, medical diagnosis, and/or teacher observation)?

Yes / No / Don't Know

2. If YES above, <u>please mark all that apply</u>. Please note, some concerns may fall into more than one category.

Please base your answers on your observations AND on parent information/medical diagnosis. For example, if you have noticed that a child has a learning disability, and the parents have told you that this child has a learning disability, then you would check off both the YES, TEACHER OBSERVED and YES, PARENT INFO/MEDICAL DIAGNOSIS columns.

Examples listed below are not an exhaustive list; there may be other disabilities or diagnosis that fall into one of the categories not listed below. Use your professional judgement to determine which category is most appropriate.

	Examples of Diagnosis/Special Needs
Behavioral/Emotional	ADD/ADHD; Anxiety; Depression or other mental health disorders
Developmental Disability	Autism Spectrum Disorder (ASD – includes Autism, Asperger Syndrome); Developmentally Delayed/Global Delay; Down Syndrome/Other Genetic Developmental Disability
Learning Disability	Learning disorders in reading, writing, math
Speech and Language impairment	Apraxia; Cleft Palate/Lip; general Receptive or Expressive Language impairments; Selective Mutism
Visual impairment	Blind/ Visually Impaired
Hearing impairment	Deaf/Hard of Hearing

Physical/orthopedic impairment	Cerebral Palsy; Mitochondrial disease; Muscular Dystrophies; Spina Bifida	
Multiple disabilities	If a child had multiple diagnoses that impact their learning, include this check mark in addition to the other impairments/disabilities listed	
Other	Other Health Impairment (OHI) (examples include Epilepsy/ Seizures, Congenital/acquired Heart Problems, etc.); Traumatic Brain Injury (TBI); Tourette Syndrome	

3. If the child has received a diagnosis or identification by a doctor or psychological professional, please indicate.

Please select from the following codes in the table on the next page. You can as many as are appropriate/applicable.

If you don't find a code, please select **Other**, **not listed**.

4. Is the child receiving any school-based support(s) (e.g. educational assistance, equipment)? Yes / No / Don't Know

This is includes support services such as academic interventions, speech and language services, physical therapy (at school), occupational therapy (at school), and behavior support.

This also includes any adaptive equipment a child may use in order to access their learning environment.

5. Indicate below if the student experiences any of these challenges that MAY influence their ability to do schoolwork in a regular classroom (based on parent/family information and/or teacher observation).

Check all that apply:

- Home environment/problems at home (may include potential custody or other parental conflict that may have impacted the child; this may also include if a child has a parent/close family member currently incarcerated)
- Chronic medical/health problems (may include undiagnosed, but persistent health problems with the child <u>or</u> chronic health problems with a close family member)
- Unaddressed dental needs (may include significant dental concerns that either impact a child's ability to eat, or cause them pain/discomfort throughout the school day)
- Homelessness (see full US Department of Education definition below)
- Other (this may include a special circumstance that a parent or family member has shared with you that does not fit into another category)

Homelessness: The US Department of Education's (ED) definition is as follows: "Includes the HUD categories of unsheltered and sheltered **plus** people living in motels and doubled- or tripled-up in someone else's home due to economic hardship. The ED definition is based on the educational requirements and characteristics of children in these conditions (e.g. children living in overcrowded conditions may experience similar levels of mobility (moving frequently) and instability, and as a result, similar educational deficits, as children in shelters

Section E—Additional Questions

To the best of your knowledge, please mark all that apply to this child:

Answers: Very good/good / Average / Poor/very poor / Don't know

1. Has the child attended a special education preschool program or other early intervention program/services (e.g., speech therapy) prior to this school year?

Please specify the type of program, if known. Includes speech/language therapy, parent attended a parenting program, a Head Start program, etc., or if child has had similar in-home services.

2. In the year prior to kindergarten entry, has the child been in an early childhood education/preschool program or other non-parental childcare on a regular basis?

Even though it says kindergarten, this question is always referring to the year prior to this school year. For those of you filling out the question for a child that is not in kindergarten, please read the question as, "In the year prior to this school year, has the child been in non-parental care on a regular basis?"

Non-parental childcare includes center-based (including Pre-K), home-based, and other arrangements listed in the chart under question 2a.

- a. yes
- b. no (skip to question 3)
- c. don't know (skip to question 3)

2a) If yes, please specify type of care arrangement: *Please mark all that apply.*

	Includes: licensed, for profit or non-profit (e.g.
Center-based, preschool/daycare (Public)	State preschool, Headstart, Early Headstart, Pre-
	K, government funded care; public school
	preschool programs).
Contan based mussahaal/daysana (Duiyata)	Includes: tuition-funded programs; religiously
Center-based, preschool/daycare (Private)	affiliated programs; other private preschool
	programs
	Includes: licensed/unlicensed home care by
Other home-based childcare (cared for by a	either a relative or non-relative (e.g. family child
relative or friend)	care home).
	Includes any combination of other options.
Mixed arrangements	Please be sure to select this option, as well as
	the options that make up the mixed arrangement
	Child has been in non-parental care, but the type
Other	does not fit any of the above. Please specify in
	the text box the type of care child has been in.

Don't know	Child has been in non-parental care, but you are
	unsure what type it was.

2b) To the best of your knowledge, in the year prior to this school year, was the child care arrangement:

Full-time	Part-time
Child was in non-parental care at least 6 hours/day, 5	Child was in non-parental care less than 6 hours
days a week.	every day, or not every working day of the week.

If you know that the family's child care arrangements changed in the preschool years, please use your judgment to select the one that the child was in for the longest period of time.

3. Since the beginning of the school year, has the parent/guardian volunteered in the classroom, on a classroom project, field trip, etc?

Yes / No

4. Has a parent/guardian attended at least parent-teacher conferences?

Yes	No
The parents/guardians have attended one or more	The parents/guardians have not attended a
scheduled parent-teacher conference (e.g. to	scheduled parent-teacher conference (e.g. to
discuss the child's report card).	discuss the child's report card).

5. Apart from parent-teacher conferences, have you had one-on-one conversations <u>in person</u> with the student's parents/guardians (either by phone or face-to-face)?

Yes	No
You have had at least 1 one-on-one conversation	You have not had at least 1 one-on-one
with the parents/guardians above and beyond the	conversation with the parents/guardians above
parent-teacher conferences.	and beyond the parent-teacher conferences.

6. Apart from parent-teacher conferences, has the parent reached out to you through other forms of direct communication (phone calls, emails, message apps, etc.)?

Yes	No
You have had at least 1 one-on-one conversation	You have not had at least 1 one-on-one
with the parents/guardians via phone or digital	conversation with the parents/guardians via
media platforms	phone or digital media platforms

7. If you have any comments about this child and her/his readiness for school, please print them below.

Please print any comments about the child in the text box. Please **do not** include the child's name.
