1	APPEARANCES	1 THE CHAIR: So good afternoon, everyone,
2	COMMISSIONERS:	2 and thank you for your patience with it was a
3	PATRICIA GIPSON, Chair STEVEN J. CARRILLO, Vice Chair	3 little bit of a hustle between coming down from
4	TIMOTHY E. BECK, Secretary	4 Santa Fe to here. So we appreciate your patience
	ALAN BRAUER, Member	5 with us.
	REBEKKA BURT, Member STEWART INGHAM, Member	6 So we are here. And I want to make sure
6	K.T. MANIS, Member	7 I does someone have their agenda open? I just
7	STAFF:	8 want to make sure the name of the school, I'm saying
8	CORINA CHAVEZ Director Charter School/Options for	9 correctly.
9	Parents and Families Division	10 Okay.
10	LUCY VALENZUELA Technical Assistance and	Okay. So we are here. It is calling
11	Training Specialist Charter School/Options for Parents	us back out of recess, it is Wednesday, July 10th,
	and Families Division	and it is 2:05 p.m. And we are here for The
12	MELICCA DROWN TO 1 ' 14 ' 15 16	14 Multilingual Multilingual International School.
	MELISSA BROWN Technical Assistance and Support (MISSY) and Training Administrator	15 Thank you.
15	Charter School/Options for	So welcome once again.
14	Parents and Families Division	So just so folks are clear on the process,
15 16		so we'll go through the hearing today. A week from
17		this Friday, when the PEC has their regular work
18		session and meeting we're combining it into just
19 20		one day this month at the work session, any
21		22 additional questions that Commissioners may have
22 23		that haven't been addressed will be populated into a
24		24 letter to the applicant team as a result of the
25		25 feedback from the work session.

So when the applicant team does start, I'm going to ask the folks to introduce yourself. And we do have a court reporter we do that recording, but we also have a court reporter that's doing a transcript. So we do ask that you spell your last name for the transcript. And you only have to do that once when you folks speak, because the camera is showing you, so

	6		8
1	yourself when you come up to speak and also spell	1	"Victor" -a-l-t-i-e-r-r-e-z. It looks like
2	your last name for the record.	2	Gutierrez, but it's got a V-a-l- up front.
3	Okay. So I'm going to ask Commissioner	3	DR. ANA PEREA: Thank you.
4	Beck to simply take roll so we have a record of	4	First of all, I want to say thank you to
5	everyone who is here.	5	all of you for being here. Highly appreciated, each
6	SECRETARY BECK: Commissioner Burt.	6	of you. And my students, it was a beautiful
7	COMMISSIONER BURT: Here.	7	surprise to see a couple of my students here. So
8	SECRETARY BECK: Commissioner Taylor.	8	thank you very much to all of them.
9	(No response.)	9	Here it is. We will start with the agenda
10	SECRETARY BECK: Commissioner Armijo.	10	of, obviously, who we are as a team.
11	(No response.)	11	The TMIS Mission and Vision. Why
12	SECRETARY BECK: Commissioner Manis.	12	Bernalillo? Beyond Bernalillo.
13	COMMISSIONER MANIS: Present.	13	What is International what is
14	SECRETARY BECK: Commissioner Brauer.	14	International Baccalaureate Programme?
15	COMMISSIONER BRAUER: Here.	15	Thank you.
16	SECRETARY BECK: Commissioner	16	And questions eventually coming.
17	Clahchischilliage.	17	So here we go.
18	(No response.)	18	We are going to start introducing ourself
19	SECRETARY BECK: Commissioner Ingham.	19	in the order that it shows there. Dr. Arellano,
20	COMMISSIONER INGHAM: Here.	20	Mrs. Valtierrez, myself, and Dr. Montague.
21	SECRETARY BECK: Vice Chair Carrillo.	21	MS. MAYRA VALTIERREZ: I'm happy to start.
22	VICE CHAIR CARRILLO: Here.	22	And so just to tell you a little bit more about
23	SECRETARY BECK: Chair Gipson. She's	23	ourselves, I was born and raised in the Borderlands
24	here.	24	of New Mexico in El Paso, Juarez, and Las Cruces. I
25	THE CHAIR: I'm here.	25	have been working all of my career to support
	7		9
1		1	
1 2	7 SECRETARY BECK: Secretary Beck, here. There are one, two, three, four, five,	1 2	language, culture, and equity in our public schools. DR. BRENDA ARELLANO: And I am a

And now, I am an administrator; vice principal of Corrales International School, IB school, and proud of that. Thank you. DR. NICOLE MONTAGUE: My name is Nicole Montague. I grew up in Albuquerque, and I was a teacher in APS and some charter schools, various charter schools for many years. And my passion is

classroom about how children with learning disabilities learn to read and write in Spanish and English.

And then I came back from Texas A&M. And I taught some more with -- alongside Ana in our charter school, and I fell in love with the IB curriculum. And I did that ever since, from 2000 to 2020. And then I retired in 2020.

DR. ANA PEREA: And she's back. Thank you very much.

So I'm going to read a little bit of our mission. And then -- no, because you can all read, but I need to start with that.

And then I will tell you how we are going to accomplish that.

So the mission of The Multicultural International School is to achieve multicultural inclusion and equitable, culturally relevant learning for all students who attend the school or participate in the language programs. TMIS will facilitate students' excellent education within the International Baccalaureate curriculum framework, aligned with the New Mexico academic content standards.

TMIS focuses on holistic education and

2 Our vision.

Okay.

Again, we go The Multicultural
International School team's vision and purpose is to
all students who attend the school or participate in
the language programs to receive a holistic
education, to prioritize academic achievement in the
developing of self-awareness, values, and emotional
well-being.

How we are going to do it? Oh, sorry.

Our team will work with the community for the first three years of TMIS on building a curriculum, making decisions, meeting policy, everything that is relevant to our students.

How we are going to do it?

Our team is dedicated to creating an educational program that exemplifies the vision -- the vision of culturally and linguistic relevant education for our New Mexican students.

We also seek to establish as a collaborative space where educators, local communities, families, and students work together to facilitate this vision.

MS. MAYRA VALTIERREZ: Just a quick note,

will prioritize students' academic performance based on the International Baccalaureate sense of community, knowledge, sharing goals, and collaboration.

How we are going to do that? Well, we will -- okay. How we are going to do that? We will measure our formative and summative assessments. This includes State-required assessments aligned with rubrics, with the Common Core standards and integrated International Baccalaureate standards and practices.

How we are going to do it? Our students are going to demonstrate increased problem-solving in measures by formative and summative assessments, aligned with portfolios that they are going to create along school time.

Reflections and transdisciplinary units, six of them, at least, for the first three years.

The students will show their ability to reflect through their actions by presenting inquiries and sharing investigations with the community.

How we are going to do it? We will inform our community regularly about our students' academic achievements.

Anybody else would like to add something?

based on who the students are that you're serving.

2 So that happens in the first three years in order to 3 be recognized by IB. And then it continues --

right? -- as the student population changes. So

just wanted to make sure we highlight that.

DR. ANA PEREA: Thank you. I forgot that part. All right.

So why Bernalillo is the word that I've been hearing in my mind since the beginning. Why Bernalillo?

Well, Bernalillo stands as a beacon of diversity within the region. It holds (ph) to multiple pueblo communities, talking about also Hispano, Latino, Asian, Anglo, African-American, and many other important communities.

So the potential of a international school, International Baccalaureate school, that encourage the international mindedness is unique in this case, which present one-of-a-kind opportunity for this community.

And The Multilingual International School, we will immerse themself -- the students will immerse themself in learning actively, not passively, language and culture interlink.

DR. BRENDA ARELLANO: So as Ana has just

25

described, we believe there's a lot of good reasons to serve Bernalillo with the Inter- -- Multilingual International School. One of the reasons we believe that, there's just a lot of potential for growth, especially in terms of academic achievement.

20

21

22

23

24

25

When we looked at the snapshot of Bernalillo Public Schools, especially in terms of math proficiency, and we looked at the New Mexico Vista data, we can see, on average, 9 percent of Bernalillo students in third to eighth grade and eleventh grade, about 9 percent of those students were proficient in math compared to 24 percent of students statewide. And about 4 percent of English Learners in Bernalillo were proficient in math compared to that 10 percent of students statewide.

And then when you look at Native American students in Bernalillo, about 5 percent scored proficient in math compared to 13 percent statewide.

And then when you look at reading proficiency, there's also opportunity for growth as well. So about 26 percent of students in Bernalillo scored proficient in reading compared to 38 percent of students statewide.

And the gap between English Learners in Bernalillo and statewide, it's not as great as they development.

You can see in the four other schools that provide an IB curriculum that mathematics and reading proficiency rates exceed statewide proficiency rates.

And I'll just pause there for a moment so you can kind of take a look at what those scores look like compared to the statewide proficiency rates.

What I think is particularly notable about that is the English Learner progress in these schools. This is the same kind of opportunities, choice, and curriculum that we want to provide students and families in Bernalillo, where there's room for growth related to academic achievement, outcomes.

And likewise, our Native American students and families, we want to provide them with access to a local IB curriculum which has shown promising results elsewhere.

And at this point, I'm going to turn it over to Mayra.

23 MS. MAYRA VALTIERREZ: So beyond 24 Bernalillo -- here we go. 25

Beyond Bernalillo, we really want to

15

were in math. So that's a really good thing.

So about 14 percent of English Learners scored proficient in reading in Bernalillo, compared to about 17 percent of students statewide.

But there's still school room for growth. We're about 14 percent compared to about 38 percent of students overall statewide.

Our Native American students' reading proficiency in Bernalillo averaged 19 percent compared to 23 percent statewide.

When you look at science proficiencies, there were still some large gaps that emerged when you look at the data. Statewide, on average, 34 percent of students met science proficiency. But in Bernalillo, only about 13 percent of students in grades 5, 8, and 11 met proficiency.

And there are also some rather large discrepancies between ELs and Native American students, and those gaps averaged between 6 and 10 percent compared to statewide averages.

The International Baccalaureate Programme provides students with access to challenging and rigorous core curriculum which is critical to supporting English Learners' academic success, in addition to supporting language and literacy

partner with this school as part of the Language and Culture Division to provide language programs throughout the state. And so we recognize that not everyone has the capacity to do everything.

And so the idea would be that, of course, not in the first year, likely not the second, but as the school focuses on the community and grows, to partner with the school to provide access to English Learner programs across the state, as well as bilingual multicultural education programs and access to the State Seal of Bilingualism and Biliteracy.

My team has a very similar agreement with the district, where we run the migrant education program that works with farm workers and families who work in our farms. And that is a partnership with Las Cruces Public Schools.

And so the idea is that, for example, one particular charter school who says, "I have five EL students, and I don't know how to support them," that they could then enter into an agreement with TMIS to be able to provide that specific support.

DR. ANA PEREA: Thank you.

Why IB in Bernalillo?

So the IB curriculum framework model focus

21

18

14

15

16

17

18

19

20

21

22

23

24

25

on the learner -- the PYP. I'm sorry. The PYP refers to the Primary Year Programme. That goes from K to fifth grade. That's where we will focus at least the first three years.

So we are talking about that why IB in Bernalillo is because we are going to focus in the learners and the outcomes. It's kind of obvious why. We just have seen the previous information that we have presented to you, the previous sheets.

We are going to focus in learning and teaching and learning in the community.

So our model presents six transdisciplinary themes from K to fifth. And each theme is going to involve -- it's a holistic approach.

So all the subjects can be in one theme.

For example, "Who We Are." So we can develop all the subjects in Who We Are: math, English, language acquisition, social studies, science. And who we are. We are, for example, mathematicians. So that's who we are.

So we go in deep. The teachers guide the inquiry. They are going to do it for three weeks. And then after three weeks, the students will continue with the inquiry of research, reflection,

that is going to be something that will help the students way beyond high school. We are talking about college.

And as I said before, one prepared for the other one. For example, the Primary Year Programmes prepare for the inquiry, the research, the learning. The Middle Year Programme act like why we are learning this and how we can apply this. And the Diploma Programme goes beyond.

We have some specialists that are online, and they are going to talk about it later on if we have a chance.

Oh. We beat it earlier, Missy.

Thank you. I was rushing myself. Sorry for that.

Do you have questions? They are coming, I'm sure.

MS. MELISSA BROWN: So next will be Public Comment.

20 THE CHAIR: Our questions come after the 21 public comment.

DR. ANA PEREA: Okay. Thank you. THE CHAIR: So we are now on to public

24 comment. Is there anyone online that signed up, 25 Missy?

19

and action.

22

23

24

25

And just opening this pretty broad, eventually, we are going deep on it, because I guess we have only 20 minutes, and I don't know how many minutes we have. I'm rushing myself.

MS. MELISSA BROWN: Seven minutes and 25 seconds.

DR. ANA PEREA: Ah. We have enough time.

So we go to the MYP curriculum that refers to the Middle Year Programme. All the subjects as well, like in traditional schools. It's no different.

The framework curriculum adapt to the content standards, because it's looking for the same thing. Analyzing proficiency -- I have the list, so here -- analyzing proficiency, communication, everything that involves the Common Core is in an IB.

IB frame curriculum is just the frame.

That's why it can adapt to any model in the world. DP Programme is something we can see later

on in the process in the fifth year. It's exactly the same. The only different that we added here is the Theory of Knowledge. There are special classes, Extended Essay, Creativity, Activity and Service,

1 MS. MELISSA BROWN: Yes, Commissioner. Do 2 you want to ask --

> THE CHAIR: Sorry. I have to back up. Let me back up.

Is there anyone from the school district that is here to speak -- and I'm assuming no one online -- from the school district?

MS. MELISSA BROWN: I don't see anybody from a school district. If they want to raise their digital hand?

(No response.)

THE CHAIR: Okay. And, secondly, is there anyone from a tribal community that wishes to speak?

(No response.)

THE CHAIR: Okay. So now we are on to public comment.

MS. MELISSA BROWN: Okay. So we will go online first. And Nara Olivas.

And please make sure to spell your last name. And I will start the two-minute timer when you're done spelling your name.

FROM THE PUBLIC: Hello. My name is Nara Olivas.

Do you -- you asked me to spell my name? MS. MELISSA BROWN: Yes, please.

FROM THE PUBLIC: N-a-r-a, first name. Last name, Olivas, O-l-i-v-a-s.

MS. MELISSA BROWN: Okay. You can go. FROM THE PUBLIC: Great. Thank you. Hello, everyone. I'm out of the country, and I also can only see part of the -- of what's happening, so it's a little odd.

I am in favor of the school. I am a fifth-grade teacher at an IB school, at Corrales International School. And the benefits of IB are just -- they're really special.

It's great to lead the students through their inquiries. And, just to facilitate that process, the fact that it's also a bilingual or -- yes -- biliterate and bilingual approach is -- it's really great to see.

And just honoring the students' language and, like, their learning process. They do a lot of reflecting. And I think the working with the students and seeing, like, the presentation, I think, just makes me really excited. And I think that's all.

FROM THE PUBLIC: Hello. Can you hear me? MS. MELISSA BROWN: We can. Please spell your name and then you can start talking.

students are acquiring knowledge, but,

2 simultaneously, they're building important skills

3 such as collaboration, research, inquiry, as well as

4 developing critical values that own and complete

them as balanced, ethical human beings. And those
 are exactly the kind of people who make a positive

7 difference in the world.

Thanks.

9 MS. MELISSA BROWN: Next we have Mondrea 10 Mitchell.

FROM THE PUBLIC: Yes. Hello there. Is everyone able to hear me?

MS. MELISSA BROWN: Yes, we can. FROM THE PUBLIC: All right. Perfect.

First of all, thank you for taking the time to invite us to speak on behalf of The Multilingual International School.

Multilingual International School.
 My name is Mondrea Mitchell,

M-i-t-c-h-e-l-l. And I am founder of University

20 Child International Consulting, and also a member of

the IB Educators Network, where I work closely with
 the International Baccalaureate organization as a

workshop leader and a consultant to schools and also

part of quality control teams.

I believe that Ana Perea spoke of the

FROM THE PUBLIC: Sure. Good afternoon. My name is Shellee Bratton, B-r-a-t-t-o-n. I am a semiretired teacher living in France. And I taught in the Primary Years Programme of an IB school in Albuquerque for several years.

So I just wanted to add my voice in support of The Multilingual International School, because from what I personally witnessed, I know it will be a huge boon to students. It'll help them grow into productive, caring thinkers, through the kind of high-caliber education that basically all children deserve.

We know the benefits of multilingualism are manyfold, including brain development and thinking. And that's all been scientifically documented. But as for the IB curriculum, it actually lifts students out of a mundane pedagogy to a learning environment that is much more constructivist and holistic and creates eager, lifelong learners who are able to think out of the box, take risks, solve problems, all while looking through a more global lens.

So IB curriculum is cross-sectional. I describe it as curriculum on steroids, because it's like a huge over-arcing umbrella under which

quality control and standards of IB schools and the continuum of four programs, the Primary Years
Programme, the Middle Years Programme, the Diploma
Programme, and also a careers-related program for members who want to take a less academic path, so open to apprenticeships as well.

Over 40 years, the IB has provided top-notch international education across the world. There are thousands of IB sister schools held to the high standards, academic standards, and assessment standards.

I join The Multilingual International School as consultant. I will continue to consult with them to build a strong program. I was heartened to hear about the work being done and the needs assessments being done and how the school plans to implement and grow the school and grow the community.

So I'm very heartened to be a part of the process at this point.

MS. MELISSA BROWN: Thank you.
Next we have Renee. I need -- oh, okay.
Well, then you can go during the people in the room.
Okay.

So then we have Pat Cate. Let me just --

there you go.

FROM THE PUBLIC: Hello.

MS. MELISSA BROWN: Hello.

FROM THE PUBLIC: My name is Pat, Patricia Cate. I am from one of the surrounding communities that services Bernalillo Public Schools from San Felipe Pueblo. I am here just as an individual; although, I am part of the Keres Language and Cultural committee here in my own community. I am also a language instructor.

And I also am a first grade teacher, licensed teacher.

I have a few questions. I'm not in favor of or am I not opposed at the moment. But I do have a few questions.

First of all, this is a hearing to see what community has to say. That's why I'm here as an individual with questions.

First of all, I'm just wondering. Has this been brought to the attention of the governors that -- that are a part of Bernalillo Public Schools, which are Keres speakers and other speakers of the language? Has it been brought to the tribal government? And in what form? And has it been brought to the councils? Because we have different

How are you going to gather these people, and how are you going to vet them to be on your committee and board to plan this out?

Another one is Bernalillo Public Schools. I didn't hear anyone from Bernalillo Public Schools. And I don't know if anybody is there or they supported it, not supporting it.

And, of course, they're their own district. And this will be a competing school, it sounds like.

So those are my questions. But mostly my main thing is if our tribal communities are supporting this, and if it's being brought to council, and who is informing them of what is going on, and how are you keeping updates and -- to them?

Thank you. Those were my questions.

MS. MELISSA BROWN: Next we have Laura DeGrazia. Please remember to spell your last name, and I will start the timer for your two minutes.

FROM THE PUBLIC: Okay. Can you hear me?
MS. MELISSA BROWN: Yes, we can.

FROM THE PUBLIC: Okay. My name is Laura
DeGrazia. D-e-G-r-a-z-i-a.

I am an IB member. I provide different workshops for the IB, MYP, and Diploma Programme.

tribal councils.

Are they for it? Against it? Or are they waiting to hear from this input? I'm not sure if that's been okayed at this -- as happening.

Also, you did answer the grades that it's going to service in Bernalillo Public Schools with the PYP it; it's K-5.

When you do come in, if -- I didn't hear anything about licensure and requirement. And I do know this is the beginning part of the hearing. But I didn't hear anything of licensure requirements.

I did hear your curriculum. But I didn't hear anything. We do have different license -- like, licensed teacher through NMPED. And also the 520 certifications for the language and culture teachers.

And I'm just really curious, because I'm -- how are you going to incorporate our languages? Is it going to be immersion types? Is it going to be pull-out? Is it going to be blocks? Is it going to be beginners? Intermediate? Advanced?

I know you're not there yet, and you're going to plan it with the community is what I kind of heard.

And I've been involved with the IB since the year 2006.

I'm also an examiner, and I hold several roles in terms of curriculum and professional development in general.

And hearing everything that has been said, I could complement that the most important thing that the IB provides to this community is the ability to incorporate traditional knowledge, knowledge, languages, and practice into an educational experience, rather than just teaching content.

It fosters a sense of pride and identity among students, because the IB doesn't look to kind of impose a certain curriculum, but, actually, to address the curriculum in a way that it adjusts to the local reality.

Education is seen as interconnected with life and community, fostering leadership, problem-solving abilities, like previously said. So I believe your students' horizons will be helped by connecting with their local experiences. You know, we have global contexts in different ways in each one of the programs, from PYP with the themes, and then global context in the MYP and the themes, and

questions in the Diploma Programme.

And it trains your students to become whatever they want to become in the future. So they are not only admitted in local systems, but also internationally, because of the recognition that the IB has.

Something that hasn't been mentioned is that the IB has been built by teachers, like all of us, from around the world trying to give the best start of our students. We do it only for our kids, always respecting their identity.

So someone was asking about languages and -- you know, and their own culture. And that is priority for the IB.

The curriculum is well set. Actually, when there is a language that is specific for each school, they address that language as something particular for that school.

So I believe the IB is actually a great input for the school you're building, and you can contribute significantly to the local community.

MS. MELISSA BROWN: Thank you. Now we're moving to the room. And, first, we have Mia Ortega. If you can come up to the podium, please.

FROM THE FLOOR: Okay. So I wrote a

helped me become a more rounded -- more well-rounded
 individual. Other than knowing about the IB
 Programme, I also know Ms. Perea.

Ms. Perea taught me from second to fifth grade. I was a student who was struggling in math.

Ms. Perea spent afternoons with me to help me gain a better understanding of math.

Ms. Perea would also tell me that my knowledge was like a stone, and to make it shine, we had to polish it. This means that you may not fully understand something, but that's okay. You just need to give it a little bit more attention and practice. Then your work will shine.

I believe that an IB school for Primary Years will be beneficial to the community because it'll get your kids excited to learn. The specific program ignites the flame of knowledge for your child. This makes them want to shoot for beyond the stars and never stop trying to learn and grow.

This program, with the advisement of Ms. Perea and others, will teach your children important life skills, such as how to be inquirers, knowledgeable thinkers, communicators, principals, open-minded, caring, risk takers, balanced, and reflective. These characteristics will help create

little speech today.

My name is Mia Ortega, O-r-t-e-g-a.

Good afternoon, ladies and gentlemen. I would like to start by reading a quote by Eleanor Roosevelt.

"A teacher's influence can never be erased."

This stuck with me while writing the speech, because it remained -- it reminded me of the foundation that the IB Programme as well as Ms. Perea, set for me during my foundational years. That quote encompasses the ideals of the IB Programme, because this program will influence your children to want to learn more and grow.

Teachers and administrators such as Ana Perea will help guide your children into making them well-rounded people who will help them aid the community.

Now, you may be thinking. What makes me credible? I've been in the IB Programme since kindergarten. I have just graduated high school. I finished the IB diploma this year.

I continued it throughout middle school and high school.

Let's see. I helped -- IB has definitely

an individual who is eager to learn, as well as making them interested in their community.

I would like to end the speech with a quote by Ms. Perea herself.

"I will help you to polish yourself up and make you shine."

Thank you.

DR. ANA PEREA: She revealed all my secrets.

MS. MELISSA BROWN: Okay. Next we have Renee Sorrell, freshly arrived.

FROM THE FLOOR: Good afternoon, everyone. I'm here on behalf of Ana Perea. I am actually a parent of a student that has been there.

MS. MELISSA BROWN: Can you please spell your name?

FROM THE FLOOR: I'm so sorry. My last name is spelled S-o-r-r-e-l-l.

So my daughter has been going to the Corrales International since she's been in kindergarten. And she is now going to be entering into the tenth grade.

We have gone back and forth with her going to a public school. But each time we've addressed it, our decision is to go back to the Corrales

2.

International for the learning.

2.

She has excelled in a lot of different areas, her strengths being in math and English. When she first started at the school, she did not like it. When she started the high school years, she didn't like it. But as she has grown, with the advisement and the direction of Ana, she has now chosen a career path that requires a lot of thinking and a lot of schooling for it.

And so I just want to say that with the IB Programme, it does teach the kids the community values. It does teach them how to think outside of the box. It pushes them to go beyond just a basic learning skill and be able to just get through the motions just to be able to graduate to the next level.

Comparing my child to a regular APS school, my daughter is above what the learning level is at her age. And so any time she's had any problems, you know, she's welcome to ask, and they have stepped in, and they have actually, you know, helped her.

Ana is a great person for both, as a teacher and as a leader, because she cares about the students that she is involved with. She cares about FROM THE FLOOR: Hello, ladies and gentlemen. My name is Amberlee Fleisher, F-l-e-i-s-h-e-r. And I'm here to support Ms. Perea.

I graduated from an IB school, Corrales International, in fact. And Ms. Perea taught me from second grade to fifth grade.

The benefits of an IB school are keeping your child rounded and letting them explore things that they wouldn't do in public schools.

They get interested in the knowledge that we are being taught in classes.

I, for one, I've grown so much in this school. And it has helped me reach my community service goals. It has helped me want to learn about ways I can help everyone around the world and who are with me.

So I just -- IB is just an amazing program. And I truly believe Ms. Perea would be amazing in creating this school and making it come to life.

She has taught me to be respectful, to be a kind person, and to always reach for the stars and to never be afraid to learn. And she has truly been like my second mother. She is so caring. And I know that she's going to care for each and every

the parents that she is involved with. And so the Multilingual, I was hoping, but open, that we would move over there with her, just because of the teachings that she gives to her teachers and to the families that enter the school.

And as far as Mia is concerned -- Mia's comments about the IB Programmes and what the students will learn is spot on. And so my daughter is a well-rounded child who can go into public speaking and not be nervous about it, who can, you know, speak to an adult with conversation and not feel like she doesn't understand what's going on.

But if she doesn't, she has the strength and the ability to ask the question and to be able to say, "Can you teach me what it is that you're asking of me?"

Or, "What is it that you want from me?"
So on behalf of Ana, I am for The
Multilingual School. If it does not open this year,
my sister, who's -- my niece also goes to the same
school, and she does feel the same way as well.

So thank you.

MS. MELISSA BROWN: Next we have Sharon Sandoval. Going once, going twice.

Amberlee Fleisher.

person's child and be interested in how they are learning and making sure they're reaching their own goals no matter what they are.

So thank you. I'm -- that's it.

MS. MELISSA BROWN: Okay. Next Diane Kappus.

FROM THE FLOOR: Hi. Good afternoon. My name is Diane Kappus. It's K-a-p-p-u-s.

The ladies have brought me on to help in the real estate side. I wanted to let you all know they've been extremely proactive on that side. Even though, obviously, funding hasn't come, it's not in place yet, they've been very proactive.

We've met with the Santa Ana Star Casino to talk about leasing and purchasing. I have spoken with the Town of Bernalillo. So pretty much everything that we've -- we could do up until that point, we've done.

And I have no doubt that once their funding is in place and approved, we will hit the ground running in finding the school, their future perfect location, whether that's a purchase or a lease. But excited, and I'm here to show my support and answer any questions you may have regarding the real estate.

Thank you.

MS. MELISSA BROWN: Sam Landee-Thompson.
FROM THE FLOOR: Good afternoon. My name is Sam Landee-Thompson. L-a-n-d-e-e hyphen

I'm a retired research scientist. I'm not an educator. I am a mother and a grandmother, however. And I was unfamiliar with the IB approach until Ana Perea taught me about it. And I am very much in support of this school.

I wish it had been around when my daughter was going to school. I think she would have absolutely loved it.

But, anyway, I think it is important for our kids to learn to appreciate and to accept the various cultures around the world, various languages. They need to appreciate this to become a real citizen of the world. And that's what we need far more of at this point in time.

Thank you.

T-h-o-m-p-s-o-n.

MS. MELISSA BROWN: Next I'm going to bring up the first person who's asked for translation services. Claudia Zamudio. And I want to let everybody know that I'm going to pause the timer -- I'm going to have the timer going when

for students to actually develop and construct -- I'm so sorry -- develop on the learning and the topics that the curriculum offers.

The contents of the curriculum go hand in hand with the New Mexico education standards.

To summarize to the best of my ability, by merging the international outlook together with New Mexico standards and particular learning needs from each student, it really gives the student the ability to expand on their learning, as well as the cultural and language background, in this way giving the student a very well-rounded learning experience.

And it's, in the same way, such an honor to me to teach students in my native language, which is Spanish. The program is so rich that will encompass all the topics, and brings it down to a core topic in which the teacher expands upon.

I would like to provide a specific example about that.

I've been working for six years in an IB school. When we touch on our first interdisciplinary topic -- subject -- sorry -- which is called "Who We Are," we get to see how tradition really emerges from culture. We dissect each topic. And it touches into literacy, storytellers. Yes, it

39 41

she's speaking, pause it, let the translator translate. And then speak again, I will start it again.

FROM THE FLOOR: Good afternoon, everyone. Can you all hear me?

My name is Claudia Zamudio. That is C-l-a-u-d-i-a Z-a-m-u-d-i-o.

THE INTERPRETER: For the record, my name is Ali Marquez. That is A-l-i M-a-r-q-u-e-z.

FROM THE FLOOR: I've been an educator going into 30 years now. Working with the IB curriculum has been one of the most gratifying and impressive experiences through my teaching career.

I've been -- I've had the chance to compare the quality of this curriculum back to what I used to teach back home in Mexico, as well as curriculums that I got the chance to work with in Japan.

THE INTERPRETER: And -- I'm so sorry. Go ahead.

FROM THE FLOOR: During the time I lived in Japan, I actually partic- -- was part of an investigation, a scientific investigation, in the field of education. And some of the strengths I found in this curriculum specifically is the ability

touches into storytellers. We see science. We break down each topic in a way that it touches several domains. And these kids plays to expanding on the topic by each student (verbatim).

There are students from all over, from Spain, India, Germany, and, of course, New Mexico. And through this environment, which is very enriching to the students, because each one is bringing in their own culture, we are able to address the topic of -- that pertains to us at every moment.

I could keep going on talking about all the benefits and the good about this program. But I have to go. And I am in full support. Thank you.

MS. MELISSA BROWN: Okay. Okay. Calling up the second person who's asked for the translator, I believe it's Mary Ann Cortez.

FROM THE FLOOR: My name is Marina Cortez, C-o-r-t-e-z. And why do we want an IB school? A particular curriculum of this type of school not only focuses on academics; we focus on really developing the skills of the students and strengths of them, help them with their communication skills, build on their inquiry skills, become curious and open-minded, and being welcoming of different

•

cultural backgrounds from all over the world, so in that way, we can create a better world, a peaceful world, being respectful human beings -- I'm sorry -living things, and respect the spaces for other living things.

2.

We have to share the world. And in that part, we use the path. We use reading; we use comprehension; we use everything in one unit. We incorporate all the -- all the standards that we have to cover in that unit, in that time. But we are using -- we are teaching our students. We teach our students how -- how to learn.

As a teacher, I'm a guide so they can get to a place through questions, inquiring, to a final result as a collective.

It's in this way how -- how each student achieves their growth. And they learn to learn along with their teachers. Teacher and students learn together.

This curriculum takes into consideration the context -- the universal context. Each and every school and each and every student, if we could learn through curiosity, a curious mind, we would benefit from sharing each other's knowledge to create a better world. year at CIS, we do something called International Day, which is where everyone participates in celebrating our country's culture.

My mom is Claudia Zamudio. She was up here. She's a first-grade teacher. She (incomprehensible). And I really enjoyed helping her set up her boards and everything.

I did MYP for two years. And I -- the International Programme for MYP, it's a lot different than PYP. For seventh grade, we -- we were really just -- we were -- we were, like, learning about different cities. We did, like, a vacation project. And we were all -- it was, like, planning a vacation with a certain amount of money.

But for eighth grade, we actually learned a few English songs, and we performed them for the whole school and a bunch of families.

But, really, all I have to say about IB learning is it's incredible. I mean, they really taught me how to learn. Not only that, but I know -- I know how to take notes. I know how to study. I know how to do research. It's really -- it's amazing.

But, yeah, that's all I have to say.

MS. MELISSA BROWN: Okay. Next is Mandi

Thank you.

MS. MELISSA BROWN: Okay. Our next speaker is Michael Laranaga. I apologize. I butcher everybody's names. Be sure to spell your name, please.

FROM THE FLOOR: Good afternoon, everyone. My name is Michael Larranaga. L-a-r-r-a-n-a-g-a.

My experience with CIS has been amazing. Ms. Perea, she was my teacher in fourth grade. But now in that year, she's also been guiding me through my whole time.

I went through all of PIP -- PYP. And I'm going to high school this year. My teachers at CIS have taught me so much. And I'm also bilingual. I learned Spanish at CIS.

I was really excited to be here today supporting Ms. Perea. IB schools are, personally, like, the best school you could go to, honestly. Like, I wouldn't -- I wouldn't be bilingual if I didn't go to an IB school. I wouldn't be so culturally intelligent.

Not only that, but IB has taught me morals. I've learned so much about many different cultures.

At the end, close to the end of the school

1 Torrez.

FROM THE FLOOR: Good afternoon, Chair and Commissioners. My name is Mandi Torrez. That's Mandi with an "i"; Torrez, T-o-r-r-e-z.

I'm a former Bernalillo Public Schools elementary teacher for near ten years, and the 2020 New Mexico Teacher of the Year.

I'm not here in my professional capacity as a education policy advocate, but I'm here as a parent, a Sandoval County resident, and as a citizen concerned about the quality of instruction that our students are receiving, especially our most vulnerable students.

I want to make a couple of points today. And, first, I want to tell you about my oldest daughter, Ava.

She's going into fifth grade and has already said to me that she doesn't see the point of school. She says it's boring. While she is learning and excelling and has been lucky to have quality teachers, I don't believe that she is being challenged, nor empowered to see and reach her fullest potential.

She is also deeply disappointed that she doesn't get the opportunity to learn Spanish in

Too many of our students of color are not challenged. As you well know, the research shows students of color are especially not exposed to grade-level content, much less content that pushes their limits or incorporates their language and culture.

An IB school in Bernalillo could change that for so many students, when the Martinez-Yazzie lawsuit deemed to be receiving a less than adequate public education. And they could get that education locally, without busy parents struggling to make scheduling and transportation work.

The second point I want to make is about Ana. She's very persistent. The first time I met her -- you know, you hear a lot of leaders talk about, "Oh, I'm doing this at my school," and, "I'm doing all of these great things."

The first thing I talked to Ana, it was all about the kids. She talked about it being her dream. She was all about the kids. "This is what they need," and, "This is what they deserve."

And that's why I wanted to support her effort going forward with this school.

When she asked me to speak today, I thought to myself, I need to go through and see how special ed and IB work together. Then I thought to myself, I don't need to do that, because IB is set up to support students of diverse learners -students that are diverse learners, and IB really lends itself to that concept.

You know, each year, schools are asked to support students with learning, physical, sensory, emotional disabilities. And IB, through the IB curriculum, that support is embedded in -- in the curriculum.

You know, speaking from the special ed perspective and working with students that have various disabilities, I can tell you that IB has been set up to foster and to encourage and celebrate those diversities that our students have.

Let's see. You know, when I think of IB, I have realized that it's not just a way of teaching, but it's really a way of life. And through IB, I've seen that our students and my own children, who attend an IB school, have become global learners. They're more caring, they're more understanding of others, and they have the desire to want to know about others. And they have an

47

49

And I know this team at the table here will do everything they can to help our local students succeed, much like how Superintendent Montaño has approached his work with BPS. I want to give Superintendent Montaño credit.

And together, I think that The Multilingual International School and Bernalillo Public Schools and our tribal communities have the opportunity to partner in innovation, to raise the quality of instruction and fulfill the idea of collaboration, for which charter schools were first intended. It is only through communities coming together with new ideas and strong partnerships that we will be able to change the course of education.

And I believe an IB program will raise the quality of education for the Bernalillo and surrounding communities.

Thank you.

MS. MELISSA BROWN: Next we have Marisa Lopez.

FROM THE FLOOR: Good afternoon. My name is Marisa Lopez, L-o-p-e-z.

I've been working with Dr. Perea for the past ten years as a special education educator, and worked under her support and guidance.

acceptance that I don't see in other students.

And so I fully support this TMIS. Thank you.

MS. MELISSA BROWN: Next we have Fabiola Pacheco.

FROM THE FLOOR: Good afternoon. My name is Fabiola Pacheco. F-a-b-i-o-l-a P-a-c-h-e-c-o.

I have been a member of the dual language community for the past 20-plus years. I have served the bilingual education community in many capacities.

I'm the parent of two students who graduated with a bilingual seal. I'm a dual language teacher and instructional coach at the elementary level, and now serve as a bilingual coordinator at the high-school level.

Through all my years in the field of bilingual education, I have witnessed firsthand how English Learners who enter our public system and are given the opportunity to participate in a bilingual multicultural education program, BMEP, have a much higher chance of exiting EL services faster than those who do not receive EL and bilingual services.

What I have witnessed is direct proof of all the research that exists in the field. However,

Multicultural education is challenging, yes, because it requires a group of highly qualified teachers, administrators, state leaders, and supportive parents. However, there is no doubt that, with time, positive results will prove that it is an investment.

Multicultural and multilingual programs should not be a privilege. They should be a right. As proven with the Yazzie-Martinez lawsuit, we have seen that without proper services to our historically marginalized communities, we are allowing the inequity to continue. This is a reason we need to expand multicultural programs throughout our state.

To conclude, I would like to share with you a bit of data that I have gathered from my own bilingual high school seniors from this year, because it speaks of the positive results of having bilingual programs in the early years, since they set a solid foundation and close the achievement gap once they reach the secondary school years.

Out of my 64 recipients of the New Mexico

1 an IB school. So I was second --

> MS. MELISSA BROWN: Please spell your name.

> > FROM THE FLOOR: Oh. Thank you. Yes. Lisa Meyer, M-e-y-e-r.

And my own two children attended an IB school, and I have seen the power of what has been described by the students and the parents and teachers of that holistic education that really does prepare students for the future, and for being thoughtful, informed citizens, who really can take action in the whole inquiry piece that is being talked about, the power of that for their futures.

Another piece I think with the IB, is it is often realistically given access to to privileged students and families. And it's exciting to see the identification, with looking at Bernalillo and the surrounding communities, and how do we provide another option for parents and families to look at with that type of curriculum.

Connected with that, I do work with a local education nonprofit that provides supports for schools in meeting the needs of multilingual learners. And when we look at the IB curriculum and that it is built around a community context, and

51

State Seal of Bilingualism and Biliteracy, 67 percent of them received either dual language or heritage program language education either in elementary or middle school. All of these students, with the exception of three, exited ELD status before reaching high school, which rarely happens if

ELs are not given high-quality ELD services.

In addition, something equally important that I would like to emphasize is that 55 percent of these bilingual high school seniors graduated with a GPA of 3.5 or above. If this data doesn't speak to how important these programs are to our state where a huge variety of languages are spoken, I don't know

I urge you to support this multicultural IB school, as it offers students a unique opportunity, equitable opportunity, to represent us at the national and global level.

Thank you very much.

what else could.

MS. MELISSA BROWN: Finally, we have Lisa Meyer.

FROM THE FLOOR: Good afternoon. I am here as a parent and as a community member and educator.

First of all, my own two children attended

building that viewpoint here that's really looking at linguistic assets of our students, the cultural

assets of our students, and that being built into the foundation of the curriculum, and students experiencing that all the way through the grades is powerful and could make a huge difference for those students and for those families.

One piece I wanted to add connected with the charter is looking at the IB framework. It is powerful in the unit development that happens. And then our organization and our trainer team has had an opportunity to support multiple schools that have the IB framework in place that are also looking at the needs of multilingual learners and how do we provide the supports for all students to have access to the language, to the content, so they really can get to those inquiry pieces.

And I think it's exciting to see that the school is already considering that and looking at that closely early on, because that does not always happen, but it really is key for the school to be successful and to reach the high academic goals that they have.

So, with that, I am here just to support the school and to thank you for your time.

(Recess taken, 3:19 p.m. to 3:32 p.m.)

COMMISSIONER BURT: Hi. Thank you. All right. So, first of all, I just want to say -actually, I think we're three for three in women leaders proposing schools so far, which, once again -- yeah. So once again, I always -- as a female-dominated industry in education, we tend to have male leaders in education overwhelmingly. So always very happy to see women rising into these leadership opportunities in education.

And also to have people really being thoughtful and considerate of where they're wanting to put a charter school, which I do believe that this area is definitely in need of incredible great schools. And the idea of a multilingual IB program also just feels like it fits really well in the community as well, as, once again, something that's not easily accessible from anywhere north of I-25.

And so I'm -- I think this is a great idea. My questions are going to be about matter what we do, no matter how many activities we have. They don't feel welcome; they don't learn.

So the welcoming part. And that is going to be like going from a simple, "How are you doing?" "Show it to me." "How are you doing?"

It can be, especially if we are talking about with students who speak another language, that the language that we are going to -- the common language -- in this case, it will be English -- the common language, and then the target language, whatever that is going to be at the time, and just to let them know, to greet them. So -- "You are welcome. This is your classroom."

Then, after that, something so simple, like I will call essential agreement. "What is our essential agreement?"

And it's part of the framework curriculum we are talking about. We are here to learn. How we are going to learn it? How do you see learning? How do you hear learning? It's a concept. It's even hard for the adults to express how do they see something or how they hear something.

So it's the first thing that they do besides anything else, the welcoming, the essential agreement.

55

57

specificity, because I do think that's one thing that I felt very lacking in what I was reading is the specifics.

So I'll start with, just in general, what a day -- you know, your -- you have kinders. What does a day look like as a kindergarten student at this school?

And if you can be specific as just a general -- a general education student, and then maybe -- I read that you're doing full inclusion on everything? So maybe what that might look like for a general education student, a special education student, and then also an English Learner.

DR. ANA PEREA: Okay. I need to take all the notes.

COMMISSIONER BURT: That's no problem. Yeah, I don't mind.

DR. ANA PEREA: Well, a typical day, as a general education, it will be a kindergarten welcoming.

And before anything else is this greeting into the classroom. They welcome into the classroom. I always say -- and I notice in my personal experience with my daughter, is if they don't feel welcome, they don't learn, period, no

We need to identify who are the students that we have, which some of them are language learners, some of them are speaking English as a first language, or Spanish, or Pueblo. But it's a typical day, the welcoming, the essential agreement.

And we start the inquiry with simple questions. What do we want to learn? Why do we want to learn? Where we are going with this process?

And that's when the inquiry starts. A kindergarten child, by nature, is curious. And that is our inquiry. Everything that is around us is going to be for the inquiry. And from there, we develop. I don't know if you -- if I answered your question.

And when we talk about inclusion, we are talking about all the students. There will be students that will probably need to be pulled out for different reasons. And we will see it at the time.

But it is so vital -- I cannot stress enough how important it is that the kids be in the classroom learning with the teacher and collaborating with the rest of the students. That is even going to classroom management, because the

COMMISSIONER BURT: Okay. And what does the language acquisition look like in a day? Is it -- are classes taught in Spanish? Are they taught in English? Are they taught 50/50? Is there a scaling part to it? What does the multilingual part of it look like?

DR. ANA PEREA: Okay. We are going to start it with the 50/50 is what we are thinking of it, right? But it depends -- we don't know the students we are going to have. We have to check that.

But part of the 50/50, it depends. Because the whole -- the whole transdisciplinary theme of the whole topic of the whole unit, if you want to call it like that, it will depend what we have there. And we are going to scaffold according to what we have. We definitely have to make an assessment of the students that we have when we have them.

COMMISSIONER BURT: So what is kind of your elevator pitch to families? When I have -when I talk with people who want their students to be in a bilingual multilingual school, they're kind

program, definitely. And we are going to see the basis. It can be any of the subjects. It depends the subject.

It can -- this is what is difficult to respond, because it depends of the population that we have.

But we are going to do it at 50/50, and we can do it in mathematics, or we can do it in language arts. And, remember, because the curriculum framework is cohesive, so it's going to embedded over there.

So how it's going to be it? We are going to have the people who are bilingual, biliterate, of course, by myself. I'm even having a hard time right now, what exactly she's asking me for.

We are going to do a 50/50. Could be any of the subjects. That's why we are also going to have guided language accusation designed to ensure that all our students is going to receive the academia that they need, if it's what I'm answering.

COMMISSIONER BURT: That's going to be specific to Spanish? Because then I'm going to also ask for what does that look like for -- because I know the pueblos around this area have Keres, Tewa, Tiwa, Towa.

59

61

1 of looking for specifics, not, "We're kind of thinking we might do..." -- you know, like, I --2 3 what would you tell a family who is 4 English-speaking, and they want their student to be 5 in -- to be bilingual through attending their 6 school, like, they want them to learn another 7 language, what would you tell to an English-speaking 8 family?

> DR. ANA PEREA: I would say come to us, because it doesn't matter if they only speak English at home. They are going to learn with us. Validate the language. The community is very important. The families are very important. They are coming to our school, and we are going to collaborate.

They don't have to be present every day. Families work. They have many things to do. But the validation of the language is very important. And when they come, we are going to teach them.

COMMISSIONER BURT: So how? What's the specific? Like, if -- to tell a fam- -- like, that they're going to and how?

DR. ANA PEREA: What do you mean? (Spanish spoken.)

Or what of the language is used. Well, we are going to do the 50/50

DR. ANA PEREA: Absolutely. That's an excellent question. Thank you for asking me that, because that is what we've been talking about it. It's absolutely imperative that the community comes and give us a guidance about what is the curriculum, the pedagogical approach that is relevant for the students.

I am native from Central America. And you can see me. And it's different than the Native American pueblos here.

So we need to receive the guidance from them about the curriculum and what is the pedagogical approach that is relevant for the students. Absolutely.

And we are working on it. We have contact people from the education departments. Yes, we have done it.

COMMISSIONER BURT: Perfect. A lead-in. Could you talk a little bit more about that, about the work that you've done with those communities or with people -- like, what have you heard already?

DR. ANA PEREA: We are having conversations right now. I have done it in -- let me see if she's here. I haven't seen her.

Melanie? She's not here. Okay. She's

not here. I'm sure it's for a reason.

We have been talking to them about it, the director of the Department of Education of Santa Ana and San Felipe. We have approached them. And, well, we have some community members here that they came to hear about our school. We are in the initial conversations.

But this is taking time. And it should be in that way, too, because many of those languages are not written.

So we have -- we are waiting for them. We have approached them. I had a conversation with them.

COMMISSIONER BURT: Have you had any community meetings in those areas?

DR. ANA PEREA: No, it's our next step. It's why I've been exchanging e-mails with them.

COMMISSIONER BURT: And what do you have -- so I know one of the other challenges, when it comes to multilingual anything is the teachers. What is your plan -- it sounds like you're pretty well connected with maybe Spanish bilingual teachers.

DR. ANA PEREA: It's in my nature.
COMMISSIONER BURT: It's in your nature.

look at.

2.

Another example is they talked about how they've been working on -- they don't have a set curriculum, but they've started to work on one, and they would like to work partnering on making that more formal. So they're already giving us ideas on ways that they're working on some of these ideas. They just need a little bit of work partnering with someone.

So these are ideas that we are beginning to talk with, and we want to develop the partnering with the pueblos. So we just need to make those more formalized. But it is things that we're working on.

COMMISSIONER BURT: Okay. One of the things I really like about the idea of this school, probably the most, is I think oftentimes when we think of bilingual education, it's an "or" statement; right? Like, students can be in bilingual education or AP or IB; right? So, like, having both combined, once again just reinforces that idea of, like, students need access to rigor, and they need access to high quality education, to opportunity. And it can be "both/and," not "or." And so I -- I truly think that, like, the

But also in your career; right? That's been what your career has been in.

But what is your plan for not just Spanish bilingual teachers, but Keres, Tewa, Tiwa, Towa teachers at your school?

DR. ANA PEREA: Well, again, we're still in the beginning of the conversations, and it's something that we have to talk about it, because we need them. We need them, and it's not a choice at this point. Sorry.

DR. BRENDA ARELLANO: If I could also add. In some of our early conversations with, like, some of the education directors in some of the pueblos, they've been giving us some really good information about, like, some of the language models that are already happening within the tribes and the pueblos, and even directing us in some of the language models that we could be modeling after they've been directing us.

Like, one example is they directed us to one of the Keres models that's already happening in one of pueblos. They said that might be a good language model we could look at and possibly adopt.

So they're already helping us to think through, like, these are possible models we might

combination is really special.

I've noticed in your application that you put that you wouldn't be able to provide transportation. Can you talk through that decision a little bit more, because I do -- we're -- that's something that I'm very concerned by.

DR. ANA PEREA: Me, too. We have -- I have contacted two -- what it calls? -- contractors now, and we are in conversations with them. So it will happen.

Also it is in my understanding that it's a possibility that one of the pueblos, who has purchased their own buses, to ship the students to all the schools at our Bernalillo Public Schools. We had that conversation, too.

So, yeah. But it is in our mind. Believe me.

COMMISSIONER BURT: Okay. So right now in the application, you put "No," because that's where you're at. But you are -- the goal is to figure out some way to do transportation.

DR. ANA PEREA: Absolutely.

COMMISSIONER BURT: Year one? Or is it we'll start year one and figure it out later?

DR. ANA PEREA: Year one. It's a priority

for us. That's why I've been approaching some contractors; private contractors, too.

COMMISSIONER BURT: And I know with the geographic area of who would -- who I would love to come to your school. I imagine it being more challenging than, like, a metro-area charter.

But I think that's actually why it's more important is, because it's so geographically wide, it would be hard for parents.

DR. ANA PEREA: It is vital in our plans. Believe me. We are.

MS. MAYRA VALTIERREZ: Yeah. I think just to add, I think there are a couple of transportation providers in the area. And they know all of the routes. But I had advised Ana to hold off, because you have to go through an RFP process and all of that before really solid conversations happen.

COMMISSIONER BURT: Okay. Then I think my last question that I'll ask, and then I'll let the rest of you go, is I am -- I am wondering what the -- so I know that in the application, you put kind of your steps towards getting to where you have high school actually attending there. And that probably won't be until year four our five, where you would actually have high-schoolers.

the accreditations. As a matter of fact, in my understanding, to graduate here in New Mexico is 24 credits. We are approaching 27.

COMMISSIONER BURT: All right. That's all. Thank you.

THE CHAIR: So I'm going to build a little bit on what Commissioner Burt just asked, because this is a five-year contract that you sign if you're approved. And it's contract negotiations for us to be able to show, through the five years, what you're going to show us.

So it is concerning that the build-out wasn't there, because even though you may have hopes and aspirations, we can't vote on hopes and aspirations. We have to vote on concrete information. And that -- that piece was missing.

I am a full supporter of the IB Programme. I think it's -- it's a fabulous program. And I think the whole concept of developing that whole person and the students getting themselves ready and doing the presentations of learning that they build on throughout the year and have to support the work that they do, I think that's invaluable as they move on in life. So I am a full supporter of that.

I've been fortunate, on the Commission, to

But the lack of inclusion of what that high school program looks like is really concerning, because we are approving the high school right now as well

So can you talk a little bit about what the -- what might be different from high school than what is being done in that -- in those elementary and middle school that we can see, how does the bilingual and IB Diploma part kind of intertwine at that time? And why did you come to the decision to not put that plan in now?

DR. ANA PEREA: Some of that is because in the first three years, we are talking about K to fifth. And it was actually plenty of time to develop the other ones.

The Primary Year Programme, as you know, that is K to fifth, build into the Middle Year Programme. All of them have the accreditations and subject and content core that is necessary for graduation. The DP program, or the Diploma Programme, is something that comes until literally the fifth year. And it's why we just focus at the beginning of it.

But I guarantee you that is part of the -- the framework that is going to being, and have all

see a school that -- in Taos, that serves, you know, very marginalized populations and severely underserved populations. And they changed themselves into an IB Programme to literally save their school. No doubt about it.

It has been a huge lift. And it's also been very expensive. There's no doubt about that.

And I paused quite often through the application, because there were comments made, or answers -- responses that were made that said, "Well, we have a plan." But I don't see the plan.

You know, there's a full plan for how the IB is going to go. But then it's -- it's not there. I know how IB is supposed to work. But we're looking at how are you going to do it?

And when we looked at the -- and my next question is the assessment piece.

You provided a link.

Oh, here's the detailed link to PED's assessment. That's not what we were asking. We were asking how are you going to do it, not just give us a link to what PED says, "Oh, here's the assessment plan that should be."

So I -- I'm not sure if your intention is to do additional short-cycle assessments, because it

DR. ANA PEREA: Let me answer the last one just right away, the last question right away. What -- can I just --

THE CHAIR: So in your assessment plan, is your intention to do additional short-cycle assessments? Or are you only going to do the -- I know you identified it for the littles, the Istation and iMSSA. So you're just going to do NM-MSSA and iMSSA?

DR. ANA PEREA: We are going to do those ones, and we are going to do i-Ready and Istation.

THE CHAIR: Right. I said the littles, you're going to do the Istation with. But as you build out --

DR. ANA PEREA: Well, those ones -- do you want me on that one, because it's just --

MS. MAYRA VALTIERREZ: So the assessment system -- so Istation is not just for the littles; it actually offers up to the higher grades. That's how you can use it as a short-term cycle assessment.

THE CHAIR: Okay. Because that wasn't clearly identified through that. Because it was just, once again, the link, "Here's the NMPED," doesn't link to Istation once you get out of the

because I don't -- I could not identify in there the IB supports in that budget.

DR. ANA PEREA: Okay. We were very conservative regarding the budget, and my humble apologies for that. It's something we are working on it. Again, I know that this is a plan for five years, K to 12. Thank you for that. I really appreciate that you're watching that.

We have consulted with our future business manager, Rebekah Runyan, that you probably are getting familiar with her, and precisely this yesterday and this morning, we were talking about

So it will be, and it will show clearly our budget plans over there.

But, yes, we started a little bit conservative on it.

THE CHAIR: But -- so you're asking us to take the chance that you're going to be able to afford it. Because it's not shown in the budget that you're going to be able to support the program that you said you're going to offer.

So that's what -- so to me, that's the challenge I have.

DR. ANA PEREA: Yes. The IB Programme

71

littles.

So the -- so then my -- so then I have an additional question with that. Because PED provides, I do believe, the Istation for the littles, but not as -- it's an option that you'd have to opt into and pay for. I didn't see -- I didn't see that in the budget.

DR. ANA PEREA: We will. We will approach it, but remember, as we say, in the first three years, or just the elementary. So we will approach, and we will have to pay for an additional --

THE CHAIR: But see? Once again, it's a five-year contract.

DR. ANA PEREA: I understand.

THE CHAIR: So we're not just -- we're not just approving a K-to-2 or a K-to-3 school. We're approving a K-to-12 school. So we need the plan on what's going to happen through the five years of this contract.

And the -- you know, there were -- there were a lot of challenges with the budget. I'll be honest. The budget was missing a tremendous amount. So I'm not really clear on everything that you're --I can't say, looking at this budget, that you're solid with being able to do what you want to do,

doesn't start until probably the third of the four years, if not, after the fifth year. We are going to nurture the program with volunteers that I already talked to them and myself. I am IB-trained -- training. But there is nothing to buy it right now.

THE CHAIR: So there's no professional development that's going to happen that is going to -- that you --

DR. ANA PEREA: It will happen, professional development, absolutely. But if you are referring to the IB Programme right now, because it's something that is going to be nurtured, and it's going to take time. It's nothing to buy right now for the IB Programme curriculum framework, right now.

DR. ANA PEREA: But it will, yes. THE CHAIR: And that's what I don't see. DR. ANA PEREA: It might take more than five years to do that. We are going to start it nurturing from now. But it's nothing to buy right now. That's why it's not included on it. I cannot give you a specific amount right now, because there's nothing to buy right now.

THE CHAIR: But there is going forward.

22 23 24

We are going to start the process -- and it might take -- I'm sorry. I'm sorry. I just got so excited. It might take more than three years to do that. It's why it wasn't showing there.

2.

THE CHAIR: So that creates an additional challenge, because you're asking us to approve an IB program, but it may not even happen through the life of this contract; so -- so that's -- so that's -- you know.

DR. ANA PEREA: We are not going to be candidate until later on. We don't start an IB school just day one. We are going to train our teachers. We are going to -- I'm working on it. I have many hats.

So one of my hats is -- one of my hats is that one. But we are not going to start to be a candidate and purchase anything that is necessary until probably day -- I'm calculating the three, four, or five. It's why it's not there yet.

But the teachers are going to receive -- and I guarantee you -- the professional development that is needed to be a candidate for an IB school. That is no doubt.

THE CHAIR: But once again, I don't see it in year three, four, or five. This was supposed to

And to follow up on Chair Gipson's point, when I look at Page 60 of 70 on your application, and as you move through the five academic years, and you're looking at supporting it, I taught in the DP program, eleventh and twelfth.

And the eleventh and twelfth program is very complex. Not only do you have your little Seven Circles, but you also have Theory of Knowledge; you have Extended Essay; you have Community Service.

And I don't know how, with 24 students in eleventh grade and 24 students in twelfth grade, how your budget could handle that, let alone the cost of the DP-required tests in order to get your diploma. That's a huge, huge expense.

And when I look through the process of the five years, it appears your expectation is a person who's in first grade in the first year will not matriculate out or move out of town or anything like that. You just have 24, 24, 24, 24.

People do not go in and out -- I don't know the plan of how you will acquire -- because it's five years, how you will acquire sixth, seventh, eighth, ninth, tenth, eleventh, twelfth students in a Middle Year Programme, in a Diploma

be a five-year budget for the five-year contract. So that's where -- and then when you just said, "We don't know if we're going to be there, it may take us -- it may take us longer" -- and I'm familiar with -- with the rollout of our other school. And they incurred expenses very early on, and a commitment, and they had folks coming in to regularly check on their progress.

DR. ANA PEREA: I am leading right now the reauthorization in the program -- the progress of the current school that I work. And I know exactly how the process is, because I am the one who is leading the process. And IB is the one that is going to decide when they are coming and when we are going to do it.

Like I said before, it's the reason why. But if you want it absolutely, we are going to work on that. It is no doubt that we are going to do it.

THE CHAIR: Okay. I think I'm done for now. Beck?

SECRETARY BECK: Yeah. Hi. I'm excited about an IB school. I taught IB for eight years, the History of the Americas at Sandia High School, when we started an IB Programme about ten or eleven years ago.

Programme, which are very complex.

We dealt with it at Sandia. The learning curve of taking somebody who was in an MYP program and throwing them in a DP program and expecting them to compete with all these students around the country that had been in a twelve-year program. It just doesn't seem -- I mean, from my logic of knowing what the IB Programme is, it seems like you're rushing what would be a logical twelve-year plan into five years.

It really concerns me. And it concerns me about the success, on your fourth and fifth year, of these students who are getting into the DP Programme. It's really concerning to me, let alone the budgetary issues, forgetting the budgetary issues. Just the pressure on those students is monumental. I mean, it -- have you dealt with that? And it was severe problem.

DR. ANA PEREA: Yeah. But I think -- but you have all the right to be concerned, and I really appreciate that you are asking those questions.

But think about it like we were saying -- and I don't know if I have explained myself well on this.

By the year fifth, that is when we have

the eleventh- and twelfth-graders, we probably are starting, at that point, the IB certification. So it's highly possible that those students haven't reached that at that point.

25

So I understand the pressure. And if they are there, and we can reach it, fantastic. But at that time, it won't. Because IB will not happen one day to another one. We will nurture the students, and we will scaffold them to where we want to have them.

SECRETARY BECK: Back to the chair's points, for the last hour and a half or two hours, we've been being sold -- and on the application, we've been being sold on an IB Programme that might not even happen during this five-year contract.

Am I understand- -- am I understanding that correctly? That --

DR. ANA PEREA: Say it again.

SECRETARY BECK: For the last two hours and through the process of the last two months and reading your application and going through the analysis of that, it was all based on the IB Programme.

DR. ANA PEREA: It is.

SECRETARY BECK: But yet for the five-year

that way.

24

25

SECRETARY BECK: So those 24 students in eleventh and twelfth grade in year five might not be in the DP Programme; correct?

DR. ANA PEREA: That's true. That is reasonable, because it's not going to be one day to another one. It's not possible.

It's challenging. As you know, as you're very knowledgeable on that, it is very challenging. So I can not guarantee you that the eleventh- and the twelfth-graders are going to be DP graduates by that time.

SECRETARY BECK: Will the first through fifth graders, by the fifth year, be in the MYP program?

DR. ANA PEREA: Say it again.

SECRETARY BECK: Will the first through fifth year in the academic program be in the MYP program? I'm asking in year five.

DR. ANA PEREA: In year five.

SECRETARY BECK: Will the first through fifth graders be in the MYP Programme or -- go ahead.

DR. NICOLE MONTAGUE: You're saying for the first -- asking if they start in first grade, in

79

81

contract, we might not even have an IB Programme.

DR. ANA PEREA: No, no, no, no. Don't get me wrong. This is not my intention that. But it take -- what I'm trying to explain to you -- and maybe, Nicole, can you help me on this. I feel like that I'm in the same circle right now is how I'm feeling -- is that it's not happening in one day to another one. This is something that is going to be nurtured.

So when we have the students coming and approaching, and we are guiding them to our IB Programme, to transdisciplinary themes, to interdisciplinary themes, those students, this is guiding. This is in a spiral that is going little by little, little by little.

So it's not going to happen that the eleventh- and the twelfth-graders are going to be in the Diploma Programme so far.

Maybe at that time -- at that time, we are just starting the certification. Maybe at that point, we are just at the evaluation, and the evaluators are coming to see how we are progressing in our program.

This is not that we are opening and we are, right now, IB school. It doesn't happen in 1 five years, they would be in sixth grade, and, 2

thereby, they would start the MYP Programme; right?

SECRETARY BECK: My question is, in year five, will you have an active MYP program -- I'm

sorry -- PYP program in year five?

DR. ANA PEREA: Yes. Yes.

SECRETARY BECK: But you might not have an active DP program by year five.

9 DR. ANA PEREA: By year fifth, yes, a PYP, 10 yes.

> SECRETARY BECK: No, they won't? THE CHAIR: Yes, you will? Or yes, you

won't?

DR. ANA PEREA: Yes, we will.

SECRETARY BECK: You won't have a DP.

THE CHAIR: I think people are hearing two different things. Will you have a DP program, or you won't, in year five?

COMMISSIONER BURT: He asked PYP.

SECRETARY BECK: I asked at the end about a DP program.

DR. ANA PEREA: Yeah. So we -- this is -for -- at the fifth year program -- I want to be clear that I not misunderstand -- understood. So by the fifth year, it's definitely that

2.

we probably are already candidates, if not in the process of recognition, to be an IB school. But we might not have the eleventh- and the twelfth-graders, at that time, to be in the DP program. It is possible, because as the nature of the curriculum frame, it's, as you know, demanding. SECRETARY BECK: I do. So let me ask you real quickly. DR. ANA PEREA: Yes, sir. SECRETARY BECK: In year five, will you have a PYP program? DR. ANA PEREA: Yes. SECRETARY BECK: Will you have an MYP program? DR. ANA PEREA: Yes. SECRETARY BECK: Will you have a DP program? DR. ANA PEREA: We will be in the process. THE CHAIR: Commissioner Brauer. COMMISSIONER BRAUER: Thank you, Chair. Move it over this way. Always leaning into you. Thank you, Dr. Perea and team. Thank you so much for all the effort that you've put into this. I know there was an extraordinary amount of

opportunity for schools of choice in the area, the surrounding area, that you want to serve. And so kudos to you all for bringing this up.

I have a few questions. One question just -- I'm not going to belabor what Commissioner Beck already asked. But I just have a quick question.

Is that normal practice when you open up an IB school to do how you're explaining it? How you're going to be an IB school in name, you're going to be an international school, but it's going to take several years to build up to the different programming that you're going to be doing.

Is that normal practice, or is that your choice practice?

DR. ANA PEREA: Yes. No, no. It's -COMMISSIONER BRAUER: Did Corrales
International do that? Did Puente de Hózhó School
in Flagstaff do that? Like, they opened up? But
like, their IB partnership, IB International or
U.S.A., whatever the conglomerate is, do they direct
you, "You're in name only," and then you've got to
go through a process?

And then a couple of years later, you're going to open up the little ones' IB program, and

work that goes into a charter application, and I am thankful for all the work that you did.

And I'm also very thankful for having the young leaders who came up and shared and expressed their -- they're good graces about you, specifically, Dr. Perea, and the IB Programme and how it's fundamentally supported their learning as leaders.

So congratulations on that.

I am also a big fan of IB. I don't have near the experience. I live pretty much vicariously through our schools and from friends that have educated me about the IB curriculum. And so I do feel like it's a -- it's a really good opportunity for -- for young people to have that as an option.

And I think about the area in which you want to serve. I think it's something that could be very valuable for many of our students in the community at large.

There is no charter school in the Bernalillo Public Schools area. I think there hasn't been one for a while; right? There was one at one point? "Desert," something, like a decade ago, probably.

And so I do think that there's an

then you're going to graduate up to the diploma. I just want to hear how that process works.

DR. ANA PEREA: It is a valid question. I'm glad that you did it, because it's an excellent question.

Yes, it is a normal practice. So what we have -- as you notice, some of the speakers are actually IB trainers. They have been in contact. I have contacted already IB International, including the -- the original manager of it.

And it's the conversations that we have. So it's a normal process that is not going to be, "I'm opening an IB school, and it's open right now, and we -- voila, suddenly we are IB."

It doesn't happen in that way. It's a process, and that's what I've been trying to explain, and I think I failed.

So, for example, in my experience -- and Corrales International School, actually, that I'm the vice principal right now, is exactly the same thing. We started with two grades, I believe, two or three grades, and 20, 24 students, challenging, absolutely, totally understandable.

And we started conversations with the International Baccalaureate organization is what I

already started, and talking about the trainers.

In this case, it's -- I won't say that it's easier for me because I already have the contacts. I would say that it's more approachable to me, and I know exactly who I have to call, the regional managers that I have to call, the trainers that I have to call that they were in Zoom, and all of those ones used to start the conversations on it.

So, yes, it is not my choice. It's built. It's a challenging build. But our kids deserve it. And Bernalillo kids deserve to have a program that involves all of the -- a holistic program that teaches them how to learn during learning.

So, yes.

COMMISSIONER BRAUER: Great. Thank you.

My other -- another question that I have is around community support. And I know that your school is -- you're interested in having the school in the Bernalillo community. But Bernalillo also supports multiple communities throughout Sandoval County as well.

And I do -- I do have a little bit of trepidation, Dr. Perea and team, that there were no tribal council members, anyone from the governors' offices, that came to be here today.

I hear that there was a community here behind that came to see what we were going to talk about.

And they seems very exciting for a choice for their students. And that's when we learn that they didn't have those choices, and that's why they believed that it was better to ship the kids to other charter schools out of the district.

So, yes, we have been in conversations. I keep sending e-mails. We have contacted nonprofit organizations, Native American nonprofit organizations, too, that are willing to support us, too.

In the next weeks, months, we probably start gathering community in public places here in Bernalillo, if this come true. And we will enter into the MOUs that are so essential for it.

COMMISSIONER BRAUER: Thank you for that.

So I think that, you know, my personal opinion is that a lot of those conversations -- and I understand about outreach and continued outreach. I get it. I get it for sure. And I think my -- my thinking here, similar to the budget, having a very clear, cohesive budget, I think having a very cohesive and already actioned-out plan for community -- community outreach, I think, is

I do wonder about the extent to which you have done outreach to different communities so far. That is something that's fundamentally necessary and required, especially if you want to have language from individual communities in your -- in your program.

There is a process there that you -- and protocols that you -- that you, quite frankly, have to follow, and ought to follow, as a member of the community.

So I'd love to hear a little bit more about the outreach that you've done so far to different pueblos and tribal communities.

DR. ANA PEREA: Well, we have contact and have Zoom meetings, because it's too far to go places; but so meetings with the communities. And we have approached them.

I directly contacted education department manager and the education department -- public education directors of -- two of the pueblos respond. I have sent -- we have sent, I'm sorry -- the e-mails to the other ones, too. But only two of them respond, and they have been very interesting on it

I'm surprised that they are not here. But

something — is essential. I think for me, there is a difference between coming to a meeting and getting informed and come creating something together and collaborating something like a new program.

And, so I just -- I challenge you-all to think about how are you co-creating a model with community whom you want to come to your school. If it's just informing them to come and -- that's an old school charter model, like, "We'll tell you-all how great this school is, and you're going to bring your kids into it."

We just know that doesn't happen anymore. That may have happened at the very beginning, and that's one approach. But we know now it's really about co-creating. And I'll speak for myself.

And I think that's an opportunity that you all have is to think about how are we co-creating this model, especially if it's something that's different than maybe has existed in the communities in which you want to serve.

Like, an International Baccalaureate model, this sounds different than maybe what has been available to many of our families. And so I think it's of even more importance to have those conversations and think about it from a -- like,

moving from an informational to a, "Let's co-create and collaborate and build something together that's really going to be rooted in community."

2.

Especially when you're thinking about a multilingual school, I see that as something that is really -- really important.

So I think that uniquenesses and innovation component of your school, I love that part. And I think that, for me, my -- my thoughts and my challenge is, like, how can you create that uniqueness and innovation that's going to be deeply rooted into the community.

Let me see. I had one more thing.

In terms of your facility, could you just explain a little bit about, like -- just give me, like, a minute or two of what you're -- what you're thinking about your facility and what options you're thinking about right now.

I know there's potential land available. But I just love to think how you're thinking about that.

DR. ANA PEREA: So, Diane, could you give us an -- but we have a -- yes, please. Come on up.

MS. DIANE KAPPUS: I was just going to say, my part comes in once we have the approved

leave. But thank you for all the information.

DR. ANA PEREA: Thank you for all your questions and make me think about it. I'll take a note on it, and you will have an answer for it. Thank you.

THE CHAIR: Commissioner Carrillo.

VICE CHAIR CARRILLO: Thank you. Thank you very much for coming. Everyone who came to speak on behalf of the school, thank you as well. And, Ms. Perea, you're obviously held in very high esteem by the people in your educational community. So very happy that you're here.

So to build on -- to answer -- since Tim is still sitting there, when we opened the Mandela International Magnet School in Santa Fe, we started -- which has done very well. It almost -- it almost didn't.

But we started with grades 7-8 -- yeah, 7-8 and 9-10, year three, the DP program. But one of the biggest challenges we faced -- and I'm curious if you've thought of this of what -- thinking about this -- is it required that kids be participating in the IB and then the DP program, should you get to, like, year five and beyond? Or is it optional?

budget, like you've touched on. Once we have an approved budget in terms of the real estate, we can back into it. But I'm sure that Ana can speak more to it in terms of theoretical and what her ideas are.

DR. ANA PEREA: My ideas are we have met with Realtors locally who are here right now. We've been having conversations about places to lease, ves.

We -- but, again, without the authorization, it will be difficult.

But yes, we have established conversations with that. And I have contacted -- precisely, last week, I was talking to them about it. And there are a lot of spaces to lease, apparently. Yes.

COMMISSIONER BRAUER: And would that be -would that be, like, open land? A place -- you
know, modulars on? Would that be -DR ANA PEREA: It depends our first

DR. ANA PEREA: It depends our first students. But, yes, we have open land, and we have space that it can be.

COMMISSIONER BRAUER: Thank you.

DR. ANA PEREA: Okay.

SECRETARY BECK: I apologize. But I have a 5:00 finance meeting in Albuquerque, so I have to

And the reason I ask that is because we had a lot of people lotto into the Mandela school. And, basically, they were just looking for a small school. They didn't care about IB. And we found that out the hard way. And then those people matriculated out. And people that really were there for the rigor came into the school.

What are your thoughts about how that -- how are you thinking about the extent to which -- I don't want to say "mandatory," but they know they're coming to this school because of that.

DR. ANA PEREA: "Mandatory" is a big word. It's one of the biggest words that -- I understand. We've been thinking about it. But PYP is going to be -- the students who want to be in our school are going to be part of the PYP program, K to fifth. Middle school, also.

We -- I don't want to use the word mandatory, because it imposes to those students who might not be ready right now. But with time and with our effort and with our showing, and the communication with the community, we expect that all of them participate of the programs.

So I will not use the word mandatory yet. VICE CHAIR CARRILLO: No. I understand

I have notes scattered about and am crossing them out as I go.

I want to echo what Commissioner Burt said. I see the need, absolute need in this area in this district for this school. It's going to fill a void. It's definitely unique in terms of what our charge is as a Commission in looking at a school's uniqueness and innovation and serving kids.

And there's nothing like this happening in the area. It's just Corrales; right? Or if they want to just commute up to Santa Fe. But the odds of getting in Mandela would be slim to none.

So I just want to tell you that straightaway that I have the same concerns that Chair Gipson has relative to -- it's a five-year contract, but you're asking us to take, on faith, what's going to happen in those years after year four, building the IB Programme and, especially, the Diploma Programme.

And it's -- in my experience on the Commission -- and I've only been there three and a half years -- I've learned really early on take nothing on faith. Hope is -- it's nice to have hope, but hope is not a strategy; right?

your work with these kids. Obviously, you're very inspirational, the fact that they're here and they're succeeding.

But managing and leading people and a staff are two -- they're different things; right? And what I have found in my time on the Commission is the schools that struggle sometimes, they have a leader and a founder who's inspirational in the beginning, but they don't have necessarily the skill set to manage all of the staff and everything required to run a school.

Why do you have that?

DR. ANA PEREA: Why do I have that? VICE CHAIR CARRILLO: Because we are signing it. This is --

DR. ANA PEREA: I am doing it. I am here. We have to agree that sitting in front of you is not easy. I'm doing it right now.

I have the skills to come and propose this school that is going to be amazing and ask you, respectfully, to consider it.

I am a leader. I am here for my students, even those ones who I don't know them yet. That's why I have the skills.

I have, obviously, the academia. And you

95

And it's -- it's a challenge. And there's a reason this process is as rigorous as it is, because, one, I mean, you think about a school getting -- you know, by the time you're in year five, six, seven, whatever it may be, a million and a half dollars a year or something, and you have our kids. So it's a huge responsibility for us to approve.

So I'm concerned about, again, this five-year contract without knowing that much about what's happening, really, in years five and beyond --

DR. ANA PEREA: But it's --

VICE CHAIR CARRILLO: -- in terms of just having it in writing that I can look at. Because that's what we judge our vote on in August. It's this. It's having -- because there's going to be a contract that we all have to abide by.

DR. ANA PEREA: Yeah.

VICE CHAIR CARRILLO: So I just want to express that I share that concern with Patti. You addressed it with Patti. But I just wanted you to know -- with Ms. Gipson -- that I wanted to share that concern.

Regarding you, so we've heard a lot about

probably already read what I was bragging about it. I don't like to write about me. I don't refer myself to Dr. Perea. I am Ana Perea. I am one of them. Also, obviously, you can hear my accent. I'm one of them. I know what is the beginning and how it goes, the whole spiral.

I have the skills to do it, not because I have the academia. I have the skills to do it because I lead those ones every day.

And one example is being here with you. So, yes, I am.

But if I'm not the right person for it, it's okay. We are going to have this open for anyone who can qualify. And if he's better than me, and he has IB training, and he has everything that's needed, go for it, because this not about me. It's about our students.

And for sure, that I'm going to be checking on them that they are doing the right thing. That is not a doubt.

VICE CHAIR CARRILLO: I understand. In Corrales, are you in a role where you hire and coach and discipline and fire? Do you have that role at the Corrales school right now?

DR. ANA PEREA: I am the vice principal.

I am the curriculum coordinator. I am the bilingual coordinator, and the Diploma, once in a while. So I've got many hats.

If it is necessary we have to do it, our responsibility is to hire the best person for the job. And if that requires to let someone go because it's not performing, so be. And that includes also me

VICE CHAIR CARRILLO: Yes.

DR. ANA PEREA: That includes me.

VICE CHAIR CARRILLO: I'm glad you put it that way, because I think one of the biggest challenges, certainly, in Santa Fe, but in New Mexico in general, is if somebody has been in a school building for so long, two and a half or three years, or even longer, they can just barely just meet expectation.

And I know in Santa Fe, it takes three years to fire somebody, because they're protected by the union. And as long as there's something in their file that says "Meets Expectations," even though they might be a poor teacher, too bad. It's like tenure, but not.

I liked when you said, "So be it." If somebody can't cut the mustard, then you recognize

And you're going to need seven of them, five legally and everything else. But if you want to have subcommittees and all, seven is a good number.

DR. ANA PEREA: We have five so far.

VICE CHAIR CARRILLO: That are -
DR. ANA PEREA: That are committed to

7 DR. ANA PEREA: That are committed to it. 8 And they are all here.

VICE CHAIR CARRILLO: I'm very happy to hear that.

DR. ANA PEREA: I told them you got to be there.

VICE CHAIR CARRILLO: You would have gotten a kick out of one last year. It was like nobody was here. It was absurd.

DR. BRENDA ARELLANO: We have also asked for a commitment of three years. That continuity is important, especially in the beginning for a new school. We realize it's important in the early years as well.

VICE CHAIR CARRILLO: Fantastic. I'm very happy to hear that.

We already talked about PD and everything. So transportation, just so you know as an aside. that's a focus for us as a Commission.

what it is and take the action necessary.

DR. ANA PEREA: That's why we're going to have a board, governing council, governing body, they will evaluate, and they will let us know.

VICE CHAIR CARRILLO: Well, that's a great transition. What we find is where schools don't succeed, it's typically because their boards aren't very good. And, oftentimes, their boards really weren't clear what they signed up for, because it's a huge job; not just for a year.

They need to commit for, like, two to three years, at least, if they're going to be a board member, and then the oversight that a board has to take responsibility for and many board don't.

And so -- and, consequentially, what happens is, you know, the head learner, or different people, aren't held accountable for results.

So relative to your board, is your board likely -- you're likely to be the head learner; right?

But as far as the board, what's the status of people that you know at this point who are committed? Not just having a conversation or lunch, but they are committed to being on the board for this school.

because it's an equity issue, making sure that all the kids that go to State charters have a way to get to school, and that the Legislature create some sort of statute that districts have to be partners in getting kids to school, even it's not they're own. Because that's just not right; they're all our kids.

Food service -- no. I think a lot of the questions I had are addressed here.

I would completely agree with Commissioner Brauer. I wish there were more tribal people here, because it's one thing for them to say, "Yeah, this is a great idea. I'd love to have this in our community."

And it's another thing for them to say, "I'm going to teach the class in Tiwa. I have the person that's going to do this. We are 100 percent on board."

And -- because that's important for us to hear, especially when you're making that kind of commitment to kids and the community.

So I would just echo what -- I was going to call you "Chair Brauer" -- that's what Commissioner Brauer said. Yeah, next year.

This is good.

No. I'm good for now, and if I have any

other questions, as Ms. Gipson will say, I'll definitely submit those.

DR. NICOLE MONTAGUE: I apologize. I just didn't speak up. I just really want to come back to Commissioner Burt's piece. And it ties right into Commissioner Brauer's piece.

Better? Okay.

So you asked about the language piece. And it's such a tender piece, and it's so important. And it -- the reason that we don't have it concrete in a diagram in a table is because of what Commissioner Brauer brought up.

We need buy-in from the local language groups in the local area. But an IB school, from the day the children come into the school -- and they are welcome, whoever they are, wherever they come from, not only are they welcome and validated, they're going to learn about the kid next to them.

So at any given point during a dual language day, somebody is comfortable, "because they're finally using my language," and somebody else is uncomfortable because, "they're going to use my language in a different part of the day."

So if -- that's fairly easy to staff -not easy to staff. But we have excellent

community to help us develop that curriculum.

And then in three years, we will be certified as an IB school. And then when they get to the -- the DP program -- I'm a parent whose child -- my son started at Corrales at International in the second. And when he got to 11-12, it's exactly as Commissioner Beck said. It's challenging.

And he was well prepared. He still talks about the excellent teachers and education that he got at that school. And he chose not to.

But we have offered him that choice at our school. And I think that's an important piece.

So I just wanted to address those three pieces that I did, and I apologize.

THE CHAIR: Thank you for that. I really do appreciate it.

So I think we're done with our questions at this point in time.

Once again, if there are additional questions -- because we do have some Commissioners that will read the transcript and/or watch the hearing. And when we come to our work session a week from Friday, if there are any additional questions, those will be populated in the letter,

103

professionals in Spanish and English. And we have excellent models, we have excellent research, and we would love to do 90/10, but we will do 50/50 because of our population.

But to get those -- so we have a child that any given moment of the day, they're speaking in their language. Maybe they're comfortable, they can relax, the brain can relax. Frontal lobe engages. We're learning. And in a later part of the day or a later part of the week, they're going to get the same concepts, but in their other language that they're struggling. And we're going to add a third, a fourth, maybe a fifth.

And those other languages, they might not master them, but they'll have an understanding that there's a whole other different way to say this, to look at this, to learn about this phenomena. "There's other people that value something that I always valued, and I want to learn about that."

So it's an international-mindedness. But the school must exist and the curriculum must be employed for three years before we're certified as an IB school. That's why it looks kind of hazy, because we want to incorporate the local languages, and because we need families and grandpas and

and the school will then have the opportunity to respond to those at the August hearing.

So -- and -- oh. And I don't think I mentioned. In between, from the letter that comes out at the work session and our meeting in August, the Charter School Division will make a final recommendation from the Charter School Division to the Commission. And then, once again, we'll have the August hearing.

So I want to thank everyone who stayed and everyone who didn't -- who couldn't stay. But everyone's voice is really important to hear in this process. And we do take everything into consideration.

I know there's a lot of time and effort and energy that has gone into this application. And it's done out of passion for students, and we know how important that is. That's why we're all sitting

And we want to -- we know things have to move forward. And we want to be part of the process of moving education in New Mexico forward in a different manner. We really do.

So I want to thank you for all your energies, collectively, that you've put into getting

106 1 us here today. 2 DR. ANA PEREA: Thank you. May I say 3 something, please? 4 THE CHAIR: Sure. 5 DR. ANA PEREA: I want to thank you for 6 all your questions. All of them are valid. If I 7 was in your place, I would probably ask the same 8 questions. 9 I am in inquirer, so I am probably going 10 to do that, too. 11 Just to wrap it up, thank you to every 12 single person and my students who showed up today. 13 It was a beautiful surprise. I didn't know that I 14 say all those words. Now I know that. They opened 15 the secrets. 16 I want to say thank you to the parents and 17 the CIS community that came; to my mentors, they are 18 here, too; to the team. It's a big effort here. 19 And I hope we can do something nice for 20 our kiddos. Thank you. Bye-bye. 21 THE CHAIR: We are in recess until 9:00 22 a.m. tomorrow morning in Alamogordo. 23 (Proceedings in recess at 4:40 p.m.) 24 25 107 BEFORE THE PUBLIC EDUCATION COMMISSION 2 STATE OF NEW MEXICO 3 4 5 REPORTER'S CERTIFICATE 6 I, Cynthia C.
